Contents

Preface ................................................................. vii

A. Savin and B. Sternin
Elliptic Theory for Operators Associated with Diffeomorphisms
of Smooth Manifolds ................................................ 1

B.-W. Schulze and L. Tepoyan
The Singular Functions of Branching Edge Asymptotics ............. 27

X. Duan
The Heat Kernel and Green Function of the Sub-Laplacian
on the Heisenberg Group ............................................. 55

S. Molahajloo, L. Rodino and M.W. Wong
Metaplectic Equivalence of the Hierarchical Twisted Laplacian ...... 77

S. Molahajloo and M.W. Wong
The Heat Kernel and Green Function of a Sub-Laplacian
on the Hierarchical Heisenberg Group ............................... 85

J. Delgado
$L^p$-bounds for Pseudo-differential Operators on the Torus .......... 103

J. Toft
Multiplication Properties in Gelfand–Shilov Pseudo-differential
Calculus ............................................................. 117

L. Cohen
Operator Invariance .................................................... 173

L. Galleani
Initial Value Problems in the Time-Frequency Domain ............... 189

V. Catană
Polycaloric Distributions and the Generalized Heat Operator ....... 199
