Contents

1 Introduction ........................................ 1
  1.1 Fluid Flow and Heat Transfer Modeling .......... 5
  1.2 Geometry and Performance Optimization ........ 5
  1.3 Exergy Versus Energy Analysis .................. 6
  1.4 Entransy Extremum Theory ...................... 8
References ........................................... 9

2 Fundamentals of Entransy and Entransy Dissipation Theory .... 11
  2.1 The Definition of Entransy and Entransy Dissipation .... 13
  2.2 Entransy Analysis in Conduction Heat Transfer .... 17
  2.3 Equivalent of Thermal Resistance in Heat Convection and Entransy Dissipation ............... 18
  2.4 Conclusions .................................... 19
References ........................................... 19

3 Application of Entransy Theory in Thermal Storage System .... 21
  3.1 Different Types of Performance Evaluation Coefficients: Efficiency and Effectiveness .. 23
  3.2 Exergy Analysis ................................ 24
  3.3 Velocity and Temperature Gradient Fields’ (Coordination) Synergy ......................... 25
  3.4 Modeling ....................................... 28
  3.5 Applications to Thermal Energy Storage of Phase Change Materials ................................ 28
    3.5.1 Assumptions ................................ 29
    3.5.2 Heat Transfer Fluid Domain Dimensions .... 30
    3.5.3 Boundary Conditions and HTF Thermophysical Properties ................................ 32
    3.5.4 Test Cases and the Results: Group I .......... 32
    3.5.5 Test Cases and the Results: Group II .......... 36
  3.6 Concluding Remarks ................................ 39
References ........................................... 39
4 Application of Entransy Theory in Absorption Refrigeration System

4.1 Thermodynamic Analysis of NH₃–NaSCN Absorption System
   4.1.1 Fluid Properties
   4.1.2 System Description and Analysis
   4.1.3 Performance Simulation of NH₃–NaSCN Absorption System

4.2 Results and Discussion

4.3 Concluding Remarks
