

Contents

1 Introduction	1
1.1 Smart Materials and Implications in Design	3
References	8
2 Materials that Change Color	9
2.1 Classification of Chromogenic Materials	11
2.2 Photochromic Materials	13
2.3 Thermochromic Materials	16
2.4 Electrochromic Materials	25
2.4.1 Electrochromic Devices	28
2.4.2 Electronic Paper	32
2.4.3 Electrochromic Devices for Windows	34
2.4.4 Liquid Crystals	36
2.4.5 LC Displays	39
2.4.6 Liquid Crystal Devices for Windows	41
2.5 Chemochromic Materials	42
2.5.1 Gaschromic Materials	43
2.5.2 Halochromic Materials	44
2.5.3 Hygro-Hydrochromic Materials	45
2.6 Mechanochromic Materials	47
2.7 Biochromic Materials	52
2.8 Dynamic Color in Nature	54
References	57
3 Manufacturing and Processes Related to Chromogenic Materials and Applications	61
3.1 Liquid Crystals and their Use in Temperature Indicators	61
3.2 Leuco Dyes and their Incorporation into Polymers	63
3.3 Microencapsulation	64
3.4 Chromogenic Inks	67
3.5 Chromogenic Gels	68
3.6 Printing and Coating with Chromogenic Inks and Dyes	70
3.7 Chromogenic Textiles	72
3.8 Photochromic Eyeglass Lenses	74

3.9	Electrochromic Displays	74
3.10	Smart Electrochromic Windows	76
	References	77
4	Materials that Change Color for Intelligent Design	81
4.1	Color and Design	81
4.2	Designing with Materials that Change Color.	83
4.3	Theoretical and Methodological Considerations.	88
4.3.1	Design Primario, Design and Perception, Material Design	89
4.3.2	Designing the Interaction	91
4.4	Technical and Economic Considerations.	94
4.4.1	Thermal Stability of Chromogenic Materials	95
4.4.2	Light Stability	95
4.4.3	Activation Temperature	97
4.4.4	Switching Time	97
4.4.5	Economics	98
	References	98
5	Case Studies	101
5.1	Designing with Photochromic Materials	101
5.1.1	Sun-Reactive/Water-Reactive Dresses and Swimsuits by Amy Winters	101
5.1.2	Drivewear Photochromic Lens by Younger Optics	102
5.2	Designing with Thermochromic Materials	107
5.2.1	Thermochromic Brush by Corioliss	107
5.2.2	In Heat, Installation by Jürgen Mayer	108
5.2.3	LIE, Thermosensitive Bed Linens by Jürgen Mayer	111
5.3	Designing with Electrochromic Materials	111
5.3.1	Electrochromic Smart Glass by SmartGlass International	111
5.4	Designing with Hydrochromic Materials.	114
5.4.1	Solid Poetry	114
5.5	Designing with Biochromic Materials	115
5.5.1	TopCryo™ Time–Temperature Integrators by Cryolog	115
5.6	Smart Systems	118
5.6.1	SymbiosisO, A Collection of Textile Interfaces by Kärt Ojavee and Eszter Ozsvald.	118
5.6.2	Fabrication Bag by Hanna Landin and Linda Worbin	123
5.6.3	Pollution Monitoring Fashion by Sue Ngo and Nien Lan	125

5.6.4	Photochromic Sculpture by Tomoko Hashida, Yasuaki Kakehi, and Takeshi Naemura	127
5.6.5	No Bad Colours by Ron Arad, with Active True Colour	128
5.6.6	Footstool with a Geometric Dynamic Pattern by Linnéa Nilsson, Mika Satomi, Anna Vallgård and Linda Worbin	130
	References	135
Index	137
