

Contents

Malware and Machine Learning	1
Charles LeDoux and Arun Lakhotia	
Soft Computing Based Epidemical Crisis Prediction	43
Dan E. Tamir, Naphtali D. Rische, Mark Last and Abraham Kandel	
An ACP-Based Approach to Intelligence and Security Informatics . . .	69
Fei-Yue Wang, Xiaochen Li and Wenji Mao	
Microfiles as a Potential Source of Confidential Information Leakage	87
Oleg Chertov and Dan Tavrov	
Decision Support in Open Source Intelligence	115
Daniel Ortiz-Arroyo	
Information Fusion Process Design Issues for Hard and Soft Information: Developing an Initial Prototype	129
James Llinas	
Intrusion Detection with Type-2 Fuzzy Ontologies and Similarity Measures	151
Robin Wikström and József Mezei	
A Multi-objective Genetic Algorithm Based Approach for Effective Intrusion Detection Using Neural Networks	173
Gulshan Kumar and Krishan Kumar	
Cyber Insider Mission Detection for Situation Awareness	201
Haitao Du, Changzhou Wang, Tao Zhang, Shanchieh Jay Yang, Jai Choi and Peng Liu	

A Game Theoretic Engine for Cyber Warfare 219
Allen Ott, Alex Moir and John T. Rickard

Mission Impact Assessment for Cyber Warfare 239
Jared Holsopple, Shanchieh Jay Yang and Moises Sudit

**Uncertainty Modeling: The Computational Economists’
View on Cyberwarfare** 267
Suchitra Abel
