Part I  Foundations

1 Challenges of Predictable Software Development .................. 3
   1.1 Software Is Getting Complex .......................... 3
   1.2 Software Development Is Getting Complex ............... 4
   1.3 Project Management and Estimation Are Key Success Factors ... 5
   1.4 What is a “Good Estimate”? ............................ 6
   Further Reading ........................................... 7

2 Principles of Effort and Cost Estimation ......................... 11
   2.1 Basic Concepts of Effort Estimation .................... 11
   2.2 Effort Estimation in Context .......................... 18
   2.3 Objectives of Effort Estimation ....................... 27
   2.4 Estimation Life Cycle ................................. 31
   2.5 Basic Components of Project Effort .................... 35
   Further Reading ........................................... 42

3 Common Factors Influencing Software Project Effort .............. 47
   3.1 Context Factors ........................................ 47
   3.2 Scale Factors .......................................... 49
   3.3 Effort Drivers ......................................... 57
   3.4 Selecting Relevant Factors Influencing Effort ............ 68
   3.5 Reducing the Negative Impact of Scale and Effort Drivers ... 71
   Further Reading ........................................... 78

4 Estimation Under Uncertainty ..................................... 81
   4.1 Nature of Estimation Uncertainty ....................... 82
   4.2 Sources of Uncertainty ................................ 84
   4.3 Representing Uncertainty ................................ 87
   4.4 Handling Uncertainty .................................. 92
   4.5 Reducing Uncertainty .................................. 113
   4.6 Uncertainty and Change ................................ 118
   Further Reading ........................................... 122
### 5 Basic Estimation Strategies

- 5.1 Top-Down Estimation Approach ........................................ 125
- 5.2 Bottom-Up Estimation Approach ...................................... 127
- 5.3 Aggregating Component “Bottom” Estimates ..................... 133
- 5.4 Selecting Appropriate Estimation Strategy ....................... 140
- 5.5 Using Multiple Alternative Estimation Methods .................. 143
- 5.6 Combining Alternative Estimates ..................................... 144
- Further Reading ..................................................................... 150

### Part II Selecting an Appropriate Estimation Method

- 6 Classification of Effort Estimation Methods ....................... 155
  - 6.1 Classification of Effort Estimation Methods .................. 155
  - 6.2 Proprietary vs. Nonproprietary Methods ...................... 156
  - 6.3 Data-Driven Methods .................................................. 157
  - 6.4 Expert-Based Methods ................................................. 169
  - 6.5 Hybrid Methods ......................................................... 180
  - 6.6 Fixed-Model vs. Define-Your-Own-Model Estimation ......... 190
  - 6.7 Comparison of Estimation Paradigms ........................... 192
- Further Reading ..................................................................... 206

- 7 Finding the Most Suitable Estimation Method ..................... 209
  - 7.1 Pitfalls of Selecting “the Best” Estimation Method .......... 210
  - 7.2 Criteria for Selecting the Best Estimation Methods .......... 222
  - 7.3 Procedure for Selecting the Best Estimation Method ......... 231
  - 7.4 Example Selection Procedure ....................................... 246
- Further Reading ..................................................................... 259

### Part III Popular Effort Estimation Methods

- 8 Statistical Regression Analysis ........................................ 263
  - 8.1 Principles ................................................................. 263
  - 8.2 Usage Scenarios ........................................................ 270
  - 8.3 Strengths and Weaknesses of Regression ....................... 273
- Further Reading ..................................................................... 275

- 9 Constructive Cost Model—COCOMO ................................. 277
  - 9.1 Principles ................................................................. 278
  - 9.2 Usage Scenarios ........................................................ 286
  - 9.3 Strengths and Weaknesses of COCOMO ....................... 292
- Further Reading ..................................................................... 292

- 10 Classification and Regression Trees ................................. 295
  - 10.1 Principles ............................................................... 295
  - 10.2 Usage Scenarios ........................................................ 296
  - 10.3 Strengths and Weaknesses .......................................... 302
- Further Reading ..................................................................... 304
