Contents

1 Historical Perspective on the Introduction and Use of Chemotherapy for the Treatment of Osteosarcoma ......................... 1
Norman Jaffe

Part I Novel Therapeutic Targets

2 Wnt Signaling in Osteosarcoma ................................................................. 33
Carol H. Lin, Tao Ji, Cheng-Fong Chen, and Bang H. Hoang

3 Receptor Tyrosine Kinases in Osteosarcoma:
Not Just the Usual Suspects ...................................................................... 47
Ashley N. Rettew, Patrick J. Getty, and Edward M. Greenfield

4 Understanding the Role of Notch in Osteosarcoma ....................... 67
Madonna M. McManus, Kurt R. Weiss, and Dennis P.M. Hughes

5 Developmental Pathways Hijacked by Osteosarcoma ................. 93
Jared R. Mortus, Yi Zhang, and Dennis P. M. Hughes

6 MicroRNAs in Osteosarcomagenesis ................................................. 119
Lisa A. Kafchinski and Kevin B. Jones

7 RECQ DNA Helicases and Osteosarcoma ........................................ 129
Linchao Lu, Weidong Jin, Hao Liu, and Lisa L. Wang

8 Autophagy in Osteosarcoma ............................................................... 147
Janice Santiago O’Farrill and Nancy Gordon

9 HER-2 Involvement in Osteosarcoma ............................................. 161
Jonathan Gill, David Geller, and Richard Gorlick
Part II  Tumor Microenvironment

10 Role of Ezrin in Osteosarcoma Metastasis .................................................. 181
   Ling Ren and Chand Khanna

11 Participation of the Fas/FasL Signaling Pathway
   and the Lung Microenvironment in the Development
   of Osteosarcoma Lung Metastases ......................................................... 203
   Gangxiong Huang, Kazumasa Nishimoto, Yuanzheng Yang,
   and Eugenie S. Kleinerman

Part III  Unique Osteosarcoma Models

12 Zebrafish as a Model for Human Osteosarcoma................................. 221
   A.B. Mohseny and P.C.W. Hogendoorn

13 Using Canine Osteosarcoma as a Model to Assess Efficacy
   of Novel Therapies: Can Old Dogs Teach Us New Tricks? ................... 237
   Carlos O. Rodriguez, Jr.

Part IV  Novel Therapeutic Approaches Based on Biology:
   Tumor Targeted Therapy

14 Oncolytic Viruses for Potential Osteosarcoma Therapy ...................... 259
   Pooja Hingorani, Valerie Sampson, Christina Lettieri,
   and E. Anders Kolb

15 IL-11Rα: A Novel Target for the Treatment of Osteosarcoma .......... 285
   Valerae O. Lewis

16 Bone-Seeking Radiopharmaceuticals as Targeted Agents
   of Osteosarcoma: Samarium-153-EDTMP and Radium-223 ............ 291
   Peter M. Anderson, Vivek Subbiah, and Eric Rohren

Part V  Novel Therapeutic Approaches Based
   on Biology: Immunotherapy

17 Muramyl Tripeptide-Phosphatidyl Ethanolamine Encapsulated
   in Liposomes (L-MTP-PE) in the Treatment of Osteosarcoma ...... 307
   Paul A. Meyers and Alexander J. Chou

18 Genetically Modified T-Cell Therapy for Osteosarcoma.................... 323
   Christopher DeRenzo and Stephen Gottschalk

19 Natural Killer Cells for Osteosarcoma.............................................. 341
   Nidale Tarek and Dean A. Lee

Erratum to ....................................................................................................... E1

Index .................................................................................................................. 355
Current Advances in Osteosarcoma
Kleinerman, E.S. (Ed.)
2014, XII, 359 p. 65 illus., 54 illus. in color., Hardcover
ISBN: 978-3-319-04842-0
