# Contents

## Part I  Today’s Live Attenuated Vaccines

**Live Vaccines and Their Role in Modern Vaccinology**  ................. 3  
Gordon Dougan, David Goulding, and Lindsay J. Hall

**Live Attenuated Vaccines: Influenza, Rotavirus and Varicella Zoster Virus**  ................................................................. 15  
Harry B. Greenberg and Ann M. Arvin

**Classical Live Viral Vaccines**  ................................................. 47  
Thomas P. Monath

## Part II  Genetically Attenuated Micro-Organisms as Vaccines

**Recombinant Live Vaccines to Protect Against the Severe Acute Respiratory Syndrome Coronavirus**  .................................. 73  
Luis Enjuanes, Jose L. Nieto-Torres, Jose M. Jimenez-Guardeño, and Marta L. DeDiego

**Live-Attenuated *Shigella* Vaccines. Is Encouraging Good Enough?**  ...... 99  
Yves Germani and Philippe J. Sansonetti

**New Generation BCG Vaccines**  ............................................. 119  
Michael V. Tullius and Marcus A. Horwitz

## Part III  Manipulating Host-Pathogen Interactions to Make Vaccines

**Basic Science Paves the Way to Novel Safe and Effective Pestivirus Vaccines**  ................................................................. 173  
Norbert Tautz and Gregor Meyers
Live Attenuated Influenza Virus Vaccines: NS1 Truncation
as an Approach to Virus Attenuation ........................................ 195
Natalie Pica, Peter Palese, and John Steel

An Attenuated HSV-1 Live Virus Vaccine Candidate That
is Replication Competent but Defective in Epithelial Cell-to-Cell
and Neuronal Spread ............................................................ 223
Elizabeth E. Zumbrun and Harvey M. Friedman

Live Attenuated Vaccines for Respiratory Syncytial Virus ............ 237
Michael N. Teng

Live Attenuated Cholera Vaccines: Flagella and Reactogenicity ....... 261
D. Ewen Cameron and John J. Mekalanos

Part IV  New Types of Replicating Vaccines

Replication-Defective Herpes Simplex Virus Mutant Strains
as Genital Herpes Vaccines and Vaccine Vectors .......................... 285
David M. Knipe

Nucleic Acid-Based Infectious and Pseudo-Infectious Flavivirus
Vaccines .................................................................................. 299
Justin A. Roby, Roy A. Hall, and Alexander A. Khromykh

Application of Cleavage Activation Mutants of Influenza Virus
as Live Vaccines ......................................................................... 321
Juergen Stech and Hans-Dieter Klenk

Alphavirus Particle-Based Vaccine Vectors ................................. 331
Scott J. Balsitis, Clayton W. Beard, and Peter W. Mason

Recombinant, Chimeric, Live, Attenuated Vaccines
Against Flaviviruses and Alphaviruses ........................................ 349
Thomas P. Monath

Index ...................................................................................... 439
Replicating Vaccines
A New Generation
Dormitzer, P.; Mandl, C.W.; Rappuoli, R. (Eds.)
2011, XIII, 447 p., Hardcover
ISBN: 978-3-0346-0276-1
