

- 1 Tools of the Trade**..... 1
  - 1.1 Angular Measurement..... 1
  - 1.2 Distances in Astronomy..... 4
  - 1.3 Brightness and Luminosity of Astronomical Objects..... 11
  - 1.4 Magnitudes..... 13
  - 1.5 The Visually Brightest Stars ..... 18
  - 1.6 The Colors of Stars ..... 22
  - 1.7 The Sizes of Stars..... 27
  - 1.8 The Constituents of Stars ..... 30
  
- 2 The Solar System**..... 33
  - 2.1 Early History of Astronomy..... 33
    - 2.1.1 The Geocentric Universe..... 33
    - 2.1.2 The Scientific Method ..... 35
    - 2.1.3 Ancient Greek Science ..... 37
    - 2.1.4 The Ptolemaic System..... 38
    - 2.1.5 The Copernican Revolution..... 41
    - 2.1.6 Tycho—The Great Observer ..... 42
    - 2.1.7 Kepler—The Great Theoretician..... 43
    - 2.1.8 Galileo—The Great Experimenter ..... 47
    - 2.1.9 Newton—The Genius..... 49
  - 2.2 Observing the Solar System..... 53
    - 2.2.1 The Moon ..... 54
    - 2.2.2 Mercury ..... 54
    - 2.2.3 Venus ..... 54

- 2.2.4 Jupiter ..... 55
- 2.2.5 Uranus ..... 55
- 3 Spectroscopy and the Spectral Sequence ..... 57**
  - 3.1 Spectra and Spectroscopy ..... 57
  - 3.2 Stellar Classification ..... 62
  - 3.3 Amateur Astronomical Spectroscopy ..... 66
  - 3.4 Redshift and Blueshift..... 75
- 4 The Hertzsprung-Russell Diagram ..... 77**
  - 4.1 Introduction..... 77
  - 4.2 The H-R Diagram and Stellar Radius ..... 79
  - 4.3 The H-R Diagram and Stellar Luminosity ..... 81
  - 4.4 The H-R Diagram and Stellar Mass..... 83
- 5 The Interstellar Medium and Protostars ..... 85**
  - 5.1 Introduction ..... 85
  - 5.2 Nebulae..... 87
  - 5.3 Emission Nebulae..... 87
  - 5.4 Dark Nebulae..... 96
  - 5.5 Reflection Nebulae ..... 100
  - 5.6 Molecular Clouds ..... 102
  - 5.7 Protostars..... 103
  - 5.8 The Jeans Criterion..... 105
- 6 Star Birth ..... 109**
  - 6.1 The Birth Of A Star ..... 109
  - 6.2 Pre-Main-Sequence Evolution and the Effect of Mass ..... 112
  - 6.3 Mass Loss and Mass Gain ..... 117
  - 6.4 Star Formation Triggers ..... 119
- 7 Galactic Clusters and Stellar Associations ..... 123**
  - 7.1 Galactic Star Clusters ..... 124
  - 7.2 Stellar Associations and Streams ..... 134
- 8 The Sun, Our Nearest Star ..... 139**
  - 8.1 From the Core to the Surface ..... 139
  - 8.2 The Proton-Proton Chain ..... 142
  - 8.3 Energy Transport from the Core to the Surface ..... 145
- 9 Binary Stars and Stellar Mass ..... 147**
  - 9.1 Binary Stars ..... 147
  - 9.2 The Masses of Orbiting Stars ..... 152
- 10 Life on the Main Sequence ..... 155**
  - 10.1 Lifetimes of Main Sequence Stars..... 155
  - 10.2 Red Giant Stars..... 159
  - 10.3 Helium Burning and the Helium Flash ..... 162
  - 10.4 Globular Star Clusters and the H-R Diagram..... 165

10.5	Post-Main Sequence Star Clusters—The Globular Clusters .....	166
10.6	Pulsating Stars .....	173
10.7	Why Do Stars Pulsate? .....	173
10.8	Cepheid Variables and the Period-Luminosity Relation .....	176
10.9	Temperature and Mass of Cepheids .....	178
10.10	RR Lyrae and Long-Period Variable Stars .....	179
<b>11</b>	<b>Star Death: White Dwarfs &amp; Planetary Nebulae</b> .....	<b>183</b>
11.1	The Death Of Stars .....	183
11.2	The Asymptotic Giant Branch.....	183
11.3	Dredge-Ups .....	185
11.4	Mass Loss and Stellar Winds .....	186
11.5	Infrared Stars .....	186
11.6	The End of an AGB Star’s Life .....	187
11.7	Planetary Nebulae.....	190
11.8	White Dwarf Stars .....	196
<b>12</b>	<b>Star Death: Supernovae, Neutron Stars &amp; Black Holes</b> .....	<b>203</b>
12.1	High-Mass Stars and Nuclear Burning.....	203
12.2	Supernovae and the Formation of Elements.....	206
12.3	Supernova Remnants .....	209
12.4	Supernovae Types.....	212
12.5	Pulsars and Neutron Stars.....	215
12.6	Black Holes .....	218
<b>13</b>	<b>Exoplanets</b> .....	<b>225</b>
13.1	Introduction .....	225
13.2	Types of Exoplanets .....	226
13.3	Techniques of Detection.....	229
13.4	Observing Exoplanet Systems.....	234
<b>14</b>	<b>Galaxies</b> .....	<b>239</b>
14.1	Introduction .....	239
14.2	Galaxy Types .....	240
14.3	Galaxy Structure.....	240
14.4	Stellar Populations.....	241
14.5	Hubble Classification of Galaxies .....	242
14.6	Gérard de Vaucouleurs’s Classification of Galaxies.....	245
14.7	The Milky Way .....	246
14.8	Observing Galaxies .....	247
14.9	Clusters of Galaxies.....	256
<b>15</b>	<b>Active Galaxies</b> .....	<b>259</b>
15.1	Active Galactic Nuclei (AGN’s).....	259
15.2	Origin of Nuclear Activity .....	260
15.3	Classification of Active Galaxies .....	260
15.4	AGN Variability.....	262

15.5	Starburst Galaxies .....	264
15.6	Observing Active Galaxies .....	266
<b>16</b>	<b>Cosmology</b> .....	<b>271</b>
16.1	The Big Bang .....	272
16.2	Hubble and Humason.....	274
16.3	After the Big Bang .....	276
16.4	Evidence for and Against the Big Bang Theory .....	280
16.5	The Inflationary Model .....	281
16.6	Dark Matter and Dark Energy.....	283
16.7	The Future of the Universe .....	286
16.8	Cosmology and the Amateur Astronomer .....	287
16.9	Final Thoughts .....	291
<b>Appendix 1: Degeneracy</b> .....		<b>293</b>
<b>Appendix 2: Book, Magazines, Organizations, and Equipment</b> .....		<b>295</b>
<b>Index</b> .....		<b>299</b>

Astrophysics Is Easy!

An Introduction for the Amateur Astronomer

Inglis, M.

2015, XIX, 302 p. 283 illus., 43 illus. in color., Softcover

ISBN: 978-3-319-11643-3
