## Contents

1 **Hydrogen Bonds of Hydrides and Specific Interactions of Alkyl Compounds of Main Group Elements** ............................................. 1
  1.1 Hydrogen Bond Energies of Main Group Element Hydrides ....... 1
  1.2 Specific Interactions of Alkyls of Zinc Subgroup Elements .......... 6
    1.2.1 Zinc Alkyls ............................................ 6
    1.2.2 Alkyls of Cadmium and Mercury .......................... 10
  1.3 Specific Interactions of Alkyls of Boron Subgroup Elements ...... 13
  1.4 Specific Intermolecular Interactions of Alkyls of the Nitrogen Subgroup Elements .................................................. 21
    1.4.1 Specific Interactions of Trialkyls and Trivinyls ............... 21
    1.4.2 Alkyl Hydrogens and Alkene Hydrogens of the Phosphorus Subgroup Elements .................................................. 27
  1.5 Energies of Specific Interactions of Selenium and Tellurium Alkyls and Their Unsaturated Analogs ................................. 31
    1.5.1 Selenium and Tellurium Alkyls ................................ 31
    1.5.2 Dialkenes of Selenium and Tellurium ........................... 36
    1.5.3 Energies of Specific Interactions of Phenyl Selenides and Diphenylmercury .................................................. 38
    1.5.4 Energies of Specific Interactions of (Dimethyl-amino)methylnitarsine, Dimethylstibineborane, and Dimethyl(methylthio)borane .................................................. 43

References ................................................................................. 46

2 **Specific Intermolecular Interactions of Silanes and Their Derivatives** ................................................................. 49
  2.1 Types of Specific Interactions of Silanes and Compounds with a Tetrahedral Molecular Structure ..................................... 49
    2.1.1 Silanes \(n = 4 + 9\) and Compounds with a Tetrahedral Molecular Structure .................................................. 49
    2.1.2 Energies of Specific Interactions of Liquid Trialkylsilanes, Ethyldialkylsilanes, and Methyldialkylsilanes .................. 57
2.1.3 Energies of Specific Interactions of Liquid Dimethylalkylsilanes, Diethylalkylsilanes, Propylbutyldisilanes, and Vinylmethylsilane .............................. 68

2.2 Energies of Specific Interactions of Trisilyls of Nitrogen Main Group Elements and Disilazanes ........................................ 73

2.3 Energies of Specific Interactions of Silanamines ........................................ 76

2.4 Energies of Specific Interactions of Silanetriamine and Disilanylamine ........................................ 81

2.5 Energies of Specific Interactions of Alkyldisilanes, Alkyldisilanylamines, and Alkyldisilanamine ...................... 84

2.6 Energies of Specific Interactions of Silacyclobutanes and 1,1-Dimethylsilacyclopentane ........................................ 89

2.7 Energies of Specific Interactions of Oxygengenated Silanes ........................................ 93

2.7.1 Bis(Disilanylen)ether, Trimethylsilanol, and Methoxysilane ........................................ 93

2.7.2 Methoxy-, Ethoxy-, Propoxy-, and Butoxysilanes and Silylecylacetylene ........................................ 96

2.7.3 Phenoxytrimethylsilanes and (Methoxyphenyl)trimethylsilanes ........................................ 101

2.7.4 Trimethoxy[(methylthio)alkyl]silanes, [(Ethylthio)alkyl] trimethoxysilanes, and Triethoxy[(ethylthio)alkyl]silane ........................................ 106

2.7.5 1,3,7,5,4-Pentamethyldisiloxane and Decamethyldisiloxane ........................................ 110

2.7.6 Energies of Specific Interactions of Methylidiphenylsilanes ........................................ 111

References ................................................................................................................... 117

3 Specific Interactions of Elementorganic Compounds of Germanium Subgroup Elements ........................................ 119

3.1 Specific Interactions of Germanium Organic Compounds and Their Energies ........................................ 119

3.1.1 Energies of Specific Interactions of Compounds of Germanium with Alkyl Ligands ........................................ 119

3.1.2 Energies of Hydrogen Bonds and Specific Interactions of Methylgermanium and Dimethylgermane ........................................ 120

3.1.3 Energies of Hydrogen Bonds and Specific Interactions of Germanium Alkyl Compounds with Metal–Meta Bonds ........................................ 123

3.1.4 Energies of Specific Interactions of Triethyl(diethylamino) germane ........................................ 128

3.1.5 Energies of Specific Interactions of Methoxygermane, Ethoxygermane, Methylthiogermane, and Hexamethyldigermoxane ........................................ 129

3.2 Energies of Specific Interactions of Tetraalkyltins and Tetramethyllead ........................................ 133

3.3 Energies of Specific Interactions of Tetraphenyl and Hexaphenyl Silicon Subgroup Elements ........................................ 136

References ................................................................................................................... 140
# Specific Intermolecular Interactions of Sulfonated Organic Compounds

## 4.1 Energies of Specific Interactions of Sulfides and Disulfides

<table>
<thead>
<tr>
<th>Subsection</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1.1</td>
<td>Symmetrical Sulfides with Normal Molecular Structure and Isostructural Methyl Groups</td>
</tr>
<tr>
<td>4.1.2</td>
<td>Asymmetrical Sulfides of Methyl-R with Normal Structure and Isostructural Methyl Group</td>
</tr>
<tr>
<td>4.1.3</td>
<td>Asymmetrical Sulfides of Ethyl-R with Normal Structure and Isostructural Methyl Group</td>
</tr>

5 Specific Intermolecular Interactions of Sulfur, Oxygen, and Nitrogenated Organic Compounds .......................... 217

5.1 Specific Interactions of Sulfur and Oxygenated Organic Compounds .............................................. 217
5.1.1 Carbonyl Sulfide, Carbon Disulfide, Dimethylsulfoxide, Divinylsulfide, and Diacetylsulfide BY-Oxythiane .... 217
5.1.2 1-(Methylthio)-2-(Vinloxy)ethane, Thioacetyl Acid, and Acetic Acid ........................................... 221
5.1.3 Alkyl Thiolactates ........................................... 226
5.1.4 BY-Oxythiane and Thiopirans ........................................... 227
5.1.5 1,3-Dithiol-2-one, 1,3-Dithiole-2-thione, and 1,3-Dithiolan-2-one ........................................... 229

5.2 Energies of the Specific Interactions of Sulfones . . . . . . . . . . . . . . . . . . . . . . . . . . 232
5.2.1 Alkyl Sulfones and Divinylsulfone ........................................... 232
5.2.2 Tetrahydrothiophene-1,1-dioxide(sulfolane), Thiete sulfone (2H-thiete)-1,1-dioxide, and 2.5-Dihydro-2-methylthiophene-1,1-dioxide ........................................... 235
5.2.3 Methylbenzylsulfone and Phenyl Sulfones with Unsaturated Ligands ........................................... 239
5.2.4 Methyl-p-tolyl Sulfone and p-Tolyl Sulfone with Unsaturated Ligands ........................................... 242
5.2.5 Diphenyl Sulfone, Dibenzyl Sulfone, and Di-p-tolyl Sulfone ........................................... 245
5.2.6 2-Thiophene Carboxylic Acid ........................................... 249

5.3 Specific Intermolecular Interactions of Sulfur and Nitrogenated Organic Compounds ........................................... 249
5.3.1 Thiocyanate, Isothiocyanates, and Phenyl Isothiocyanate ........................................... 249
5.3.2 Sulfur Diimide, Thioacetamide, and Its Derivatives ........................................... 253
5.3.3 Thiobenzamide and Its Derivatives ........................................... 257
5.3.4 2,3,4,5-Tetrahydro-(methylthio)pyridine and 4-(Methylthio)pyridine ........................................... 259
5.3.5 Specific Interactions of Sulfur and Nitrogen in Cyclic Thiazol and Its Derivatives ........................................... 261
5.3.6 Energies of Specific Interactions of Trithiocarbonic Acid (Cyclic Ethylene Ester) and 4,5,6,7-Tetrahydro-1,4-benzodithiol-2-thione ........................................... 264
5.3.7 2,1,3-Benzothiodiazole, Phenyl-1,2,3-selenadiazole, and 2-Methylthio-4-ethylamine-6-isopropylamino-1,3,5-triazine ........................................... 266

5.4 Energies of Specific Interactions of Sulfur, Oxygen, and Nitrogenated Compounds ........................................... 269

References ........................................... 273
