Contents

Geotechnical Damage in the Downstream Reaches of the Tone River in the 2011 East Japan Earthquake ................................................................. 1
Kenji Ishihara and Toshiyuki Kamata

Amplification Effects of Thin Soft Surface Layers: A Study for NBCC 2015 ............................................................................................... 33
W.D. Liam Finn and Francisco Ruz

New Design Spectra in Eurocode 8 and Preliminary Application to the Seismic Risk of Thessaloniki, Greece .................................................. 45
Kyriazis Pitilakis, Evi Riga and Anastasios Anastasiadis

Incorporating Site Response into Seismic Hazard Assessments for Critical Facilities: A Probabilistic Approach ........................................... 93
Ellen Rathje, Menzer Pehlivan, Robert Gilbert and Adrian Rodriguez-Marek

Stress Scaling Factors for Seismic Soil Liquefaction Engineering Problems: A Performance-Based Approach .......................................... 113
K. Önder Çetin and H. Tolga Bilge

Site Amplification Formula Using Average Vs in Equivalent Surface Layer Based on Vertical Array Strong Motion Records ................... 141
Takaji Kokusho

Observations from Geotechnical Arrays in Istanbul .............................. 161
Asli Kurtuluş, Atilla Ansal, Gökçe Tönük and Barbaros Çetiner

Combined Failure Mechanism of a Breakwater Subject to Tsunami during 2011 East Japan Earthquake ..................................................... 177
Iai Susumu
Lessons Learned From Dams Behavior Under Earthquakes ....................... 187
Pedro Simão Sêco e Pinto

Nonlinear Deformation Analyses of Liquefaction Effects on
Embankment Dams .................................................................................. 247
Ross W. Boulanger, Jack Montgomery and Katerina Ziotopoulou

Effects of Liquefaction on Ground Surface Motions................................ 285
Steven L. Kramer, Bita Astaneh Asl, Pelin Ozener and Samuel S. Sideras

Shaking Model Tests on Liquefaction Mitigation
of Embedded Lifeline .................................................................................. 311
Ikuo Towhata, Masahide Otsubo, Taro Uchimura, Masato Shimura,
Bangan Liu, Toshihiko Hayashida, Damoun Taeseri and Bertrand Cauvin

Effect of Long Duration of the Main Shock and a Big Aftershock
on Liquefaction-Induced Damage During the 2011 Great East
Japan Earthquake ........................................................................................ 343
Susumu Yasuda, Iwao Suetomi and Keisuke Ishikawa

Liquefaction Observed During the 2010 Chile Earthquake ....................... 365
Ramón Verdugo

A Case Study on Silty Sand Liquefaction—2010 Hsin Hwa
Liquefaction in Taiwan ............................................................................... 391

Post-Earthquake Analysis for a Seismic Retrofitting:
The Case History of a Piled Foundation in Augusta (Italy) ....................... 415
Michele Maugeri and Francesco Castelli

Pile Design in Laterally Spreading Soil: Feedback from
Numerical Predictions and Model Test Results .................................... 443
George D. Bouckovalas and Yannis K. Chaloulos

Integrating use of Swedish Weight Sounding Tests for
Earthquake Reconnaissance Investigations ........................................... 467
Yoshimichi Tsukamoto
Perspectives on Earthquake Geotechnical Engineering
In Honour of Prof. Kenji Ishihara
Ansal, A.; Sakr, M. (Eds.)
2015, XV, 479 p. 427 illus., 317 illus. in color.,
Hardcover
ISBN: 978-3-319-10785-1
