## Contents

1 Introduction ........................................ 1
   1.1 Magnetism in Nanoparticles ....................... 1
   1.2 Characterization of Magnetic Nanoparticles ........ 4
   1.3 What We Cover in This Thesis ...................... 6
   1.4 Outline ...................................... 9
   References ..................................... 10

2 Experimental Techniques ............................... 13
   2.1 Transmission Electron Microscopy .................. 13
      2.1.1 JEOL JEM 3,000 F .......................... 14
      2.1.2 FEI Tecnai\textsuperscript{TM} G2 F30 STWIN .......... 15
   2.2 SQUID Based Magnetometry ........................ 15
   2.3 Anomalous Hall Effect ............................ 17
   2.4 X-ray Absorption Spectroscopies in Synchrotron
       Radiation Facilities ......................... 18
      2.4.1 X-ray Absorption Fine Structure .............. 21
      2.4.2 X-ray Magnetic Circular Dichroism ............ 25
   References ..................................... 29

3 Structural and Magnetic Properties of Amorphous
   Co–W Alloyed Nanoparticles .......................... 31
   3.1 Samples Studied .................................. 32
   3.2 Morphological and Structural Study ............... 34
      3.2.1 Microscopy Measurements ..................... 34
      3.2.2 XANES and EXAFS Measurements ............... 39
   3.3 Magnetic Study .................................. 49
      3.3.1 SQUID-Based Magnetometry ................... 49
      3.3.2 Magnetic Anisotropy of the Co–W Particles .... 55
      3.3.3 X-ray Magnetic Circular Dichroism Magnetometry. 56
### 3.4 Discussion

- Page: 59

### 3.5 Conclusions

- Page: 64

### References

- Page: 64

### 4 Breakdown of Hund’s Third Rule in Amorphous Co–W Alloy Nanoparticles

#### 4.1 XANES and XMCD Measurements

- Page: 68
  - 4.1.1 Co K Edge Results
  - Page: 69
  - 4.1.2 W L_{2,3} Edges Results
  - Page: 71

#### 4.2 Calculations of DOS, XANES and XMCD

- Page: 74
  - 4.2.1 DOS Calculations
  - Page: 75
  - 4.2.2 Co K Edge
  - Page: 76
  - 4.2.3 W L_{2,3} Edges
  - Page: 77

#### 4.3 Discussion

- Page: 78

#### 4.4 Conclusion

- Page: 80

### References

- Page: 80

### 5 Structural and Magnetic Properties of Co–Pt Nanoparticles

#### 5.1 Samples Studied

- Page: 84

#### 5.2 Morphological and Structural Study

- Page: 84
  - 5.2.1 Microscopy Measurements
  - Page: 84
  - 5.2.2 XANES and EXAFS Measurements
  - Page: 86

#### 5.3 Magnetic Study

- Page: 93
  - 5.3.1 SQUID-Based Magnetometry
  - Page: 93
  - 5.3.2 Anomalous Hall Effect Magnetometry
  - Page: 99
  - 5.3.3 X-ray Magnetic Circular Dichroism Magnetometry
  - Page: 101

#### 5.4 Discussion

- Page: 108

#### 5.5 Conclusions

- Page: 111

### References

- Page: 112

### 6 d-Band Magnetism of Ag, Au, Pd and Pt Nanostructured Materials

#### 6.1 Magnetism in Bulk Metals

- Page: 115

#### 6.2 Induced Magnetism in Nanoparticle Matrix

- Page: 117

#### 6.3 Intrinsic Magnetic Moment in M Nanoparticles

- Page: 118

#### 6.4 Conclusions

- Page: 123

### References

- Page: 124

### 7 Transverse Susceptibility Measurement System for the PPMS

#### 7.1 Theoretical Model of the Magnetic Transverse Susceptibility

- Page: 127

#### 7.2 Description of the TS Measurement System

- Page: 128

#### 7.3 Design and Implementation of the Oscillator Circuit

- Page: 130

#### 7.4 Data Acquisition

- Page: 132
