Part 4
On Källén’s Scientific Work

69  A Brief Background to Källén’s Scientific Publications .................. 339

70  Källén’s Debut Article with Early Trace of Supersymmetry ............. 341

71  Källén-Yang-Feldman Formalism ............................................. 343

72  On the Renormalization Constants in Quantum Electrodynamics .... 349

73  Källén in Schwinger’s “Hall of Fame of Quantum Electrodynamics” .... 353

75  Letter to Gasiorowicz ................................................................. 361

76  Källén’s Rejected Rebuttal .......................................................... 365

77  Why the Lee Model ................................................................. 367

78  Källén-Pauli Correspondence on the Lee Model ............................ 369

79  Early Work on Vertex Function and Rochester Conference 1957 .... 379

80  A. S. Wightman: Theoretical Physics at the IHÉS – Some Retrospective Remarks ............................................................... 383

81  Pauli’s Complaints about Källén’s Work on the n-Point Functions ...... 389
82  Work on Radiative Corrections .................................................. 393
83  Alberto Sirlin: Källén and Radiative Corrections ......................... 399
84  Love for Mathematics ............................................................... 405
85  G. Källén: A Connection Between Bergman-Weil and Cauchy Integral .................................................. 413

Part 5
Publications, Selected Papers and Commentaries

86  List of Publications ................................................................. 429
87  Paper [1949]: Higher Approximations in the external field for the Problem of Vacuum Polarization .................................................. 435
88  Paper [1950b]: Mass and charge-renormalizations in quantum electrodynamics without the use of the interaction representation .................................................. 455
89  Paper [1950f]: Formal Integration of the Equations of Quantum Theory in the Heisenberg Representation .................................................. 465
90  Paper [1952a]: On the Definition of the Renormalization Constants in Quantum Electrodynamics .................................................. 509
91  Paper [1953a]: Charge Renormalization and the Identity of Ward ........ 529
92  Paper [1953c]: On the Magnitude of the Renormalization Constants in Quantum Electrodynamics .................................................. 537
93  Paper [1955a]: Fourth Order Vacuum Polarization .................................................. 555
94 Paper [1955b]: On the Mathematical Structure of T. D. Lee’s Model of a Renormalizable Field Theory ............................ 575

95 Additional Commentaries .................................. 601

96 Commentaries on Papers from the Period 1950–1953 .............. 603

97 Commentaries on Papers from the Period 1954–1961 .............. 611

98 Commentaries on Papers from the Period 1962–1968 .............. 619

Index ............................................................. 625
Portrait of Gunnar Källén
A Physics Shooting Star and Poet of Early Quantum Field Theory
Jarlskog, C. (Ed.)
2014, XXVIII, 631 p. 180 illus., Hardcover
ISBN: 978-3-319-00626-0
