## Contents

Preface ...................................................................................................................... v  
Contributors ........................................................................................................... xiii  

1 Challenges, Opportunities, and Evolving Landscapes in Pharmacogenomics and Personalized Medicine:  
   *An Industry Perspective* .................................................................................. 1  
   Nadine Cohen and Theresa Frangiosa  

2 Implementation of Pharmacogenomic Sample Collection in Clinical Trials ........................................ 27  
   Deborah Sokol Ricci and Monique Franc  

3 Pharmacogenomics: *The Regulatory Environment and Labeling Implications* .................................... 55  
   Myong-Jin Kim, Shiew-Mei Huang, Atiqur Rahman, Felix W. Frueh, and Lawrence J. Lesko  

4 Applications of Pharmacogenomics in Drug Discovery .......................................................... 73  
   Dr. Duncan McHale  

5 Applications of Pharmacogenomics in Clinical Trials .................................................................. 89  
   Monique Franc  

6 Pharmacogenomics Applications in Drug Metabolism:  
   *From Genotyping to Drug Label-Challenges?* ......................................................................... 109  
   Ann K. Daly  

7 The Genetics of Adverse Drug Reactions:  
   *Promises and Problems* ......................................................................................... 121  
   Martin Armstrong
8 Strategies and Resources for Marker Selection and Genotyping in Genetic Association Studies
Nicole Soranzo, Dong-Jing Fu, and Qingqin S. Li

9 Study Design and Statistical Issues in Pharmacogenetics Research: From Candidate Genes to Genome-Wide Screens
Nicholas J. Schork, Nathalie Malo, and Eric J. Topol

10 Holy SNP, Batman!
Reyna Favis

11 Predictive Biomarker Classifiers in the Design of Pivotal Clinical Trials
Richard Simon

12 Translation of Biomarkers into Clinical Utility
William L. Trepicchio and George Mulligan

13 Pharmacogenomic Study Feasibility Assessment and Pharmaceutical Business Decision-Making
Monique Franc and Theresa Frangiosa

14 Co-Development of Drugs and Pharmacogenomics-Based Diagnostics in Oncology
Jeffrey S. Ross

15 Pharmacogenomics Applications in Epilepsy
Chantal Depondt

16 Pharmacogenomics in Alzheimer’s Disease
Ramón Cacabelos

17 Pharmacogenomics Applications in Psychiatric Disorders
Todd Lencz and Anil K. Malhotra

18 Pharmacogenomics in HIV Disease
Amalio Telenti

19 Pharmacogenomics and Cardiovascular Drugs
Gérard Siest, Hind Berrahmoune, Jean-Brice Marteau, and Sophie Visvikis-Siest
Contents

20 Pharmacogenomic Applications in Children ............................................ 447
  Struan F.A. Grant and Hakon Hakonarson

21 Pharmacogenomics of Rare and Monogenic Disorders ....................... 479
  Paul D. Maher

Index ........................................................................................................... 499
Pharmacogenomics and Personalized Medicine
Cohen, N. (Ed.)
2008, XVI, 509 p. 53 illus., Hardcover
ISBN: 978-1-934115-04-6
A product of Humana Press
