# Contents

1  “The Reacting Atmosphere”: A Systemic Approach to Atmospheric Research ............................... 1
   Ralf Koppmann

2  Interdependencies of Atmospheric Processes ................. 11
   Peter Wiesen

3  Physical and Chemical Processes in the Upper Troposphere and Lower Stratosphere ............................... 19
   Martin Riese

4  Modelling and Numerical Simulation .......................... 27
   Matthias Ehrhardt, Michael Günther and Birgit Jacob

5  Sustainable Strategies .................................. 35
   Manfred Fischedick

6  Cross Sectional Processes and Development .................. 47
   Brigitte Halbfas and Christine Volkmann

7  Connecting the Research Network to the Wider Public ........ 51
   Ralf Koppmann and Peter Wiesen
Atmospheric Research From Different Perspectives
Bridging the Gap Between Natural and Social Sciences
Koppmann, R. (Ed.)
2014, VII, 57 p. 15 illus., 14 illus. in color., Softcover
ISBN: 978-3-319-06494-9
