

TABLE OF CONTENTS

The Mechanisms of Pigmentation		Acquired hypermelanosis 25		Genetic hypermelanosis 77	
Preface	1	Epidermal hypermelanosis	25	Reticulated hypermelanosis	77
Foreword	3	Acquired bilateral telangiectatic macules	26	Dyschromatosis universalis hereditaria	78
Pigmentary disorders: practical approach	4	Acquired brachial cutaneous dyschromatosis	27	Epidermolysis bullosa with mottled pigmentation	80
The pigmentary system	7	Acquired pigmented macules on friction areas in red hair patients	28	Galli-Galli and Dowling Degos disease	81
Measuring skin color and pigmentation disorders	16	Acromelanosis progressiva	29	Kindler syndrome	82
		Addinson's disease	30	Reticulated acropigmentation of Dohi	83
		Atrophoderma of Pierini et Pasini	31	Reticulated acropigmentation of Kitamura	84
		Becker nevus	32	Rothmund-Thomson syndrome	85
		Café-au-lait spots	34	Lentiginosis	86
		Carcinoid syndrome	35	Banayan-Riley-Ruvalcaba syndrome	87
		Chikungunya	36	Carney complex	88
		Cronkhite-Canada syndrome	37	Centrofacial lentigines	90
		Cutaneous amyloidosis	38	Eruptive lentiginosis	91
		Diffuse melanosis in malignant melanoma	39	Inherited patterned lentiginosis in black patients	92
		Ephelides	40	Isolated generalized lentigines	92
		Erythema ab igne	41	Laugier disease	94
		Erythema dyschromicum perstans	42	Lentigo senilis et actinicus	96
		Erythromelanosis follicularis faciei et colli	43	Lentigo simplex	97
		Erythroze péribuccale pigmentaire of Brocq	44	LEOPARD syndrome	98
		Genital melanosis	45	Partial unilateral lentiginosis (agminated lentigines)	100
		Genital melanosis associated with localized depigmentation	46	Peutz-Jegger syndrome	101
		H syndrome	47	PUVA lentigines	102
		Hyperpigmented macules on the face of young children	48	Syndromes associated with Café-au-lait spots	103
		Idiopathic eruptive macular pigmentation	49	Legius syndrome	104
		Linea fusca	50	McCune-Albright syndrome	105
		Lichen planus pigmentosus	51	Neurofibromatosis	107
		Macular arteritis	53	Localized hypermelanosis	109
		Morphea and scleroderma	54	Congenital melanotic macules of the tongue	110
		Pellagra	56	Hartnup disease	111
		Periorbital hyperpigmentation	57	Incontinentia pigmenti	112
		Periungueal hyperpigmentation of the newborns	58	Linear and whorled nevoid hypermelanosis	114
		Phytophotodermatitis	59	Nevus spilus	115
		Poikiloderma of Civatte	60	Pigmentary demarcation lines	117
		Porphyria cutanea tarda	61	Premature aging syndromes	118
		Postinflammatory pigmentation secondary to acne	62	Xeroderma pigmentosum	119
		Riehl's melanosis	63	Congenital dermal hypermelanosis	120
		Socks line pigmentation	64	Mongolian spots	121
		Transient neonatal pustular melanosis	65	Nevus of Ito	122
		Universal acquired melanosis	66	Nevus of Ota	123
		Urticaria pigmentosa	67	Phakomatosis pigmentovascularis	124
		Acquired dermal hypermelanosis	69	Phakomatosis pigmentokeratolica	125
		ABNOM	70	Phakomatosis pigmento-pigmentaria	126
		Other acquired dermal hypermelanocytosis	71	Physiologic pigmentation in black skin	127
		Melasma	72		
		Smoker's melanosis	75		

Acquired hypomelanosis 129		Genetic hypomelanosis 184		Non-melanin pigmentary disorders 205	
Vitiligo	130	Generalized hypomelanosis	184	Hemoglobinopathies and vascular disorders	205
Melanoma associated-vitiloid depigmentation	136	Chediak-Higashi syndrome	185	Anemia and polycythemia	206
Vogt-Koyanagi Harada syndrome	138	Griselli-Prunieras syndrome	186	Bier spots	207
Infectious hypomelanosis	140	Hermansky-Pudlak syndrome	188	Nevus anemicus	208
Endemic trepanomatoses (Pian, Bejel, Pinta)	141	Oculocutaneous albinisms	190	Woronoff ring	209
Herpes	142	Piebaldism	192	Xanthoderma	210
Kala-Azar	144	Waardenburg syndrome	194	Carotenemia	211
Leprosy	145	Localized hypomelanosis	196	Jaundice	212
Oncocercosis	147	Cole disease	197	Tattoos	213
Syphilis	148	Mosaicisms: Hypomelanosis of Ito	198	Heavy metal depositions	216
Tinea versicolor	150	Mosaicisms: Other mosaicisms with hypomelanosis	199	Argyria	217
Inflammatory hypomelanosis	151	Multiple endocrine neoplasia, MEN1	200	Chrysiasis	218
Atopic dermatitis	152	Nevus depigmentosus	201	Hemochromatosis	219
Discoid lupus	153	Tuberous sclerosis complex	203	Hemosiderosis and siderosis	220
Lichen sclerosus atrophicus	155			Pigmentation to amiodarone	222
Mucinosis	156			Pigmentation to clofazimine	223
Mycosis fungoides	157			Pigmentation to minocycline	224
Pityriasis alba	159			Plumbism	225
Pityriasis lichenoides	160			Ochronosis	226
Psoriasis	161			Alkaptonuria	227
Sarcoidosis	162			Exogenous ochronosis	228
Seborrheic dermatitis	163			Dyskeratosis	230
Systemic Scleroderma	164			Acanthosis nigricans	231
Metabolic, nutritional and endocrine hypopigmentations	166			Confluent and reticulated papillomatosis	233
Kwashiorkor	167			Darier-White disease	234
Iatrogenic hypopigmentations	168			Dermatosis papulosa nigra	236
Cosmetic use of skin bleaching products	169			Dyskeratosis congenita	237
Iatrogenic hypopigmentations secondary to pharmacological agents	171			Ectodermal dysplasia	239
Iatrogenic hypopigmentations secondary to physical or toxic agents	173			Ichthyosis	240
Miscellaneous hypomelanosis	174			Melanoacanthoma	241
Idiopathic guttate hypomelanosis	175			Prurigo pigmentosa	242
Leukoderma punctata	177			Seborrheic keratosis	243
Progressive macular hypomelanosis of the trunk	178			Sweat discoloration	244
Extracutaneous hypomelanosis	179			Chromhidrosis	245
Alopecia areata	180			Pseudochromhidrosis	245
Senile canities	182			Other	247
Sudden whitening of the hair	183			Dirt pigmentation	248
				Drug-induced discoloration 249	
				Nail discoloration 254
