## Part I  Nature and Human Economics

1  Technology, Business and Nature: An Economic Primer on Winners and Losers ................................................................. 3  
   References ...................................................................................... 5  

2  Women, Wall Street and Mitigating Climate Change:  
The Critical Importance of WOCAN ............................................. 7  
   References ...................................................................................... 11  

3  The New Business of Business: Evolution of Culture and The  
   Survival of Humankind .................................................................. 13  
   Avoiding “Catastrophic Bifurcation” .............................................. 14  
   The Compelling Role of Consciousness ....................................... 15  
   Purposeful Survival ....................................................................... 16  
   Business People and the Chances of Human Survival ............. 17  
   Reference ...................................................................................... 18  

4  Wall Street After Rio: A Discussion with Calvert  
   Investments’ Senior Sustainability Research Analyst,  
   Ms. Ellen Kennedy ....................................................................... 19  
   References ...................................................................................... 24  

5  Investing in the End Game? An EarthDay Post-Mortem .......... 25  
   Food, Sex and Water ..................................................................... 25  
   New Asset Classes ......................................................................... 26  
   The Tragedy of the Commons ...................................................... 26  
   A Mouthful of Complexities ......................................................... 28  
   Beautiful, But Sluggishly Green .................................................. 29  
   Biological Economics .................................................................... 30  
   References ...................................................................................... 30  

xiii
6 Just When You Thought You Could Bank on it ........................................ 33
   When Extinction Starts to Draw a Yawn ........................................... 33
   The Population Explosion .................................................................. 34
   Ecology and Economics ...................................................................... 35
   The Value of a Person ......................................................................... 35
   But They’re Celebrating in Greenland .............................................. 35
   References ........................................................................................... 36

Part II The Carbon-Negative Ideal

7 SuperGrid: A Discussion with Energy Expert Roy Morrison ............ 39
   References ............................................................................................ 43

8 Ecuador’s Imperiled Paradise—One of the World’s Most Important, If Least Known Battles: A Conversation with Dr. Ivonne Baki ......................................................... 45
   References ............................................................................................ 49

9 Native Americans Get Seat at Climate Table .................................. 51
   References ............................................................................................ 53

10 Climate Shock: UC-Berkeley Scientist, Dr. John Harte, Puts the World on Notice ................................................................. 55
   A Feedback Fiasco ................................................................................ 55
   A Guarantee of Future Shock? ............................................................ 57
   The Statistics of Stress ....................................................................... 58
   Après moi, le déluge! ............................................................................ 58
   The Loss of Biodiversity .................................................................... 59
   Do the Math .......................................................................................... 60
   Can We Stop It? ................................................................................... 61
   References ............................................................................................ 61

Part III Human Health and a Living Earth

11 Occupy Your Diet: A Discussion About Food, Health and Kindness with Dr. Neal Barnard ................................................................. 65
   References ............................................................................................ 71

12 Eating You Alive: Environmental Cancer ....................................... 73
   The Toxic Landscape ........................................................................... 73
   Food Uncertainties .............................................................................. 73
   I’ve Got Cancer: What Should I Eat? ................................................ 74
   A Day at UCLA Medical School ........................................................ 74
