5 Project Development
Chapter Objectives
The Engineering Design Process
The NASA Design Approach
Design Verification and Validation
Design Verification Plan
DRIDS-V Design Approach and Plan

6 Innovative Capstone Project Examples
Chapter Objectives
Product or System Lifecycle
Common Capstone Team Issues
Capstone Project Examples
- Web-Based Game
- Town Intranet Portal
- International Student Transition System
- Hot Water Heater Information Tool
- Biometric Signature Information for a State Medical Facility
- Emergency Operations Center (EOC) Design
- Parking Solutions
- Phone-2-Phone (P-2-P) Translator Application for a Smart Phone
- Chimney Sweep
- Green Fertilizer
- Rainwater Harvesting System Project
- Helmet Integrated Impact Detection System
- Fitness Monitoring Device with Smartphone Application and Conventional Bluetooth
- Voice-Controlled Wheelchair
- Snow Melt Mat
### Contents

The Elements of a Successful Project ........................................................... 109

**7 Intellectual Property** ............................................................................. 113

Chapter Objectives ..................................................................................... 113

Patent Search ............................................................................................... 115

Example Patent Search ............................................................................. 116

Types of Patents .......................................................................................... 121

**8 Epilogue** .................................................................................................. 123

A Fable ......................................................................................................... 124

A Perspective ............................................................................................... 124

Appendix: Failure Mode and Effects Analysis (FMEA) and House of Quality ................................................................. 127

References .................................................................................................. 139

Index ............................................................................................................ 143
The Engineering Capstone Course
Fundamentals for Students and Instructors
Hoffman, H.F.
2014, XXVIII, 144 p. 12 illus., 7 illus. in color., Hardcover
ISBN: 978-3-319-05896-2
