## Contents

**Part I  Gravity and Prague**

**Kepler and Mach’s Principle** .................................................. 3  
Julian Barbour

**Einstein in Prague: Relativity Then and Now** ............................ 33  
Jiří Bičák

**Part II  Classical General Relativity**

**Observers, Observables and Measurements in General Relativity**  .................. 67  
Donato Bini

**Some Links Between General Relativity and Other Parts of Physics**  .................. 91  
Gary W. Gibbons

**The General Relativistic Two Body Problem and the Effective One Body Formalism**  .......... 111  
Thibault Damour

**Gravitational Self-Force: Orbital Mechanics Beyond Geodesic Motion**  .................. 147  
Leor Barack

**Hamiltonian Formalism for Spinning Black Holes in General Relativity**  .................. 169  
Gerhard Schäfer

**Stability of Marginally Outer Trapped Surfaces and Geometric Inequalities**  .................. 191  
Marc Mars
Stationary Black-Hole Binaries: A Non-existence Proof .......................... 209
Gernot Neugebauer and Jörg Hennig

Dynamic and Thermodynamic Stability of Black Holes and Black Branes .......................................................... 229
Robert M. Wald

Instability of Anti-de Sitter Spacetime ........................................ 239
Piotr Bizoń and Andrzej Rostworowski

Higher-Dimensional Black Holes .............................................. 245
Harvey S. Reall

Black Holes, Hidden Symmetry and Complete Integrability:
Brief Review ........................................................................ 261
Valeri P. Frolov

Part III Cosmology and Quantum Gravity

Cosmological Models and Stability ........................................ 277
Lars Andersson

Inflation and Birth of Cosmological Perturbations ...................... 305
Misao Sasaki

Loop Quantum Gravity and the Planck Regime of Cosmology ...... 323
Abhay Ashtekar

The Inflationary Origin of the Seeds of Cosmic Structure:
Quantum Theory and the Need for Novel Physics ..................... 349
Daniel Sudarsky

Quantum Gravity: The View From Particle Physics .................... 369
Hermann Nicolai

Part IV Numerical Relativity and Relativistic Astrophysics

Three Little Pieces for Computer and Relativity ....................... 391
Luciano Rezzolla

Instabilities of Relativistic Stars ............................................. 427
John L. Friedman and Nikolaos Stergioulas
Contents

Gravity Talks: Observing the Universe with Gravitational Waves . . . 459
Bernard F. Schutz

LISA in 2012 and Beyond: 20 Years After the First Proposal . . . . . . . 477
Gerhard Heinzel and Karsten Danzmann

Einstein’s Gravity as Seen by a Cosmic Lighthouse Keeper . . . . . . 483
Michael Kramer

The Astrophysical Signatures of Black Holes: The Horizon, The ISCO, The Ergosphere and The Light Circle . . . . . . . . . . . . . . . . 501
Marek A. Abramowicz

Energy Extraction from Spinning Black Holes Via Relativistic Jets . . 523
Ramesh Narayan, Jeffrey E. McClintock and Alexander Tchekhovskoy
General Relativity, Cosmology and Astrophysics
Perspectives 100 years after Einstein's stay in Prague
Bičák, J.; Ledvinka, T. (Eds.)
2014, XV, 535 p. 117 illus., 80 illus. in color., Hardcover
ISBN: 978-3-319-06348-5
