## Contents

1. **Introduction** ................................................ 1  
   References and Notes ........................................... 6

2. **Uncovering the Interaction of Chemistry and Behavior in Depression: The Dimensional Versus Diagnostic Approaches in Structuring Research** ............ 9  
   Neurotransmitter-Behavioral Relationships ....................... 11  
   References and Notes ........................................... 13

3. **Depression is a “Storm” not a Lowering of Spirit: The Experience and Psychology of the Severe Depressive State** ...... 15  
   The Impact of the Drugs on US and European Theoretical Orientations ........................................... 16  
   The Experiential State ........................................... 17  
   The Impact of the Drug Era. ...................................... 18  
   References .................................................. 19

4. **“Rashomon” and the Componential Approach to Developing Measures of Mood and Behavior** ............................ 21  
   The “Multi-vantaged” Method: The “Rashomon” Approach ........ 25  
   Video Interview Behavioral Evaluation Study (VIBES) [15] ....... 27  
   Applying the Multi-vantage Behavioral Method to Studying the Nature of the Depressed State: The Components, Dimensions, and the Conflictual Nature of the State .................. 29  
   The Key Roles of Anxiety and Hostility in the Patient Profile .... 29  
   References .................................................. 32

5. **Dimensions of Depression:**  
   **The Conflictual Structure of the Depressed State** ................. 35  
   A Multidimensional Theory of the Nature of Depression ............. 36  
   References .................................................. 37
6 False Assumptions: The Multidimensional Quality and its Relationships to Functioning of the Central Nervous System

Behavioral Correlates of Central Neurotransmitters in the Affective Disorders [13–15]

The Noradrenergic Systems and Behavior

Serotonin and Behavior

On Dopamine

The Neurotransmitter Systems and Depression: Relating Actions of the Noradrenergic and Serotonergic Systems to Specific Behavioral Changes in Depressed Patients

The Therapeutic Process: The Sequence and Nature of Tricyclic Drug Actions in Depression

Linking Behavioral Changes with Drug-Induced Changes in Neurotransmitter System Functioning: Relationships of Changes in Cerebrospinal Fluid Concentrations of Neurotransmitter Metabolites and Behavior

References

7 Testing New Hypotheses About Neurochemistry, Depression, and Drugs

On Pharmacologically Different Drugs

References

8 Developing a More Effective and More Efficient Clinical Trial Model

The Current Food and Drug Administration (FDA) Endorsed Clinical Trial Model for Evaluating Putative New Antidepressants

Advancing the Current Clinical Trials Procedure: An Alternative Model

The Component-Specific Clinical Trial

The Component: Specific Clinical Trial and Methods of Measuring Components of the Depressive Disorder

Conclusions

References

9 Elaboration of the New Theory of Depression and Conclusions

On the Concept of Depression

Rethinking Depression: The New Conflictual Neurobehavioral States Hypothesis
