Contents

Part I Conceptual

1 Metacognitive Strategy Instruction that Highlights the Role of Monitoring and Control Processes .................... 3
Gregory Schraw and Antonio P. Gutierrez
1.1 Introduction ............................................ 4
1.2 Models of Strategy Instruction .............................. 4
1.3 A Typology of Strategy Use ............................... 5
1.4 A Hybrid Strategy Instruction Model ............................ 9
   1.4.1 Instructional Strategies for Teaching Monitoring
   and Control Processes .................................. 12
1.5 Discussion and Implications for Practice and Research .......... 12
1.6 Conclusions ............................................ 13
References .................................................. 14

2 Regulating Metacognitive Processes—Support for a Meta-metacognitive Ability ........................................ 17
Sandra Buratti and Carl Martin Allwood
2.1 Introduction ............................................. 18
2.2 What Is Metacognition? ................................... 20
2.3 How Does Metacognition Relate to Meta-Metacognition? ........ 21
2.4 Recent Research on Second-Order Metacognitive Judgments ...... 22
2.5 New Method for Studying Second-Order Judgments ............ 25
2.6 The Making of Successful Second-Order Confidence Judgments ... 26
   2.6.1 Strategies Used When Making Second-Order Judgments ... 27
   2.6.2 Cues for Making Second-Order Confidence Judgments ..... 29
   2.6.3 Individual Differences in Second-Order Judgment ....... 30
2.7 Does Research Really Support that We Have
   a Meta-Metacognitive Ability? ................................ 31
2.8 Illustration of Computer Implementation of the New Method
   for Improving Second-Order Judgments in a Learning Context ... 32
2.9 Future Research ......................................... 33
References .................................................. 35

3 A Conceptual Model of the Metacognitive Activity ................ 39
Alejandro Peña-Ayala and Leonor Cárdenas
3.1 Introduction ............................................ 40
3.2 A Glance at Metacognition. ................................ 41
   3.2.1 Previous Works. ........................................ 41
   3.2.2 The Birth of a Research Line .......................... 42
   3.2.3 A Chronicle of Metacognition Research Development . . . 42
   3.2.4 A Conceptual Shape of the Metacognition Through Its Works ........................................ 43
   3.2.5 Metacognition Research on Children and Animals .......... 44
3.3 A Sample of Models to Describe Metacognition ................ 45
   3.3.1 Classic Models of the Metacognition ................... 46
   3.3.2 Declarative and Procedural Models of the Metacognition ... 47
3.4 A Conceptual Model of the Metacognitive Activity ............. 49
   3.4.1 A View of the Nervous System ........................... 49
   3.4.2 A View of the Biological Context .......................... 50
   3.4.3 Nature of the Cognition .................................. 52
   3.4.4 Nature of the Metacognition. ........................... 54
3.5 Analysis of Metacognition Models .......................... 57
   3.5.1 A Comparative Profile of Metacognition Models .......... 58
   3.5.2 An Analysis of the Metacognition Models ............... 58
3.6 Conclusions ............................................. 61
References .................................................. 64

Part II Framework

4 Metacognitive Skill Development and Applied Systems Science:
A Framework of Metacognitive Skills, Self-regulatory Functions
and Real-World Applications .................................. 75
Michael J. Hogan, Christopher P. Dwyer, Owen M. Harney,
Chris Noone and Ronan J. Conway
4.1 Introduction ............................................. 76
4.2 Metacognition: Foundational Definitions and Perspectives ....... 78
4.3 The Synergy of Teams, Tools and Talents in Metacognition ....... 79
4.4 Milestones in the Development of Metacognition:
   An Integrated Framework ........................................ 81
   4.4.1 Mindfulness and Metacognition ........................... 83
   4.4.2 Higher-Order Thinking Skills: Critical Thinking and Reflective Judgment ........................................ 86
   4.4.3 Collaborative Metacognition .............................. 90
4.5 Conclusions ............................................. 97
References .................................................. 99
5 Metacognition, Self-regulation and Assessment in Problem-Solving Processes at University

María Consuelo Sáiz-Manzanares and Eduardo Montero-García

5.1 Introduction ............................................ 108
5.2 Metacognitive Skills and Self-regulation ...................... 110
5.3 Instruments for the Evaluation of Aspects Relating to Processes of Self-regulation .................................. 112
5.3.1 Student Self-assessment of the Self-learning Process and Evaluation by the Teacher of the Student Learning Process ....................................... 113
5.3.2 Instruments to Measure Self-assessment ................ 114
5.4 Training, Metacognition, and Self-regulation ................. 118
5.5 An Example of Intervention in Self-regulation ................. 119
5.5.1 Analysis of the Problem to Solve ...................... 120
5.6 Research and Results ..................................... 129
5.7 Conclusions ............................................ 130
References .................................................. 130

6 Engaging Adolescent Students’ Metacognition Through WebQuests: A Case Study of Embedded Metacognition

Hope J. Hartman

6.1 Introduction ............................................ 136
6.1.1 WebQuests and Metacognition ........................ 137
6.1.2 Theoretical Framework ............................... 143
6.2 Method ................................................ 144
6.2.1 Participants ....................................... 144
6.2.2 Metacognitive Engagement Preparation ................. 144
6.2.3 WebQuests Development ............................ 147
6.3 Results ................................................ 147
6.3.1 Required Versus Expected Metacognition ............... 148
6.3.2 Executive Management Metacognition .................. 148
6.3.3 Strategic Knowledge Metacognition ................... 155
6.3.4 Social Metacognition ................................ 155
6.3.5 Affective Self-reflections ............................ 160
6.4 Discussion and Conclusion ................................ 161
References .................................................. 163

Part III Studies

7 The Role of Metacognitive Awareness of Listening Strategies in Listening Proficiency: The Case of Language Learners with Different Levels of Academic Self-regulation

Mehrak Rahimi and Sajjad Abedi

7.1 Introduction ............................................ 170
7.1.1 Cognitive Processes Involved in Listening ............. 172
9.3 Personal Self-regulation as a Student Meta-Cognitive and Meta Motivational Presage Variable .................... 226
9.3.1 Prior Evidence on Personal Self-regulation .......... 229
9.4 Self-regulated Learning as a Meta-Cognitive and Meta-Motivational Process Variable of Students ............. 230
9.4.1 Dimensions of Self-regulation Learning .............. 233
9.4.2 Self-regulated Learning as a Socio-Cognitive Process ..... 233
9.4.3 Cyclical Nature of Self-regulation Learning ............. 234
9.5 Strategies for Coping with Stress as a Meta-Affective Variable of Learning and Buffer of Academic Stress ........... 236
9.5.1 Concept of Coping .................................. 237
9.5.2 Coping Strategies .................................... 238
9.5.3 Transactional Model ................................... 239
9.6 Initial Assessment ........................................ 242
9.6.1 Prediction Between Personal Self-regulation, Self-regulated Learning and Coping Strategies ................ 242
9.6.2 Interdependence Between Personal Self-regulation, Self-regulated Learning and Coping Strategies:
        Transactional Model ................................... 242
9.7 Applications: e-Assessment and e-Intervention Based on ICTs ... 243
9.8 Conclusions ............................................ 249
References ................................................. 250

Part IV Approaches

10 What Makes Metacognition as Socially Shared in Mathematical Problem Solving? ............................. 259
Tarja-Riitta Hurme, Sanna Järvelä, Kaarina Merenluoto and Pekka Salonen
10.1 Introduction ........................................... 260
10.2 Metacognition in Computer-Supported Collaborative Mathematical Problem Solving ....................... 260
10.2.1 Mathematical Tasks and Data Analysis .............. 262
10.3 Success in Collaborative Problem Solving Requires Socially Shared Metacognition ......................... 264
10.3.1 Group’s Intention to Solve a Problem Quickly and Reach a Right Solution Damages Metacognition ... 264
10.3.2 Metacognitive Messages Are Converged into Individuals’ Own Thinking or Ignored in Discussion ... 268
10.3.3 Socially Shared Metacognition ........................ 271
10.4 Discussion ............................................. 273
References ................................................. 275

Contents

Part V  Tools

13  Modeling Metacognitive Activities in Medical Problem-Solving with BioWorld ................................. 323
Susanne P. Lajoie, Eric G. Poitras, Tenzin Doleck and Amanda Jarrell
13.1 Modeling Metacognitive Activities in Medical Problem-Solving with BioWorld ................................. 324
13.2 A Model of Metacognitive Activities in Problem-Solving ...... 325
13.3 BioWorld: A Deliberate Practice Environment for Diagnostic Reasoning with Virtual Patients ............... 328
13.5 Developing an Expert Model to Trace Metacognitive Activities in Problem-Solving ............................ 331
13.6 Examining Help-Seeking as an Indicator of Metacognition ..... 332
13.7 Overview of Empirical Evidence of BioWorld’s Role in Fostering Help-Seeking ................................. 334
13.7.1 Study 1: Using Process Data to Examine Self-Regulatory Behaviors During Clinical Problem Solving Using Technology ................ 334
13.7.2 Study 2: Supporting Diagnostic Reasoning by Modeling Help-Seeking in BioWorld ............. 335
13.7.3 Study 3: Case Summary Data-Diagnostic Learning Outcomes .................. 337
13.7.4 Study 3: Text Mining Algorithms .................. 338
13.7.5 Study 3: Dataset .................. 338
13.7.6 Study 3: Results .................. 339
13.8 Conclusion .................. 340
References .................. 341

14  The MetaHistoReasoning Tool: Studying Domain-Specific Metacognitive Activities in an Intelligent Tutoring System for History .................................................. 345
Eric G. Poitras
14.1 Introduction .................. 346
14.2 The Three-Phase Model of Cognitive and Metacognitive Activities in Historical Inquiry .................. 348
14.3 The MetaHistoReasoning Tool Training Module .................. 350
14.3.1 The Design Guidelines of the Training Module .................. 350
14.3.2 Modeling Skill Acquisition in the Training Module .................. 351
14.4 The MetaHistoReasoning Tool Inquiry Module .................. 353
14.4.1 The Design Guidelines of the Inquiry Module .................. 353
14.4.2 Modeling Skill Practice and Refinement in the Inquiry Module .................. 355
14.5 Discussion ........................................... 359
   14.5.1 The Role of External Representations ............... 360
   14.5.2 The Role of Assessment Mechanisms ............... 360
   14.5.3 The Role of Pedagogical Agents ............... 361
14.6 Conclusion ........................................... 362
References ................................................. 362

Author Index .................................................. 367
Metacognition: Fundaments, Applications, and Trends
A Profile of the Current State-Of-The-Art
Peña-Ayala, A. (Ed.)
2015, XIX, 367 p. 46 illus., Hardcover
ISBN: 978-3-319-11061-5
