

Contents

1	Metric, Banach, and Hilbert Spaces	1
1.1	Metric Spaces	1
1.1.1	Basic Definitions and Examples	2
1.1.2	The Banach Fixed-Point Theorem	17
1.1.3	Compact Metric Spaces	20
1.2	Banach Spaces	22
1.2.1	Basic Definitions	22
1.2.2	Examples of Banach Spaces	26
1.2.3	The Schauder Fixed-Point Theorem	32
1.3	Hilbert Spaces	33
1.3.1	Basic Definitions	33
1.3.2	Examples of Hilbert Spaces	34
1.3.3	The Projection Theorem	35
2	Linear Operators on Banach Spaces	43
2.1	Bounded Linear Operators	43
2.1.1	Examples of Bounded Linear Operators	43
2.1.2	Properties of Bounded Operators	45
2.2	Unbounded Linear Operators	53
2.2.1	Examples of Unbounded Operators	54
2.2.2	Closed Linear Operators	55
2.2.3	Spectral Theory for Linear Operators	56
2.2.4	Sectorial Linear Operators	60
2.2.5	Semigroups of Linear Operators	61
2.2.6	Intermediate Spaces	65
2.3	Evolution Families	72
2.3.1	Evolution Families and Their Estimates	72
2.3.2	Acquistapace–Terreni Conditions	73
3	Almost Periodic Functions	79
3.1	Almost Periodic Functions	79
3.1.1	Definitions and Properties	80

- 3.1.2 Fourier Series Representation 87
- 3.1.3 Composition of Almost Periodic Functions 91
- 3.2 $C^{(n)}$ -Almost Periodic Functions 93
- 3.3 Asymptotically Almost Periodic Functions 96
 - 3.3.1 Basic Definitions and Properties 96
 - 3.3.2 Composition Theorems 98
- 3.4 Almost Periodic Sequences 100
 - 3.4.1 Basic Definitions 100
 - 3.4.2 Properties of Almost Periodic Sequences 101
 - 3.4.3 Asymptotically Almost Periodic Sequences 104
 - 3.4.4 Composition Theorems 105
- 3.5 S^p -Almost Periodic Functions 106
 - 3.5.1 Composition of S^p -Almost Periodic Functions 108
- 3.6 $S_p^{(n)}$ -Almost Periodic Functions 109
- 4 Almost Automorphic Functions 111**
 - 4.1 Almost Automorphic Functions 111
 - 4.1.1 Basic Definitions and Examples 111
 - 4.1.2 Composition Theorems 117
 - 4.2 $C^{(n)}$ -Almost Automorphic Functions 120
 - 4.3 Asymptotically Almost Automorphic Functions 121
 - 4.3.1 Basic Definitions 121
 - 4.3.2 Composition Theorems 124
 - 4.4 Almost Automorphic Sequences 128
 - 4.4.1 Basic Definitions 128
 - 4.4.2 Composition Theorems 129
 - 4.4.3 Asymptotically Almost Automorphic Sequences 131
 - 4.5 S^p -Almost Automorphic Functions 132
 - 4.5.1 Composition Theorems 134
 - 4.6 $S_p^{(n)}$ -Almost Automorphic Functions 138
- 5 Pseudo-Almost Periodic Functions 141**
 - 5.1 Pseudo-Almost Periodic Functions 141
 - 5.1.1 Basic Definitions 141
 - 5.1.2 Composition Theorems 146
 - 5.2 Weighted Pseudo-Almost Periodic Functions 149
 - 5.2.1 Definitions and Properties 149
 - 5.2.2 Weighted Mean for Almost Periodic Functions 154
 - 5.2.3 A Composition Theorem 156
 - 5.3 $C^{(n)}$ -Pseudo-Almost Periodic Functions 159
 - 5.3.1 Definitions and Properties 159
 - 5.3.2 Example 161
 - 5.4 S^p -Pseudo-Almost Periodic Functions 162

- 6 Pseudo-Almost Automorphic Functions** 167
 - 6.1 Pseudo-Almost Automorphic Functions 167
 - 6.1.1 Basic Definitions 167
 - 6.1.2 Properties of Pseudo-Almost Automorphic Functions 168
 - 6.2 Weighted Pseudo-Almost Automorphic Functions 178
 - 6.2.1 Basic Definitions 178
 - 6.2.2 A Composition Theorem 179
 - 6.3 $C^{(n)}$ -Pseudo-Almost Automorphic Functions 180
 - 6.3.1 Basic Definitions 180
 - 6.3.2 Properties of $C^{(n)}$ -Pseudo-Almost Automorphic Functions 181
 - 6.4 S^p -Pseudo-Almost Automorphic Functions 182
 - 6.4.1 Basic Definitions 182
 - 6.4.2 A Composition Theorem 183
 - 6.5 $S_p^{(n)}$ -Pseudo-Almost Automorphic Functions 186
- 7 Existence Results for Some Second-Order Differential Equations** 189
 - 7.1 Introduction 189
 - 7.2 Existence of Almost Periodic Solutions 191
 - 7.2.1 First-Order Differential Equations 191
 - 7.2.2 Sobolev-Type Second-Order Differential Equations 198
 - 7.2.3 Damped Second-Order Evolution Equations 202
 - 7.2.4 The Linear Beam Equation 203
 - 7.3 Existence of Almost Automorphic Solutions 204
 - 7.3.1 First-Order Differential Equations 204
 - 7.3.2 Sobolev-Type Second-Order Evolution Equations 206
 - 7.3.3 Damped Second-Order Evolution Equations 206
 - 7.3.4 The Linear Beam Equation 207
- 8 Existence Results to Some Integrodifferential Equations** 209
 - 8.1 Introduction 209
 - 8.2 Existence of Asymptotically Almost Automorphic Solutions 211
 - 8.3 Existence Result for Some Neutral Integrodifferential Equations . 216
 - 8.3.1 Introduction 216
 - 8.3.2 Asymptotically Almost Automorphic Solutions 216
- 9 Existence of $C^{(m)}$ -Pseudo-Almost Automorphic Solutions** 221
 - 9.1 Existence Results for Some Autonomous Higher-Order Differential Equations 221
 - 9.1.1 Introduction 221
 - 9.1.2 First-Order Differential Equations 222
 - 9.1.3 Higher-Order Differential Equations 227
 - 9.1.4 Second-Order Differential Equations 227
 - 9.1.5 An Autonomous Beam Equation 229

9.2	Existence Results for Some Nonautonomous Higher-Order Differential Equations	231
9.2.1	Introduction	231
9.2.2	First-Order Differential Equations	233
9.2.3	Higher-Order Differential Equations	238
9.2.4	Second-Order Damped Differential Equations	238
9.2.5	A Nonautonomous Beam Equation	241
10	Pseudo-Almost Periodic Solutions to Some Third-Order Differential Equations	245
10.1	Introduction	245
10.2	Existence of Pseudo-Almost Periodic Solutions	247
10.2.1	First-Order Differential Equations	247
10.2.2	Third-Order Differential Equations	251
10.2.3	Some General Third-Order Differential Equations	255
10.3	Existence of Weighted Pseudo-Almost Periodic Solutions	255
10.3.1	First-Order Differential Equations	255
10.3.2	Third-Order Differential Equations	260
11	Pseudo-Almost Automorphic Solutions to Some Sobolev-Type Equations	261
11.1	Introduction	261
11.2	Existence of Pseudo-Almost Automorphic Solutions	262
11.2.1	Existence Results	263
11.2.2	Existence Results for the Heat Equation	271
12	Stability Results for Some Higher-Order Difference Equations	275
12.1	Introduction	275
12.2	Almost Periodic Higher-Order Difference Equations	276
12.2.1	First-Order Difference Equations	276
12.2.2	Existence Results for the Beverton–Holt Model	281
12.2.3	Higher-Order Difference Equations	282
12.3	Almost Automorphic Higher-Order Difference Equations	283
12.3.1	Introduction	283
12.3.2	First-Order Difference Equations	283
12.3.3	Higher-Order Difference Equations	288
A	Appendix	289
A.1	Spectral Decomposition of the Self-Adjoint Operator A	289
A.2	Proof of an Interpolation Theorem	290
A.3	Bi-Almost Automorphy and Positive Bi-Almost Automorphy	291
	References	293
	Index	301
