

Contents

1	Introduction	1
1.1	Nonlinear Systems	1
1.2	Examples of Nonlinear Control Systems	4
1.3	Organization of the Book	9
1.4	Notes and References	11
1.5	Problems	12
	References	13
2	Fundamentals of Nonlinear Systems	15
2.1	Stability Concepts	15
2.2	Robust Stability	19
2.3	Tools for Adaptive Control	22
2.4	Input-to-State Stability	30
2.5	Changing Supply Function	36
2.6	Universal Adaptive Control	45
2.7	Small Gain Theorem	51
2.8	Notes and References	58
2.9	Problems	58
	References	64
3	Classification of Nonlinear Control Systems	67
3.1	Normal Form and Zero Dynamics	67
3.2	Typical Nonlinear Control Systems	77
3.3	Examples of Nonlinear Control Systems	83
3.3.1	The Duffing Equation	83
3.3.2	The Lorenz System	83
3.3.3	Chua's Circuit	85
3.3.4	The FitzHugh-Nagumo Model	87
3.4	Notes and References	88
3.5	Problems	88
	References	89

4	Robust Stabilization	91
4.1	An Overview of the Approach	91
4.2	Output Feedback Systems	94
4.3	Lower Triangular Systems	101
4.4	Reduction of Control Gain	109
4.5	Robust Stabilization of Chua's Circuit	115
4.6	Notes and References	120
4.7	Problems	122
	References	124
5	Adaptive Stabilization	127
5.1	A Motivating Example	127
5.2	Adaptive Stabilization: Tuning Functions Design	130
5.3	Robust Adaptive Stabilization	137
5.3.1	Systems with Relative Degree One	138
5.3.2	Systems with High Relative Degree	141
5.4	Adaptive Stabilization of the Duffing Equation	151
5.5	Notes and References	154
5.6	Problems	155
	References	156
6	Universal Adaptive Stabilization	157
6.1	Output Feedback Systems	157
6.2	Lower Triangular Systems	163
6.2.1	Parameterized Changing Supply Function	164
6.2.2	A Recursive Procedure	168
6.2.3	Controller Synthesis	172
6.3	Unknown Control Direction	177
6.4	Adaptive Stabilization of the Hyperchaotic Lorenz System	188
6.5	Notes and References	193
6.6	Problems	194
	References	195
7	Robust Output Regulation: A Framework	197
7.1	Problem Description	198
7.2	Steady-State Generator	204
7.2.1	Linear Immersion Assumption	206
7.2.2	Nonlinear Immersion Assumption	210
7.2.3	Generalized Linear Immersion Assumption	212
7.3	Internal Model	215
7.4	From Output Regulation to Stabilization	220
7.5	Linear Robust Output Regulation	224

7.6	Notes and References	233
7.7	Problems	233
	References	236
8	Global Robust Output Regulation	239
8.1	Systems with Relative Degree One	239
8.2	Output Feedback Systems	249
8.3	Lower Triangular Systems	259
8.4	Nonlinear Exosystems	269
8.5	Uncertainties with Unknown Boundary	274
8.5.1	Systems with Relative Degree One	274
8.5.2	Output Feedback Systems	275
8.5.3	Lower Triangular Systems	276
8.6	Asymptotic Tracking of the Lorenz System	277
8.7	Notes and References	282
8.8	Problems	283
	References	285
9	Output Regulation with Uncertain Exosystems	287
9.1	Systems with Relative Degree One	287
9.2	Systems with High Relative Degree	295
9.3	Disturbance Rejection of Lower Triangular Systems	300
9.4	Disturbance Rejection of the FitzHugh–Nagumo Model	307
9.5	Notes and References	311
9.6	Problems	311
	References	312
10	Attitude Control of a Rigid Spacecraft	313
10.1	Quaternion Based Rigid Spacecraft Model	313
10.2	Problem Formulation	316
10.3	A Special Case for Motivation	321
10.4	Disturbance with Known Frequencies	323
10.5	Disturbance with Unknown Frequencies	330
10.6	Notes and References	336
	References	337
11	Appendix	339
11.1	Some Theorems on Nonlinear Systems	339
11.2	Technical Lemmas	340
11.3	Proof of Theorem 2.12	344
11.4	Notes and References	352
	References	353
	Index	355

Stabilization and Regulation of Nonlinear Systems

A Robust and Adaptive Approach

Chen, Z.; Huang, J.

2015, XIX, 356 p. 84 illus., 4 illus. in color. With online files/update., Hardcover

ISBN: 978-3-319-08833-4
