Contents

Preface ................................................................. vii

N. Bez and M. Sugimoto
Optimal Constant for a Smoothing Estimate of Critical Index ........ 1

T.B.N. Bui and M. Reissig
The Interplay Between Time-dependent Speed of Propagation and Dissipation in Wave Models ......................... 9

F. Colombini, D. Del Santo, F. Fanelli and G. Métivier
A Note on Complete Hyperbolic Operators with log-Zygmund Coefficients ......................... 47

E. Cordero, F. Nicola and L. Rodino
A Few Remarks on Time-frequency Analysis of Gevrey, Analytic and Ultra-analytic Functions ........................................ 73

S. Coriasco, K. Johansson and J. Toft
Global Wave-front Sets of Intersection and Union Type .............. 91

V. Fischer and M. Ruzhansky
A Pseudo-differential Calculus on Graded Nilpotent Lie Groups ....... 107

G. Garello and A. Morando
$L^p$ Microlocal Properties for Vector Weighted Pseudodifferential Operators with Smooth Symbols ................ 133

D. Grieser and E. Hunsicker
A Parametrix Construction for the Laplacian on Q-rank 1 Locally Symmetric Spaces .............................. 149

N. Habal, W. Rungrottheera and B.-W. Schulze
A Class of Elliptic Operators on a Manifold with Edge and Boundary ........................................ 187
Contents

C. Iwasaki
A Representation of the Fundamental Solution for the Fokker–Planck Equation and Its Application ........................................ 211

B. Kanguzhin and N. Tokmagambetov
The Fourier Transform and Convolutions Generated by a Differential Operator with Boundary Condition on a Segment ................... 235

S. Katayama and H. Kubo
Global Existence for Quadratically Perturbed Massless Dirac Equations Under the Null Condition .................................. 253

M. Lassas and T. Zhou

T. Matsuyama
Perturbed Besov Spaces by a Short-range Type Potential in an Exterior Domain ......................................................... 285

T. Nishitani
On the Cauchy Problem for Hyperbolic Operators with Double Characteristics, a Transition Case ..................................... 311

S.Ya. Serovajsky
Differentiation Functor and Its Application in the Optimization Control Theory ................................................................. 335

K. Shakenov
The Solution of the Initial Mixed Boundary Value Problem for Hyperbolic Equations by Monte Carlo and Probability Difference Methods ................................................................. 349

S. Tikhonov and M. Zeltser
Weak Monotonicity Concept and Its Applications .......................... 357

Y. Wakasugi
Critical Exponent for the Semilinear Wave Equation with Scale Invariant Damping ............................................................ 375

K. Yagdjian
Semilinear Hyperbolic Equations in Curved Spacetime ................. 391
