

Contents

1	Introduction	1
2	Topological Spaces and Continuity	5
2.1	Metric Spaces	5
2.2	Topological Spaces	12
2.3	Neighbourhoods, Interiors, and Closures	16
2.4	Continuous Maps	20
2.5	Connectedness	25
2.6	Separation Properties	29
2.7	Exercises	33
3	Construction of Topological Spaces	41
3.1	The Product Topology and Initial Topologies	41
3.2	Final Topologies and Quotients	45
3.3	Topological Manifolds	48
3.4	Exercises	53
4	Convergence in Topological Spaces	59
4.1	Convergence of Nets	59
4.2	Nets and Filters	63
4.3	Ultrafilters	67
4.4	Exercises	68
5	Compactness	73
5.1	Compact Spaces	73
5.2	Continuous Maps and Compactness	77
5.3	Tikhonov's Theorem	79
5.4	Further Notions of Compactness	80
5.5	Exercises	84

6	Continuous Functions	87
6.1	Urysohn's Lemma and Tietze's Theorem	87
6.2	The Stone-Weierstraß Theorem	92
6.3	The Arzelà-Ascoli Theorem	99
6.4	Exercises	106
7	Baire's Theorem	111
7.1	Meager Subsets and Baire Spaces	111
7.2	Baire's Theorem	115
7.3	Discontinuous Functions	118
7.4	Exercises	122
	Appendix A: Not an Introduction to Set Theory	125
	References	131
	Index	133
