# Contents

 Preface ................................................................. v  
Contributors ........................................................... xiii  

## Part I. Introduction

1. DNA Methylation: An Introduction to the Biology  
   and the Disease-Associated Changes of a Promising Biomarker  
   Jörg Tost .............................................................. 3

## Part II. Global Methylation Levels

2. Quantification of Global DNA Methylation by Capillary Electrophoresis  
   and Mass Spectrometry  
   María Berdasco, Mario F. Fraga, and Manel Esteller ....................... 23

3. Methyl Group Acceptance Assay for the Determination of Global DNA  
   Methylation Levels  
   Kenneth P. Nephew, Curt Balch, and David G. Skalnik ..................... 35

## Part III. Methods for Whole Genome Analysis of DNA  
   Methylation Patterns

4. Immunodetection Array  
   Johannes Pröll, Christian Wechselberger, Mathilde Födermayr, Otto Zach,  
   and Dieter Lutz ..................................................... 45

5. Methylated DNA Immunoprecipitation (MeDIP)  
   Fabio Mohn, Michael Weber, Dirk Schübeler, and Tim-Christoph Roloff ........ 55

6. The MIRA Method for DNA Methylation Analysis  
   Tibor A. Rauch and Gerd P. Pfeifer ..................................... 65

7. The HELP Assay  
   Mayumi Oda and John M. Greally ......................................... 77

8. Differential Methylation Hybridization: Profiling DNA Methylation  
   with a High-Density CpG Island Microarray  
   Pearly S. Yan, Dustin Potter, Daniel E. Deatherage, Shili Lin,  
   and Tim H.-M. Huang ................................................ 89

9. Analysis of DNA Methylation by Amplification  
   of Intermethylated Sites (AIMS)  
   Mireia Jordà, Jairo Rodríguez, Jordi Frigola, and Miguel A. Peinado ........ 107

10. Methylation-Sensitive Representational Difference Analysis (MS-RDA)  
    Toshikazu Ushijima and Satoshi Yamashita ................................ 117
11. Restriction Landmark Genomic Scanning: Analysis of CpG Islands in Genomes by 2D Gel Electrophoresis

Joseph F. Costello, Dominic J. Smiraglia, Chibo Hong, and Christoph Plass ........................................................ 131

12. GoldenGate® Assay for DNA Methylation Profiling

Marina Bibikova and Jian-Bing Fan ......................................... 149

13. 5’-Azacytidine Expression Arrays

Paul Cairns ........................................................................ 165

PART IV. GENE-SPECIFIC METHYLATION ANALYSIS

14. DNA Methylation Analysis by Bisulfite Conversion, Cloning, and Sequencing of Individual Clones

Yingying Zhang, Christian Rohde, Sascha Tierling, Heinrich Stamerjohanns, Richard Reinhardt, Jörn Walter, and Albert Jeltsch ......................................................... 177

15. Identification and Quantification of Differentially Methylated Loci by the PyrosequencingTM Technology

Emelyne Dejeux, Hafida El abdaloua, Ivo Glynne Gut, and Jörg Tost ........... 189

16. Mass Spectrometric Analysis of Cytosine Methylation by Base-Specific Cleavage and Primer Extension Methods

Dirk van den Boom and Mathias Ehrich ........................................ 207

17. Melting Curve Assays for DNA Methylation Analysis

Tomasz K. Wojdacz and Alexander Dobrovic................................... 229

18. Methylation SNaPshot: A Method for the Quantification of Site-Specific DNA Methylation Levels

Zachary Kaminsky and Arturas Petronis ...................................... 241

Romulo Martin Brena and Christoph Plass .................................... 257

20. Restriction Digestion and Real-Time PCR (qAMP)

Christopher C. Oakes, Sophie La Salle, Jacquetta M. Trasler, and Bernard Robaire .......................................................... 271

21. MethylQuant: A Real-Time PCR-Based Method to Quantify DNA Methylation at Single Specific Cytosines

Claire Dugast-Darzacq and Thierry Grange .................................. 281

22. Methylation-Specific PCR

Julien D. F. Licchesi and James G. Herman ..................................... 305

23. MethyLight

Mihaela Campan, Daniel J. Weisenberger, Binh Trinh, and Peter W. Laird ................................................................. 325

24. Quantification of Methylated DNA by HeavyMethyl Duplex PCR

Jürgen Distler ........................................................................ 339
Contents

PART V. SPECIAL APPLICATIONS
25 Analysis of Methylated Circulating DNA in Cancer Patients’ Blood
   Eiji Sunami, Anh-Thu Vu, Sandy L. Nguyen, and Dave S. B. Hoon ............... 349
26 Prevention of PCR Cross-Contamination by UNG Treatment
   of Bisulfite-Treated DNA
   Reimo Tetzner ............................................................... 357
27 Profiling DNA Methylation from Small Amounts of Genomic DNA
   Starting Material: Efficient Sodium Bisulfite Conversion
   and Subsequent Whole-Genome Amplification
   Jonathan Mill and Arturas Petronis .............................................. 371

Index .......................................................... 383
DNA Methylation
Methods and Protocols
Tost, J. (Ed.)
2009, XVI, 392 p., Hardcover
ISBN: 978-1-934115-61-9
