1	The Theory of Elasticity in the 19th Century	1
1.1	Theory of Elasticity and Continuum Mechanics	1
1.1.1	The Classical Molecular Model	3
1.1.1.1	The Components of Stress	7
1.1.1.2	The Component of Strains and the Constitutive Relationships	8
1.1.2	Internal Criticisms Toward the Classical Molecular Model	13
1.1.3	Substitutes for the Classical Molecular Model	17
1.1.3.1	Cauchy's Phenomenological Approach	17
1.1.3.2	Green's Energetic Approach	22
1.1.3.3	Differences in the Theories of Elasticity	24
1.1.4	The Perspective of Crystallography	25
1.1.5	Continuum Mechanics in the Second Half of the 19th Century	31
1.2	Theory of Structures	35
1.2.1	Statically Indeterminate Systems	37
1.2.2	The Method of Forces	39
1.2.3	The Method of Displacements	42
1.2.4	Variational Methods	47
1.2.5	Applications of Variational Methods	50
1.2.5.1	James Clerk Maxwell and the Method of Forces	50
1.2.5.2	James H. Cotterill and the Minimum of Energy Expended in Distorting	54
1.2.6	Perfecting of the Method of Forces	56
1.2.6.1	Lévy's Global Compatibility	56
1.2.6.2	Mohr and the Principle of Virtual Work	59

1.3	The Italian Contribution.	66
1.3.1	First Studies in the Theory of Elasticity.	70
1.3.2	Continuum Mechanics.	71
1.3.3	Mechanics of Structures.	73
	References.	76
2	An Aristocratic Scholar.	83
2.1	Introduction	83
2.2	The Principles of Piola's Mechanics	86
2.3	Papers on Continuum Mechanics	89
2.3.1	1832. <i>La meccanica de' corpi naturalmente estesi trattata col calcolo delle variazioni</i>	93
2.3.2	1836. <i>Nuova analisi per tutte le questioni della meccanica molecolare</i>	100
2.3.3	1848. <i>Intorno alle equazioni fondamentali del movimento di corpi qualsivogliono</i>	104
2.3.4	1856. <i>Di un principio controverso della meccanica analitica di lagrange e delle sue molteplici applicazioni</i>	109
2.3.5	Solidification Principle and Generalised Forces.	109
2.4	Piola's Stress Tensors and Theorem	113
2.4.1	A Modern Interpretation of Piola's Contributions	114
2.4.2	The Piola-Kirchhoff Stress Tensors	116
	References.	119
3	The Mathematicians of the Risorgimento	123
3.1	Enrico Betti	123
3.1.1	The Principles of the Theory of Elasticity	127
3.1.1.1	Infinitesimal Strains	127
3.1.1.2	Potential of the Elastic Forces	129
3.1.1.3	The Principle of Virtual Work.	131
3.1.2	The Reciprocal Work Theorem.	132
3.1.3	Calculation of Displacements	135
3.1.3.1	Unitary Dilatation and Infinitesimal Rotations	135
3.1.3.2	The Displacements.	137
3.1.4	The Saint Venant Problem.	138
3.2	Eugenio Beltrami	141
3.2.1	Non-Euclidean Geometry.	144
3.2.2	Sulle equazioni generali della elasticità	146
3.2.3	Papers on Maxwell's Electro-Magnetic Theory.	149
3.2.4	Compatibility Equations.	153

3.2.5	Beltrami-Michell's Equations	155
3.2.6	Papers on Structural Mechanics	156
3.2.6.1	A Criterion of Failure.	156
3.2.6.2	The Equilibrium of Membranes.	158
3.3	The Pupils	160
3.3.1	The School of Pisa	160
3.3.2	Beltrami's Pupils	168
	References.	174
4	Solving Statically Indeterminate Systems	179
4.1	Scuole d'applicazione per gl'ingegneri.	179
4.1.1	The First Schools of Application for Engineers.	182
4.1.1.1	The School of Application in Turin and the Royal Technical Institute in Milan	182
4.1.1.2	The School of Application in Naples	184
4.1.1.3	The School of Application in Rome.	185
4.1.1.4	Curricula Studiorum.	186
4.2	The Teaching	188
4.3	Luigi Federico Menabrea	191
4.3.1	1858. <i>Nouveau principe sur la distribution des tensions</i>	194
4.3.1.1	Analysis of the Proof.	195
4.3.1.2	Immediate Criticisms to the Paper of 1858	197
4.3.1.3	The Origins of Menabrea's Equation of Elasticity	200
4.3.2	1868. <i>Étude de statique physique</i>	204
4.3.2.1	The 'Inductive' Proof of the Principle	207
4.3.3	1875. <i>Sulla determinazione delle tensioni e delle pressioni ne' sistemi elastici</i>	208
4.3.4	Rombaux' Application of the Principle of Elasticity . .	210
4.3.4.1	<i>Condizioni di stabilità della tettoja della stazione di Arezzo</i>	211
4.3.4.2	The Question About the Priority	213
4.4	Carlo Alberto Castigliano.	214
4.4.1	1873. <i>Intorno ai sistemi elastici</i>	217
4.4.1.1	The Method of Displacements.	217
4.4.1.2	The Minimum of Molecular Work.	218
4.4.1.3	Mixed Structures	220
4.4.1.4	Applications	224

4.4.2	1875. <i>Intorno all'equilibrio dei sistemi elastici</i>	227
4.4.2.1	Mixed Structures	228
4.4.3	1875. <i>Nuova teoria intorno all'equilibrio dei sistemi elastici</i>	229
4.4.3.1	The Theorem of Minimum Work as a Corollary	230
4.4.3.2	Generic Systems	231
4.4.4	1879. <i>Théorie de l'équilibre des systèmes élastiques et ses Applications</i>	233
4.4.4.1	Flexible Systems	236
4.4.4.2	The Constitutive Relationship	237
4.4.4.3	Applications: The Dora Bridge	238
4.4.5	A Missing Concept: The Complementary Elastic Energy	242
4.5	Valentino Cerruti	246
4.5.1	<i>Sistemi elastici articolati</i> . A Summary	247
4.5.1.1	Counting of Equations and Constraints	247
4.5.1.2	Evaluation of External Constraint Reactions. Statically Determinate Systems	249
4.5.1.3	Redundant and Uniform Resistance Trusses	250
4.5.1.4	Final Sections	250
4.5.2	Trusses with Uniform Resistance	252
4.5.3	Statically Indeterminate Trusses	255
4.5.3.1	Poisson's and Lévy's Approaches	255
4.5.3.2	Cerruti's Contribution to Solution of Redundant Trusses.	257
	References.	261
5	Computations by Means of Drawings	267
5.1	Graphical Statics.	267
5.2	Graphical Statics and Vector Calculus	271
5.3	The Contributions of Maxwell and Culmann	273
5.3.1	Reciprocal Figures According to Maxwell	273
5.3.2	Culmann's <i>Graphische Statik</i>	278
5.4	The Contribution of Luigi Cremona	287
5.4.1	The Funicular Polygon and the Polygon of Forces as Reciprocal Figures	289
5.4.1.1	The Funicular Polygon and the Polygon of Forces	289
5.4.1.2	The Null Polarity.	294
5.4.1.3	Reciprocity	296
5.4.1.4	Cremona's Diagram	298

5.4.2	The Lectures on Graphical Statics	302
5.4.3	Cremona’s Inheritance	305
5.4.3.1	Carlo Saviotti	305
5.4.3.2	The Overcoming of the Maestro	312
	References.	314
	Appendix A: Quotations	317
A.1	Quotations of Chap. 1	317
A.2	Quotations of Chap. 2	332
A.3	Quotations of Chap. 3	342
A.4	Quotations of Chap. 4	354
A.5	Quotations of Chap. 5	375
	Index	389

Strength of Materials and Theory of Elasticity in 19th
Century Italy

A Brief Account of the History of Mechanics of Solids
and Structures

Capecchi, D.; Ruta, G.

2015, XIII, 393 p. 49 illus., Hardcover

ISBN: 978-3-319-05523-7
