Contents

Preface ................................................................. ix
List of Talks .......................................................... xi

A.A. Albanese, J. Bonet and W.J. Ricker
On Mean Ergodic Operators ........................................... 1

W. Arendt and S. Bu
Fourier Series in Banach spaces and Maximal Regularity ........... 21

D. Atanasius
Spectral Measures on Compacts of Characters of a Semigroup ...... 41

D. Barcenas and C.E. Finol
On Vector Measures, Uniform Integrability and Orlicz Spaces ...... 51

O. Blasco
The Bohr Radius of a Banach Space .................................. 59

O. Blasco and J. van Neerven
Spaces of Operator-valued Functions Measurable with Respect to the Strong Operator Topology ..................... 65

A. Boccuto and D. Candeloro
Defining Limits by Means of Integrals .............................. 79

D. Bongiorno
A First Return Examination of Vector-valued Integrals ............. 89

G. Buskes, R. Page, Jr. and R. Yilmaz
A Note on Bi-orthomorphisms ........................................ 99

R. del Campo, A. Fernández, I. Ferrando, F. Mayoral and F. Naranjo
Compactness of Multiplication Operators on Spaces of Integrable Functions with Respect to a Vector Measure ............. 109

K. Cichoń and M. Cichoń
Some Applications of Nonabsolute Integrals in the Theory of Differential Inclusions in Banach Spaces .................. 115

S.-O. Corduneanu
Equations Involving the Mean of Almost Periodic Measures ....... 125

Contents vii

S. Okada
Does a Compact Operator Admit a Maximal Domain for its Compact Linear Extension? .......................................... 313

B. de Pagter and W.J. Ricker
A Note on $R$-boundedness in Bidual Spaces .......................... 323

Ch. Papadimitropoulos
Salem Sets in the $p$-adics, the Fourier Restriction Phenomenon and Optimal Extension of the Hausdorff-Young Inequality .............. 327

H. Pfitzner
L-embedded Banach Spaces and a Weak Version of Phillips Lemma ................................................................. 339

L. Rodríguez-Piazza
When is the Space of Compact Range Measures Complemented in the Space of All Vector-valued Measures? ......................... 345

A.R. Schep
When is the Optimal Domain of a Positive Linear Operator a Weighted $L^1$-space? ............................................. 361

R.G. Venter
Liapounoff Convexity-type Theorems .................................. 371

List of Participants .................................................... 381
Vector Measures, Integration and Related Topics
Cuberta, G.; Mockenhaupt, G.; Ricker, W.J. (Eds.)
2010, XIV, 382 p., Hardcover
ISBN: 978-3-0346-0210-5
