Preface ................................................................. vii
Vassil St. Georgiev
Acknowledgments .................................................... ix
Contributors .......................................................... xv

PART I INTRODUCTION

National Institute of Allergy and Infectious Diseases (NIAID): An Overview .................................................. 3
Karl A. Western

PART II MICROBIOLOGY AND INFECTIOUS DISEASES

Section 1 Emerging and Re-Emerging Infections

1 Biotools for Determining the Genetics of Susceptibility to Infectious Diseases and Expediting Research Translation into Effective Countermeasures .......................................................... 13
Malak Kotb, Robert W. Williams, Nourtan Fathey, Mohamed Nooh, Sarah Rowe, Rita Kansal, and Ramy Aziz

2 Spore Surface Components and Protective Immunity to Bacillus anthracis ................................................. 19
Patricia Sylvestre, Ian Justin Glomski, Evelyne Couture-Tosi, Pierre Louis Goossens, and Michèle Mock

3 New Candidate Anthrax Pathogenic Factors ................................................................................. 25
Serguei G. Popov

4 Ehrlichiae and Ehrlichioses: Pathogenesis and Vector Biology ......................................................... 37
H. L. Stevenson, N. Ismail, and D. H. Walker

5 Multiple Locus Variable Number Tandem Repeat (VNTR) Analysis (MLVA) of Brucella spp.
Identifies Species-Specific Markers and Insights into Phylogenetic Relationships ........................................ 47

6 Expression of the MtrC-MtrD-MtrE Efflux Pump in Neisseria gonorrhoeae and Bacterial Survival in the Presence of Antimicrobials .......................................................... 55
Section 2 Tuberculosis

7 What can Mycobacteriophages Tell Us About Mycobacterium tuberculosis? .......................... 67
Graham F. Hatfull

8 Clinical Mycobacterium tuberculosis Strains Differ in their Intracellular Growth in Human Macrophages .......... 77
Sue A. Theus, M. Donald Cave, and Kathleen D. Eisenach

9 Mechanisms of Latent Tuberculosis: Dormancy and Resuscitation of Mycobacterium tuberculosis .......... 83
Galina Mukamolova, Elena Salina, and Arseny Kaprelyants

10 Separating Latent and Acute Disease in the Diagnosis of Tuberculosis ........................................... 91
T. Mark Doherty

11 Mutant Selection Window Hypothesis: A Framework for Anti-mutant Dosing of Antimicrobial Agents ........ 101
Karl Drlica and Xilin Zhao

Section 3 Avian Influenza

12 The NIAID Influenza Genome Sequencing Project ............................................................................ 109
Lone Simonsen, Gayle Bernabe, Karen Lacourciere, Robert J. Taylor, and Maria Y. Giovanni

13 Lessons from the 1918 Spanish Flu Epidemic in Iceland. ................................................................. 115
Magnús Gottfredsson

14 Control of Notifiable Avian Influenza Infections in Poultry ............................................................... 123
Ilaria Capua and Stefano Marangon

15 Understanding the Complex Pathobiology of High Pathogenicity Avian Influenza Viruses in Birds ....... 131
David E. Swayne

Section 4 Prophylactics and Therapeutics for Infectious Diseases

16 Development of Prophylactics and Therapeutics Against the Smallpox and Monkeypox Biothreat Agents . 145
Mark Buller, Lauren Handley, and Scott Parker

17 The Hierarchic Informational Technology for QSAR Investigations: Molecular Design of Antiviral Compounds ......................................................... 163
V. E. Kuz’min, A. G. Artemenko, E. N. Muratov, L. N. Ognichenko, A. I. Hromov,
A. V. Liahovskij, and P. G. Polischuk

18 Antivirals for Influenza: Novel Agents and Approaches ................................................................. 179
William A. Fischer, II and Frederick Hayden

19 Anti-Infectious Actions of the Proteolysis Inhibitor e-Aminocaproic Acid (e-ACA) .............................. 193
V. P. Locitsky

20 A New Highly Potent Antienteroviral Compound ............................................................................. 199
Lubomira Nikolaeva-Glomb, Stefan Philipov, and Angel S. Galabov

Section 5 Russian Perspectives in Emerging and Re-Emerging and Infections Research

21 Reduction and Possible Mechanisms of Evolution of the Bacterial Genomes .................................... 205
George B. Smirnov

22 Interaction of Yersinia pestis Virulence Factors with IL-1R/TLR Recognition System .......................... 215
Vyacheslav M. Abramen, Valentin S. Khileminikov, Anatoly M. Vasiliev, Igor V. Kosarev,
Raisa N. Vasilenko, Nataly L. Kulikova, Vladimir L. Motin, George B. Smirnov, Valentin
I. Evstigneev, Nicolay N. Karkischenko, Vladimir N. Uversky, and Robert R. Brubaker

</table>
39 A Role for Complement System in Mobilization and Homing of Hematopoietic Stem/Progenitor Cells
M. Z. Ratajczak, R. Reca, M. Wysoczynski, M. Kucia, and J. Ratajczak

40 Post-translational Processing of Human Interferon-γ Produced in Escherichia coli
and Approaches for Its Prevention
Maya Boyanova, Roumyana Mironova, Toshimitsu Niwa, and Ivan G. Ivanov

Section 2 Autoimmunity
41 B-cell dysfunctions in Autoimmune Diseases
Moncef Zouali

42 A Model System for Studying Mechanisms of B-cell Transformation in Systemic Autoimmunity
Wendy F. Davidson, Partha Mukhopadhyay, Mark S. Williams, Zohreh Naghashfar, Jeff X. Zhou, and Herbert C. Morse, III

43 Breach and Restoration of B-Cell Tolerance in Human Systemic Lupus Erythematosus (SLE)
Iñaki Sanz, R. John Looney, and J. H. Anolik

Section 3 Infection and Immunity
44 Dendritic Cells: Biological and Pathological Aspects

45 Immunomic and Bioinformatics Analysis of Host Immunity in the Vaccinia Virus and Influenza A Systems
Magdalini Moutaftsi, Bjoern Peters, Valerie Pasquetto, Carla Oseroff, John Sidney, Huynh Hoa-Bui, Howard Grey, and Alessandro Sette

46 Immunoreactions to Hantaviruses
Alemka Markotic and Connie Schmaljohn

47 Innate Immunity to Mouse Cytomegalovirus
Djurdjica Cekinovic, Irena Slavuljica, Tihana Lenac, Astrid Krmpotic, Bojan Polic, and Stipan Jonjic

Section 4 Vaccines
48 Research and Development of Chimeric Flavivirus Vaccines
Simon Delagrave and Farshad Guirakhoo

49 Correlates of Immunity Elicited by Live Yersinia pestis Vaccine
Vivian L. Braciale, Michael Nash, Namita Sinha, Irina V. Zudina, and Vladimir L. Motin

PART V BUILDING A SUSTAINABLE PERSONAL RESEARCH PORTFOLIO
50 Strategies for a Competitive Research Career
Hortencia Hornbeak and Peter R. Jackson

51 Selecting the Appropriate Funding Mechanism
Priti Mehrotra, Hortencia Hornbeak, Peter R. Jackson, and Eugene Baizman

52 Preparing and Submitting a Competitive Grant Application
Peter R. Jackson and Hortencia Hornbeak

53 Identifying Research Resources and Funding Opportunities
Eugene Baizman, Hortencia Hornbeak, Peter R. Jackson, and Priti Mehrotra
