Contents

Part I  Theoretical Lenses in Affect Research

Towards a Participatory Approach to ‘Beliefs’ in Mathematics Education ................................................................. 3
Jeppe Skott

Luis Radford

The Construct of Attitude in Mathematics Education ................................. 51
Pietro Di Martino and Rosetta Zan

Networking Theories to Understand Beliefs and Their Crucial Role in Mathematics Education ........................................... 73
Katrin Rolka and Bettina Roesken-Winter

Developments in Mathematics Teachers’ Efficacy Beliefs ......................... 95
George N. Philippou and Marilena Pantziara

Reaction to Section 1: Faith, Hope and Charity: Theoretical Lenses on Affect ............................................................... 119
David Clarke

Part II  Relevance in the Field – Affective Systems of Individuals and ‘Collectives’

Students’ Non-realistic Mathematical Modeling as a Drawback of Teachers’ Beliefs About and Approaches to Word Problem Solving ................................................................. 137
Fien Depaepe, Erik De Corte, and Lieven Verschaffel
Students’ Attitudes Towards Mathematics Across Lower Secondary Schools in Shanghai ......................................................... 157
Liping Ding, Birgit Pepin, and Keith Jones

Domain-Specific Belief Systems of Secondary Mathematics Teachers .................................................................................... 179
Andreas Eichler and Ralf Erens

Meta-emotion and Mathematical Modeling Processes in Computerized Environments ............................................................ 201
Inés Mª Gómez-Chacón

Effects of Motivation on the Belief Systems of Future Mathematics Teachers from a Comparative Perspective ...................... 227
Sigrid Blömeke and Gabriele Kaiser

Affect and Gender ........................................................................................... 245
Helen Forgasz, Gilah Leder, David Mittelberg, Hazel Tan, and Adelino Murimo

Reaction to Section 2: The Relevance of Affective Systems and Social Factors: A Commentary ........................................ 269
Markku S. Hannula

Part III  Methodological Issues in Affect Research

Analyzing Data and Drawing Conclusion on Teachers’ Beliefs .................. 281
Qian Chen and Frederick Koon Shing Leung

PCK and the Awareness of Affective Aspects Reflected in Teachers’ Views About Learning Opportunities – A Conflict? ........................................................................... 295
Sebastian Kuntze and Anika Dreher

Preschool Teachers’ Knowledge and Self-Efficacy Needed for Teaching Geometry: Are They Related? ................................. 319
Pessia Tsamir, Dina Tirosh, Esther Levenson, Michal Tabach, and Ruthi Barkai

A Specific Language Towards a New Conceptual Framework for Networking Methodologies in the Field of Affect ......................... 339
Chiara Andrà

Studying the Factorial Structure of Ghanaian Twelfth-Grade Students’ Views on Mathematics .................................................. 355
Emmanuel Adu-tutu Bofah and Markku S. Hannula
Reaction to Section 3: Some Methodological Reflections on Studies of Mathematical Affect
Kenneth Ruthven

What Counts, When? – Reflections on Beliefs, Affect, Attitude, Orientations, Habits of Mind, Grain Size, Time Scale, Context, Theory, and Method
Alan H. Schoenfeld

Index
From beliefs to dynamic affect systems in mathematics education
Exploring a mosaic of relationships and interactions
Pepin, B.: Roesken-Winter, B. (Eds.)
2015, XIX, 407 p. 47 illus., Hardcover
ISBN: 978-3-319-06807-7
