Contents

1 Uranium Boom in Namibia – Hausse or Baisse ............ 1
   Helmut Mischo and Rainer Ellmies

2 Rare earth elements in Australian uranium deposits ....... 25
   Bernd G. Lottermoser

3 IAEA Initiatives Supporting Good Practice in Uranium
   Mining Worldwide ........................................ 31
   Peter Woods, Russel Edge, Martin Fairclough, Zhiwen Fan,
   Adrienne Hanly, Ib-rahim Miko Dit Angoula,
   Horst Monken-Fernandes, Haridasan Pappinisseri Puthanveedu,
   Marcelle Phaneuf, Harikrishnan Tulsidas,
   Oleg Voitsekhovych and Tamara Yankovich

4 Challenging Issues in Regulating Uranium Mining
   in Tanzania .................................................. 41
   Firmi P. Banzi, Peter Msaki and Najat Mohammed

5 Uranium leaching from a burning black shale
   deposit – present conditions and future scenarios ......... 47
   Mattias Bäckström and Lotta Sartz

6 Is enough information available to derive an overall EQS
   for uranium in French freshwaters, according to European
   Guidance? ...................................................... 55
   Karine Beaugelin-Seiller, Olivier Simon, Rodolphe Gilbin,
   Jacqueline Garnier-Laplace and Laureline Février
7 Radiation exposure and environmental remediation at the Urgeiriça mine site, Portugal .......................... 63
Fernando P. Carvalho, João M. Oliveira and Margarida Malta

8 The modern hydrochemical state of the Mailuu-Suuriver and radioecological problem of the Fergana Valley ............. 73
Bekmamat Djenbaev, Umyt Karmisheva, Azamat Tilenbaev and Altinai Egemberdieva

9 Social Licensing in Uranium Mining: Empowering Stakeholders through Information .............................. 79
W. Eberhard Falck, Joachim H. Spangenberg and Dominic Wittmer

10 Social licensing and Stakeholder Communication in Uranium Exploration and Mining .............................. 87
W. Eberhard Falck, Julian Hilton, Henry Schnell and Harikrishnan Tulsidas

11 Environmental radiation monitoring around uranium ore deposits and mining sites in India: An overview ............. 95
Amir H. Khan

12 Optimization of Uranium In-situ Recovery Based on Advanced Geophysical Surveying and Borehole Logging Technologies .................................................. 105
Horst Märten, Andrea Marsland Smith, Jonathan Ross, Michael Haschke, Harald Kalka and Jens Schubert

13 Fuzzy MCDA for remediation of a Uranium tailing ...................... 113
Danyl Pérez-Sánchez, Antonio Jiménez, Alfonso Mateos and Alla Dvorzhak

14 Uranium in phosphate fertilizers – review and outlook ................ 123
Ewald Schnug and Nils Haneklaus

15 Uranium and Molybdenum transfer within the oxidized zone of uranium deposit ............................. 131
Irina Semenova, Vladislav Petrov, Yana Bychkova, Lyubov Shulik and Jörg Hammer

16 Release of uranium from weathered black shale in meso-scale reactor systems – first year of data .............. 139
Viktor Sjöberg and Stefan Karlsson
Contents

17 Environmental Issues and Proposed Assessment of Feasibility of Remediation of the Legacy Sites of Mining and Milling in the Area of Sumsar-Shekaftar in Kyrgyzstan ........................................ 147
Isakbek Torgoev and Alex Jakubick

18 Heavy metals and natural radionuclides in the water of Syr Darya River, Kazakhstan ..................................... 155
Bagdat Satybaldiyev, Hanna Tuovinen, Bolat Uralbekov, Jukka Lehto and Mukhambetkali Burkitbayev

19 Establishment of a database of uranium anomalies and zones in Mongolia .................................................. 161
Boris Vakanjac, Predrag Srna and Vesna Ristic Vakanjac

20 Uranium, Rare Earths and NORM: Mining and current prospects in Australia’s Northern Territory .................. 169
Peter Waggitt

21 Technical Status of Mine Water Control in China and Its Development Strategy ......................................... 177
Hao Wang, Shuning Dong, Rui Chai and Qisheng Liu

22 Revisiting a case study on uranium exposure linked to leukaemia – preliminary results ................................. 185
Frank Winde, Ewald Erasmus, G. Geipel and A.A.A. Osman

23 Virtual Geographical Environments as a tool to map human exposure to mining-related radionuclides ............. 193
Frank Winde and Emile Hoffmann

24 Assessing risks associated with the flooding of mine voids on underground infrastructure and water resources in and around Johannesburg (South Africa) ................................. 201
Frank Winde and Ewald Erasmus

25 Hydrogeological testing for ISL uranium mining: some Australian experience ........................................... 211
Peter Woods and Ben Jeuken

26 Remediation of a uranium geological exploration facility ...... 221
Wei Zhang, Lechang Xu, Xueli Zhang and Jie Gao
27 Does wind energy production cause more radioactive doses than nuclear power plants? .................................................. 229
Gerhard Schmidt

28 Impact of humic substances on uranium mobility in soil – A case study from the Gessenwiese test field, Germany ................................................................. 239
Stefan Karlsson, Viktor Sjöberg and Bert Allard

29 U-Th-Pb data as a tool for bordering small-scale regions of in-situ monazite mineralization ........................................... 249
Jan Mestan, Libor Volak and David Sefcik

30 Sorption of U(VI) and As(V) on SiO₂, Al₂O₃, TiO₂ and FeOOH: A column experiment study. .......................... 259
Sreejesh Nair and Broder J. Merkel

31 Characterization of phosphogypsum deposited in Schistos remediated waste site (Piraeus, Greece) ........................................... 271
F. Papageorgiou, A. Godelitsas, S. Xanthos, N. Voulgaris,
P. Nastos, T.J. Mertzimekis, A. Argyraki and G. Katsantonis

32 Rare earth ore refining in Kuantan/Malaysia – the next legacy ahead? ......................................................... 281
Gerhard Schmidt

33 Uranium sorption onto the granites of Nizhnekansk massif. ............................................ 289
Anna Shiriaeva

34 REE fractionation and distribution of Fe, Ni and U in the soil-water-biomass system along the flow path of Gessenbach, Eastern Thuringia (Germany) ........................................... 297
Daniela Sporleder, Anja Grawunder and Georg Büchel

35 The externalized costs of uranium mining in the United States ................................................................. 305
Doug Brugge, Aparna Dasaraju, Yi Qi Lu and Brianna Dayer

36 Microbial consortia in radionuclide rich groundwater ........................................... 311
Katja Burow, Sven Gärtner, Anja Grawunder, Erika Kothe and Georg Büchel
37 Flooding of the underground mine workings of the old Witwatersrand gold/uranium mining areas: acid mine drainage generation and long term options for water quality management .................................................. 317
Henk Coetzee, Supi Tlowana and Mosidi Makgae

38 Assessment of the success of rehabilitation at waste rock piles of the former uranium mining from the supervisory authority’s perspective by the example of Schlema-Alberoda (Germany) ................................................................. 325
Klaus Flesch and Andrea Sperrhacke

39 Microbes affect the speciation of various uranium compounds in wastes and soils ................................................................. 333
A.J. Francis

40 Uranium induced stress promotes fungal excretion of uranium/metal stabilizing ligands: Analysis of metal-organic compounds with Size Exclusion Chromatography and Inductively Coupled Plasma-Mass Spectroscopy ................................................................. 347
Anna Grandin, Anna Ogar, Viktor Sjöberg and Stefan Karlsson

41 Passive treatment of heavily polluted drainage waters in a uranium deposit ................................................................. 355
Stoyan Groudev, Irena Spasova, Plamen Georgiev and Marina Nicolova

42 At the crossroads: Flooding of the underground uranium leach operation at Königstein (Germany) – A 2014 status brief ................................................................. 363
Ulf Jenk and Micheal Paul

43 Do macrofungi accumulate uranium? ............................................. 369
Jaroslava Kubrová and Jan Borovička

44 Treatment of Acid Wastewater Containing Uranium by Sulfate Reducing Bacteria ................................................................. 377
Jie Gao, Lechang Xu, Yalan Wang and Wei Zhang
