Contents

Congestion Management in Motorways and Urban Networks Through a Bargaining-Game-Based Coordination Mechanism ........................................ 1
Felipe Valencia, José D. López, Alfredo Núñez, Christian Portilla, Luis G. Cortes, Jairo Espinosa and Bart De Schutter

Advanced Information Feedback Coupled with an Evolutionary Game in Intelligent Transportation Systems .................................................. 41
Chuanfei Dong, Yuxi Chen, Xu Ma and Bokui Chen

Solving a Dynamic User-Optimal Route Guidance Problem Based on Joint Strategy Fictitious Play .......................................................... 67
Tai-Yu Ma

A Psycho-Social Agent-Based Model of Driver Behavior Dynamics .................................................. 91
Theodore Tsekeris and Ioannis Katerelos

Game-Theoretic Context and Interpretation of Kerner’s Three-Phase Traffic Theory .......................................................... 113
Kjell Hausken and Hubert Rehborn

A Heuristic Method for Identifying Near-Optimal Defending Strategies for a Road Network Subject to Traffic Congestion .................. 143
Mengyao Gao, Bo Zhang, Vicki M. Bier and Tao Yao

Multiple Stakeholders in Road Pricing: A Game Theoretic Approach .......................................................... 159
Anthony E. Ohazulike, Georg Still, Walter Kern and Eric C. van Berkum
Stackelberg and Inverse Stackelberg Road Pricing Games:
State of the Art and Future Research ........................................ 191
Kateřina Staňková and Alexander Boudewijn

Author Index .................................................................................. 211

Subject Index ................................................................................. 219
Game Theoretic Analysis of Congestion, Safety and Security
Traffic and Transportation Theory
Hausken, K.; Zhuang, J. (Eds.)
2015, XII, 220 p. 65 illus., 25 illus. in color., Hardcover
ISBN: 978-3-319-11673-0
