4 Sulfonating Agents and Derivatives Based on Sulfuric Acid .............. 35
  4.1 Summary ..................................................................................................... 35
  4.2 Detailed Account of Sulfonating Agents ............................................ 35
    4.2.1 25% Oleum ............................................................... 35
    4.2.2 65% Oleum ............................................................... 37
    4.2.3 Sulfur Trioxide (Liquid or Gas) ........................................ 38
    4.2.4 Chlorosulfonic Acid ............................................. 39
    4.2.5 Diethyl Sulfate ..................................................... 42
    4.2.6 Dimethyl Sulfate ..................................................... 43
    4.2.7 Chloro-Oleum ......................................................... 44
    4.2.8 Liquid Sulfur Dioxide .................................................. 46

5 Innovations/Modifications in the Technology
for the Manufacture of Sulphuric Acid.................................................. 53
  5.1 Introduction .................................................................................................. 53
    5.1.1 Improvements in Process ................................................... 53
    5.1.2 Double Contact Double Absorption DCDA Process
          with Variants ........................................................................... 54
    5.1.3 Use of Progressively Improved Catalysts .................................. 54
  5.2 Heat Recovery Equipment ................................................................. 55
    5.2.1 Use of Alonised Tubes and Candle Demisters ............... 55
    5.2.2 Separate Acid Circuits for IPAT, DT, and FAT ............... 56
  5.3 Innovations/Modifications in Technology ......................................... 56
    5.3.1 Sulfur Melter ........................................................................... 57
    5.3.2 Sulfur Filter ........................................................................... 57
    5.3.3 Sulfur Burning Furnace ..................................................... 57
    5.3.4 Hot Gas Filter ........................................................................ 58
    5.3.5 Converter ............................................................................... 59
    5.3.6 Heat Exchangers ..................................................................... 60
    5.3.7 Acid Towers ........................................................................ 60
    5.3.8 Demisters .............................................................................. 61
    5.3.9 Alkali Scrubbers ..................................................................... 61
    5.3.10 Gas and Air Ducts, Bellows, and Butterfly Valves
          in Sulfuric Acid and Oleum Plants ..................................... 62
    5.3.11 Acid and Oleum Cooling .................................................. 64

6 Equipment Required for Manufacture of Sulfuric Acid,
Oleum, and Liquid SO₃ .............................................................................. 67
  6.1 Equipment and Facilities Required .................................................. 67
  6.2 Plant for Producing the Acid from Sulfide
          Ores – Additional Equipment ........................................ 68
  6.3 Equipment Required for Manufacture of 25% Oleum .......... 69
  6.4 Equipment Required for Manufacture of 65% Oleum .......... 69
  6.5 Equipment Required for Manufacture of Liquid SO₃ .......... 70

7 Materials of Construction of Main Equipments ......................................... 71
Glossary ........................................................................................................ 71
8 Safety Precautions

8.1 Safety Precautions

8.2 Precautions

8.2.1 During Start-Up

8.2.2 During Oil Firing

8.2.3 Sulfur Pit and Sulfur Feeding Section

8.2.4 Air Blower

8.2.5 Hot Gas Filter and Converter System

8.2.6 Sulfuric Acid Towers, APTs, Acid Cooler Areas

8.2.7 Oleum Tower, GHOB, Oleum/Oleum

8.2.8 Main Storage Areas for Sulfuric Acid, Oleum,

8.2.9 Waste Heat Recovery Boilers, Economisers,

8.2.10 Tail Gas Scrubber

8.3 Electrical Equipment

8.3.1 General Precautions

8.4 Safety Interlocks

9 Economic Considerations

9.1 Introduction

9.2 Options Available to Management for Improving

9.2.1 Product Mix

9.2.2 Downstream Products

9.3 Factors Affecting the Efficient Operation of the Plant

9.3.1 Conversion Efficiency

9.3.2 Steam Generation, Internal Consumption,

9.4 Power Consumption

9.5 Instrumentation

9.6 Other Important Factors Affecting Economic Viability

9.6.1 Interest on Capital Employed

9.6.2 Factors Influencing the Cost of Sulfur

9.6.3 Factors Influencing the Cost of Feeding Sulfur

to the Plant

9.6.4 Factors Influencing the Cost of Water Treatment

9.6.5 Cost of Initial Heating of the Plant Prior to Start-Up

9.6.6 Factors Influencing the Cost of Power for Operating

the Plant

9.6.7 Cost of Manpower

9.6.8 Cost of Maintenance

9.6.9 Cost of Effluent Treatment

9.7 Cost of Sale of the Product
10 Future Developments .............................................................................. 97
  10.1 Introduction .................................................................................... 97
    10.1.1 Design for Improved Plant Operation ........................................ 97
    10.1.2 Minimize Breakdowns and Maintenance Costs ......................... 97
    10.1.3 Minimizing Pollution .............................................................. 98
    10.1.4 Use of Cheaper Raw Materials .............................................. 98
    10.1.5 Disposal of Wastes Generated .............................................. 98
    10.1.6 Better Instrumentation ......................................................... 99
    10.1.7 Increased Heat Recovery/Utilization ...................................... 99
    10.1.8 Value Added Downstream Products to Improve Profitability ....... 100

11 Cold Process of Manufacturing Sulfuric Acid and Sulfonating Agents [Patented by Navdeep Enviro and Technical Services (NEAT)] ................................................................................ 103
  11.1 Introduction .................................................................................... 103
  11.2 Production of Liquid Sulfur Dioxide Without Compression or Refrigeration .............................................................................. 103
  11.3 Conversion of Sulfur Dioxide to Sulfur Trioxide .................................. 104
    11.3.1 Conventional Process ....................................................... 104
    11.3.2 Conversion of Sulfur Dioxide to Sulfur Trioxide with Pure Oxygen Using High Pressure Isothermal Catalytic Converter (Fixed or Fluid Bed) ..... 104
  11.4 Conclusion ..................................................................................... 106

12 Storage, Handling, and Properties of Sulfur, Sulfuric Acid, Oleum, and Liquid SO₃ .................................................................................. 107
  12.1 Sulfur .............................................................................................. 107
    12.1.1 Properties of Sulfur .......................................................... 107
    12.1.2 Safety ................................................................................ 110
    12.1.3 Cleaning of Sulfur Tanks.................................................. 110
  12.2 Sulfuric Acid .................................................................................. 111
    12.2.1 Properties of Sulfuric Acid............................................... 111
    12.2.2 Storage and Handling ....................................................... 111
    12.2.3 Pipelines ........................................................................... 112
    12.2.4 Pumps ............................................................................... 112
    12.2.5 Safety................................................................................ 112
  12.3 Oleums ........................................................................................... 113
    12.3.1 Properties of Oleums........................................................ 113
    12.3.2 Storage and Handling ....................................................... 114
    12.3.3 Cleaning of Tanks............................................................. 114
    12.3.4 Pipelines for Oleums......................................................... 115
    12.3.5 Safety................................................................................ 115
A Practical Guide to the Manufacture of Sulfuric Acid, Oleums, and Sulfonating Agents
Ashar, N.G.; Golwalkar, K.R.
2013, XIII, 146 p. 7 illus., 4 illus. in color., Hardcover
ISBN: 978-3-319-02041-9
