<b>1</b>	<b>Introduction and Preliminaries</b>	<b>1</b>
1.1	Hilbert Space Theory—A Quick Overview	1
1.1.1	The Real Numbers—Where it All Begins	2
1.1.2	Linear Spaces	5
1.1.3	Topological Spaces	6
1.1.4	Metric Spaces	6
1.1.5	Normed Spaces and Banach Spaces	6
1.1.6	Topological Groups	7
1.2	Preliminaries	7
1.2.1	Sets	7
1.2.2	Common Sets	7
1.2.3	Relations Between Sets	8
1.2.4	Families of Sets; Union and Intersection	8
1.2.5	Set Difference, Complementation, and De Morgan’s Laws	9
1.2.6	Finite Cartesian Products	9
1.2.7	Functions	10
1.2.8	Arbitrary Cartesian Products	11
1.2.9	Direct and Inverse Images	11
1.2.10	Indicator Functions	12
1.2.11	Cardinality	12
1.2.12	The Cantor-Shröder-Bernstein Theorem	13
1.2.13	Countable Arithmetic	14
1.2.14	Relations	15
1.2.15	Equivalence Relations	15
1.2.16	Ordered Sets	16
1.2.17	Zorn’s Lemma	17
1.2.18	A Typical Application of Zorn’s Lemma	17
1.2.19	The Real Numbers	19
	References	21

<b>2</b>	<b>Linear Spaces</b> . . . . .	23
2.1	Linear Spaces—Elementary Properties and Examples . . . . .	24
2.1.1	Elementary Properties of Linear Spaces . . . . .	25
2.1.2	Examples of Linear Spaces . . . . .	27
2.2	The Dimension of a Linear Space . . . . .	31
2.2.1	Linear Independence, Spanning Sets, and Bases. . . . .	31
2.2.2	Existence of Bases . . . . .	34
2.2.3	Existence of Dimension . . . . .	36
2.3	Linear Operators . . . . .	41
2.3.1	Examples of Linear Operators . . . . .	42
2.3.2	Algebra of Operators . . . . .	43
2.3.3	Isomorphism . . . . .	45
2.4	Subspaces, Products, and Quotients . . . . .	50
2.4.1	Subspaces . . . . .	50
2.4.2	Kernels and Images . . . . .	54
2.4.3	Products and Quotients . . . . .	56
2.4.4	Complementary Subspaces . . . . .	59
2.5	Inner Product Spaces and Normed Spaces. . . . .	62
2.5.1	Inner Product Spaces . . . . .	63
2.5.2	The Cauchy-Schwarz Inequality. . . . .	65
2.5.3	Normed Spaces . . . . .	67
2.5.4	The Family of $\ell_p$ Spaces . . . . .	68
2.5.5	The Family of Pre- $L_p$ Spaces. . . . .	71
	References . . . . .	74
<b>3</b>	<b>Topological Spaces</b> . . . . .	75
3.1	Topology—Definition and Elementary Results. . . . .	76
3.1.1	Definition and Motivation . . . . .	76
3.1.2	More Examples . . . . .	81
3.1.3	Elementary Observations. . . . .	82
3.1.4	Closed Sets . . . . .	84
3.1.5	Bases and Subbases . . . . .	86
3.2	Subspaces, Point-Set Relationships, and Countability Axioms . . . . .	89
3.2.1	Subspaces and Point-Set Relationships . . . . .	89
3.2.2	Sequences and Convergence . . . . .	92
3.2.3	Second Countable and First Countable Spaces. . . . .	94
3.3	Constructing Topologies . . . . .	96
3.3.1	Generating Topologies . . . . .	97
3.3.2	Coproducts, Products, and Quotients . . . . .	99
3.4	Separation and Connectedness . . . . .	102
3.4.1	The Hausdorff Separation Property. . . . .	102
3.4.2	Path-Connected and Connected Spaces . . . . .	103
3.5	Compactness . . . . .	107
	References . . . . .	111

<b>4</b>	<b>Metric Spaces</b>	113
4.1	Metric Spaces—Definition and Examples	114
4.2	Topology and Convergence in a Metric Space	119
4.2.1	The Induced Topology	120
4.2.2	Convergence in Metric Spaces	123
4.3	Non-Expanding Functions and Uniform Continuity	126
4.4	Complete Metric Spaces	130
4.4.1	Complete Metric Spaces	130
4.4.2	Banach’s Fixed-Point Theorem	136
4.4.3	Baire’s Theorem	137
4.4.4	Completion of a Metric Space	139
4.5	Compactness and Boundedness	144
	References	147
<b>5</b>	<b>Normed Spaces</b>	149
5.1	Semi-Norms, Norms, and Banach Spaces	150
5.1.1	Semi-Norms and Norms	150
5.1.2	Banach Spaces	155
5.1.3	Bounded Operators	158
5.1.4	The Open Mapping Theorem	161
5.1.5	Banach Spaces of Linear and Bounded Operators	163
5.2	Fixed-Point Techniques in Banach Spaces	166
5.2.1	Systems of Linear Equations	166
5.2.2	Cauchy’s Problem and the Volterra Equation	168
5.2.3	Fredholm Equations	170
5.3	Inverse Operators	174
5.3.1	Existence of Bounded Inverses	174
5.3.2	Fixed-Point Techniques Revisited	177
5.4	Dual Spaces	183
5.4.1	Linear Functionals and the Riesz Representation Theorem	183
5.4.2	Duals of Classical Spaces	187
5.4.3	The Hahn-Banach Theorem	190
5.5	Unbounded Operators and Locally Convex Spaces	194
5.5.1	Closed Operators	194
5.5.2	Locally Convex Spaces	196
	References	198
<b>6</b>	<b>Topological Groups</b>	199
6.1	Groups and Homomorphisms	200
6.2	Topological Groups and Homomorphism	203
6.3	Topological Subgroups	205
6.4	Quotient Groups	207
6.5	Uniformities	209
	References	213

A Primer on Hilbert Space Theory  
Linear Spaces, Topological Spaces, Metric Spaces,  
Normed Spaces, and Topological Groups

Alabiso, C.; Weiss, I.

2015, XVII, 255 p. 5 illus., Hardcover

ISBN: 978-3-319-03712-7
