

Contents

Preface	vii
<i>M. Ben-Artzi</i> Divergence-type Operators: Spectral Theory and Spacetime Estimates	1
<i>N. Bournaveas and V. Calvez</i> Kinetic Models of Chemotaxis	41
<i>M. Cicognani and F. Colombini</i> Modulus of Continuity and Decay at Infinity in Evolution Equations with Real Characteristics	53
<i>E. Cordero, F. Nicola and L. Rodino</i> Time-Frequency Analysis of Schrödinger Propagators	63
<i>S. Dave, G. Hörmann and M. Kunzinger</i> Geometric Regularization on Riemannian and Lorentzian Manifolds	87
<i>D. Del Santo</i> A Remark on the Uniqueness for Backward Parabolic Operators with non-Lipschitz-continuous Coefficients	103
<i>V. Georgiev and M. Tarulli</i> Dispersive Properties of Schrödinger Operators in the Absence of a Resonance at Zero Energy in 3D	115
<i>V. Georgiev and B. Velichkov</i> Decay Estimates for the Supercritical 3-D Schrödinger Equation with Rapidly Decreasing Potential	145
<i>G. Hörmann, M. Kunzinger and R. Steinbauer</i> Wave Equations on Non-smooth Space-times	163

<i>H. Kubo</i>	
Lower Bounds for the Lifespan of Solutions to Nonlinear Wave Equations in Elasticity	187
<i>T. Matsuyama</i>	
Representation Formula of the Resolvent for Wave Equation with a Potential Outside the Convex Obstacle	213
<i>K. Mochizuki and I.Yu. Trooshin</i>	
On the Scattering on a Loop-shaped Graph	227
<i>C. Parenti and A. Parmeggiani</i>	
On the Cauchy Problem for Hyperbolic Operators with Double Characteristics	247
<i>M. Ruzhansky, M. Sugimoto and B. Wang</i>	
Modulation Spaces and Nonlinear Evolution Equations	267
<i>S. Serovajsky and K. Shakenov</i>	
An Optimal Control Problem for a Nonlinear Hyperbolic Equation with an Infinite Time Horizon	285
<i>S. Spagnolo and G. Tagliabata</i>	
Local in Space Energy Estimates for Second-order Hyperbolic Equations	301
<i>H. Takamura and K. Wakasa</i>	
The Final Problem on the Optimality of the General Theory for Nonlinear Wave Equations	315

Evolution Equations of Hyperbolic and Schrödinger Type
Asymptotics, Estimates and Nonlinearities

Ruzhansky, M.V.; Sugimoto, M.; Wirth, J. (Eds.)

2012, VIII, 328 p., Hardcover

ISBN: 978-3-0348-0453-0

A product of Birkhäuser Basel
