Part I Quivers and Their Representations

| | |
|--|----|
| 1 Representations of Quivers | 3 |
| 1.1 Definitions and Examples | 3 |
| 1.1.1 Representations | 3 |
| 1.1.2 Morphisms | 5 |
| 1.2 Direct Sums and Indecomposable Representations | 10 |
| 1.3 Kernels, Cokernels, and Exact Sequences | 12 |
| 1.4 Hom Functors | 19 |
| 1.5 First Examples of Auslander–Reiten Quivers | 23 |
| Problems | 26 |
| 2 Projective and Injective Representations | 33 |
| 2.1 Simple, Projective, and Injective Representations | 36 |
| 2.2 Projective Resolutions and Radicals of Projectives | 45 |
| 2.3 Auslander–Reiten Translation | 54 |
| 2.3.1 Duality | 55 |
| 2.3.2 Nakayama Functor | 56 |
| 2.3.3 The Auslander–Reiten Translations τ, τ^{-1} | 61 |
| 2.4 Extensions and Ext | 62 |
| Problems | 66 |
| 3 Examples of Auslander–Reiten Quivers | 69 |
| 3.1 Auslander–Reiten Quivers of Type \mathbb{A}_n | 70 |
| 3.1.1 The Knitting Algorithm | 70 |
| 3.1.2 τ -Orbits | 72 |
| 3.1.3 Diagonals of a Polygon with $n + 3$ Vertices | 75 |
| 3.1.4 Computing Hom Dimensions, Ext Dimensions, and Short Exact Sequences | 78 |

| | | |
|----------------------------------|---|-----|
| 3.2 | Representation Type | 82 |
| 3.2.1 | Gabriel's Theorem: Finite Representation Type..... | 82 |
| 3.3 | Auslander–Reiten Quivers of Type \mathbb{D}_n | 84 |
| 3.3.1 | The Knitting Algorithm | 84 |
| 3.3.2 | τ -Orbits | 86 |
| 3.3.3 | Arcs of a Punctured Polygon with n Vertices | 88 |
| 3.3.4 | Computing Hom Dimensions, Ext Dimensions, and Short Exact Sequences | 92 |
| 3.4 | Representations of Bound Quivers: Quivers with Relations | 96 |
| 3.4.1 | Cluster-Tilted Bound Quivers of Type \mathbb{A}_n | 97 |
| 3.4.2 | Cluster-Tilted Bound Quivers of Type \mathbb{D}_n | 100 |
| 3.5 | Notes..... | 103 |
| | Problems | 103 |
| Part II Path Algebras | | |
| 4 | Algebras and Modules | 109 |
| 4.1 | Concepts from Ring Theory | 109 |
| 4.2 | Algebras | 112 |
| 4.3 | Modules | 117 |
| 4.4 | Idempotents and Direct Sum Decomposition..... | 121 |
| 4.5 | A Criterion for Indecomposability | 124 |
| 4.6 | Notes..... | 128 |
| | Problems | 128 |
| 5 | Bound Quiver Algebras | 133 |
| 5.1 | Admissible Ideals and Quotients of Path Algebras..... | 133 |
| 5.2 | Equivalence of the Categories $\text{rep}(Q, I)$ and $\text{mod } kQ/I$ | 136 |
| 5.3 | Projective Representations of Bound Quivers | 138 |
| 5.4 | Homological Dimensions..... | 142 |
| 5.5 | Auslander–Reiten Quivers of Bound Quiver Algebras..... | 144 |
| | Problems | 150 |
| 6 | New Algebras from Old | 153 |
| 6.1 | Tilted Algebras | 154 |
| 6.2 | Trivial Extensions | 159 |
| 6.3 | Self-Injective Algebras and the Trivial Extensions $A \times DA$ | 160 |
| 6.4 | Cluster-Tilted Algebras | 165 |
| 6.5 | Triangular Matrix Algebras..... | 169 |
| 6.6 | One-Point Extensions | 170 |
| 6.7 | Notes..... | 172 |
| | Problems | 172 |
| 7 | Auslander–Reiten Theory | 175 |
| 7.1 | Almost Split Sequences..... | 176 |
| 7.2 | Auslander–Reiten Translation | 183 |

7.3 Coxeter Transformation..... 186

7.4 Auslander–Reiten Formulas 190

 7.4.1 Tensor Products 193

7.5 Notes..... 200

Problems 200

8 Quadratic Forms and Gabriel’s Theorem..... 203

 8.1 Variety of Representations..... 203

 8.2 Quadratic Form of a Quiver 208

 8.2.1 Classification of Positive Definite Quadratic Forms 210

 8.3 Roots..... 215

 8.3.1 Positive Roots in Type \mathbb{A}_n 216

 8.3.2 Positive Roots in Type \mathbb{D}_n 216

 8.3.3 Positive Roots in Type \mathbb{E}_6 217

 8.3.4 Positive Roots in Type \mathbb{E}_7 217

 8.3.5 Positive Roots in Type \mathbb{E}_8 217

 8.4 Gabriel’s Theorem 218

 8.5 Notes..... 221

 Problems 221

References..... 223

Index..... 227
