Part I Games for Semantics Acquisition

2 State-of-the-Art: Semantics Acquisition and Crowdsourcing .... 9
   2.1 Semantics: Forms and Standards ................ 9
   2.2 Semantics in Use ................................ 10
       2.2.1 Query-Based Search ....................... 11
       2.2.2 Exploratory Search ....................... 12
       2.2.3 Creation is the Harder Part. ............... 13
   2.3 Manual (Expert-Based) Approaches ................ 13
   2.4 Automated Approaches ........................... 15
       2.4.1 Entity Recognition, Instance Population .... 16
       2.4.2 Relationship Discovery and Naming ........ 17
       2.4.3 Automated Multimedia Description Acquisition 18
   2.5 Crowdsourcing .................................. 20
       2.5.1 Crowdsourcing Classifications .............. 21
       2.5.2 Mechanical Turk. .......................... 23
       2.5.3 Delicious .................................. 24
       2.5.4 Wikipedia and DBpedia ..................... 25
       2.5.5 Duolingo: A “Gamified” Crowdsourcing .... 26
       2.5.6 Crowdsourcing Games ....................... 27
   2.6 Discussion .................................... 27
   References ....................................... 29

3 State-of-the-Art: Semantics Acquisition Games .................. 35
   3.1 Image Description Games ........................ 38
   3.2 Audio Track Semantics Acquisition Games ........ 39
   3.3 Text Annotation Games ......................... 41
3.4 Domain Modeling Games
3.4.1 Verbosity
3.4.2 GuessWhat!?
3.4.3 OnToGalaxy
3.4.4 Connecting the Ontologies: SpotTheLink
3.4.5 Categorilla, Categodzilla and Free Association
3.4.6 Akinator
3.5 Discussion
References

4 Little Search Game: Lightweight Domain Modeling
4.1 Little Search Game: Player Perspective
4.2 Term Relationship Inference
4.3 Little Search Game Evaluation
4.3.1 Game Deployment
4.3.2 Term Network Soundness
4.3.3 Ability to Retrieve “Hidden” Relationships
4.3.4 Network Relationship Types
4.4 The TermBlaster
4.4.1 TermBlaster Description
4.4.2 TermBlaster Validation
4.5 Discussion
References

5 PexAce: A Method for Image Metadata Acquisition
5.1 Description of PexAce
5.1.1 Image Tag Extraction
5.2 Deployment and Tag Correctness in General Domain
5.2.1 Game Deployment: Experimental Dataset Acquisition
5.2.2 Experiment: Validation of Annotation Capabilities
5.3 PexAce Personal: Personal Imagery Metadata
5.4 PexAce Personal: Evaluation
5.5 Discussion
References

6 CityLights: A Method for Music Metadata Validation
6.1 CityLights: Method Overview
6.1.1 A Music Question Example
6.1.2 Validating Individual Tags
6.1.3 More on the Game’s Features
6.1.4 Realization of the CityLights
6.2 Experiments: Evaluation of the Metadata Validation Ability
6.3 Discussion
References
# Part II Designing the Semantics Acquisition Games

7 State-of-the-Art: Design of the Semantics Acquisition Games

7.1 Missing Methodology

7.1.1 Game Cloning and Casual Playing

7.1.2 Von Ahn’s Approach

7.1.3 Mechanics, Dynamics and Aesthetics

7.1.4 Design Lenses

7.2 Aspects of SAG Design

7.2.1 Validation of Player Output (Artifacts)

7.2.2 Problem Decomposition and Task Difficulty

7.2.3 Task Distribution and Player Competences

7.2.4 Player Challenges

7.2.5 Purpose Encapsulation

7.2.6 Cheating and Dishonest Player Behavior

7.3 Evaluation of SAGs: Attention, Retention and Throughput

7.4 SAG Design at a Glance: Discussion

References

8 Our SAGs: Design Aspects and Improvements

8.1 Little Search Game

8.1.1 Player Motivation, Ladder System

8.1.2 Cheating Vulnerability and a Posteriori Cheating Detection

8.1.3 Evaluating the Appeal to the Player

8.2 PexAce

8.2.1 Helper Artifacts: A Novel Approach for Artifact Validation

8.2.2 Apparent Purpose and Motivation to Play PexAce

8.2.3 Player Competences

8.2.4 Cheating Vulnerability

8.3 CityLights

8.3.1 Validation Games

8.3.2 Game Aesthetics in CityLights

8.3.3 Player Competences Expressed Through Confidence
