Contents

Part I  Techniques and Technologies for Software Engineering Education

E-learning for Employability: A Case Study from a UK Master’s Programme .............................................. 3
Jenny Carter and Ian Pettit

Introducing Natural Language Examples in a Course on Compiler Principles ........................................... 13
Yin Chen

How to Introduce SCRUM into Software Engineering Course ........... 21
Shaomin Zhu

Computational Thinking and Its Impact on Software Engineering Education ........................................ 29
Dechen Zhan, Lanshun Nie and Xiaofei Xu

Electronic Online Marking of Software Assignments ............... 41
Gary Hill and Scott Turner

Learning in the Context of an Ambient Assisted Living Apartment: Including Methods of Serious Gaming ........ 49
Sven Leonhardt, Stephan Kassel, Anne Randow and Tobias Teich

Part II  Software Engineering Education Versus Industry Demand

Encouraging Transformational Learning and Reflective Practice with 2nd Year IT Students Using a Skills Inventory .................. 59
Clive C. H. Rosen
Contents

Social Demand-Oriented Education Model for Software Engineering .............................................. 65
Shu Liu, Lina Zhou, Peijun Ma, Dong Li and Shengchun Deng

Innovation and Practice of Engineering-Typed Talents Training Mode ........................................... 73
Yi Qu, Xue-Qing Li, Ti Zhou and Li-Xin Li

Enterprise Oriented Software Engineering Education: A Framework for Employability ......................... 83
Gianmario Motta, Daniele Sacco and Linlin You

Rethinking the Talents Cultivation Mode of Software Engineering .................................................... 93
Dongming Chen, Zhiliang Zhu and Dongqi Wang

An Initiative to Apply the Concept and Philosophy of Industry-Oriented Higher Education to Technician Level Software Programmes ................................................................. 101
Jenny Munnelly, Sharon Feeney, Bing Wu, Matt Hussey, Tom Duff, Pat O’Neill and Robert Burns

From the Rise of CDIO (Conceive, Design, Implement and Operate) Process and “Modern Apprenticeship” to Exam the Direction of Reforming the Vocational Education in China ............... 109
MinYing Xu

Part III Curricula for Software Engineering Education

To Cultivate Engineering Leadership of Excellent Undergraduate Students in HIT-NPSS ................................. 119
Dong Li, Guo-Xiang Fan, Pei-Jun Ma and Xiao-Fei Xu

The Solutions to Strengthening the Construction of Computer Experimental Teaching Faculty ..................... 125
Chun He, Hang Lei, Qihua Wang and Xinyuan Gong

Concentrating on Innovation Education to Facilitate Engineering Education ........................................... 133
Zufeng Wu, Guobin Zhu, Qihua Wang and Xinyuan Gong
Student-Centered Course Development of Digital Media Technology ........................................ 141
Tonghua Su, Peijun Ma, Shengchun Deng, Dong Li and Hujie Huang

International Master on Manufacturing Service Ecosystem: A Proposal ........................................ 147
David Chen and Jean-Paul Bourrieres

Service Science and Scholarship: Experiences from a Pragmatist Perspective ................................. 153
Gianluigi Viscusi, Marco Cremaschi and Carlo Batini
Software Engineering Education for a Global E-Service Economy
State of the Art, Trends and Developments
Motta, G.; Wu, B. (Eds.)
2014, XV, 162 p. 36 illus., Hardcover
ISBN: 978-3-319-04216-9
