## Contents

1 **A Fuzzy Public Choice Model** ............................................. 1
   1.1 Improving the Prediction of Public Choice Models:
       A Fuzzy Approach ....................................................... 1
   1.2 Sets ................................................................................. 4
   1.3 Fuzzy Sets ................................................................. 5
   1.4 Fuzzy Maximal Sets .................................................... 7
   References ........................................................................... 11

2 **Fuzzy Preferences: Extraction from Data and Their Use**
   in Public Choice Models ...................................................... 13
   2.1 Introduction ................................................................. 13
   2.2 Extracting Preference Measures from Empirical Data .......... 14
       2.2.1 Extracting Preferences from the CMP Data .............. 16
       2.2.2 A Method for Extracting Fuzzy Preference Profiles
             from CMP Data ......................................................... 20
   2.3 The Conventional Public Choice Model ............................ 22
   2.4 A Fuzzy Public Choice Model ......................................... 27
   2.5 Advantages of the Fuzzy Public Choice Model ................. 30
   References ........................................................................... 31

3 **Fuzzy Single-Dimensional Public Choice Models** ................. 33
   3.1 Intransitivity in Collective Preference ............................. 33
   3.2 Fuzzy Aggregation Preference Rules ............................... 34
   3.3 Fuzzy Voting Rules ....................................................... 39
   3.4 Single-Peaked Fuzzy Profiles ......................................... 45
   References ........................................................................... 50

4 **Predicting the Outcome of the Government Formation Process:**
   **Fuzzy Single-Dimensional Models** .................................... 51
   4.1 An Overview of the Comparative Manifesto Project Data .... 51
   4.2 Traditional Models of Government Formation ................. 56
4.3 A Fuzzy Model of Government Formation
4.3.1 A Fuzzy Maximal Set Approach in One-Dimensional Models
4.3.2 A Fuzzy Pareto Set Approach in One-Dimensional Model
4.4 Demonstrating the Two Fuzzy Modeling Approaches
4.5 Comparing the Fuzzy and Conventional Models of Government Formation
4.6 Results
4.7 Conclusions

5 Issues in Fuzzy Multi-dimensional Public Choice Models
5.1 Stability in Multi-dimensional Models
5.2 Majority Rule Maximal Sets
5.3 The Existence of a Majority Rule Maximal Set in Arbitrary $n$-Dimensional Public Choice Models
5.4 Relation Spaces and Majority Rule
5.5 A Consideration of Different Definitions of Fuzzy Covering Relations
  5.5.1 Covering Relations and Minimal Generating Sets
  5.5.2 Covering Relation $C_4$ with $n \geq 3$
  5.5.3 Covering Relation $C_2$
  5.5.4 $C_2$-Uncovered Set
  5.5.5 Covering Relation $C_7$
  5.5.6 A Symmetrical Covering Relation
  5.5.7 The Implication of Missing $n$-Tuples
5.6 A Symmetrical Covering Relation
5.7 The Implication of Missing $n$-Tuples

6 Predicting the Outcome of the Government Formation Process:
A Fuzzy Two-Dimensional Public Choice Model
6.1 A Two-Dimensional Fuzzy Model
6.2 A Fuzzy Model of Government Formation
6.3 Fuzzifying the CMP
6.4 Empirical Performance of the Fuzzy Model
6.5 Conclusions and Implications
6.6 Conclusions and Implications

7 The Beginnings of a Weighted Model and New Frontiers
7.1 A Weighted Fuzzy Government Formation Model
7.2 A Comparison of Models
Fuzzy Social Choice Models
Explaining the Government Formation Process
C. Casey, P.; B. Gibilsco, M.; A. Goodman, C.; Pook, K.N.;
N. Mordeson, J.; J. Wierman, M.; D. Clark, T.
2014, XIII, 183 p. 29 illus., Hardcover
