

Contents

1	Introduction	1
2	Local Dynamics of a Parabolic Germ	5
2.1	Fatou Coordinates	5
2.2	Asymptotic Expansion of a Fatou Coordinate at Infinity	19
2.2.1	A Note on Resurgent Properties of the Asymptotic Expansion of the Fatou Coordinates	26
2.3	Écalle-Voronin Invariants and Definition of Parabolic Renormalization	29
2.4	Analytic Continuation of Parabolic Renormalization	36
3	Global Theory	45
3.1	Basic Facts About Branched Coverings	45
3.2	Parabolic Renormalization of the Quadratic Map	47
3.2.1	The Julia Set of $f_0(z) = z + z^2$ Is a Jordan Curve	48
3.3	Covering Properties of the Écalle-Voronin Invariant of f_0	57
3.4	Parabolic Renormalization of f_0	70
3.4.1	A Note on the General Theory for Analytic Maps of Finite Type	71
3.5	A Class of Analytic Mappings Invariant Under \mathcal{P}	71
3.5.1	Definition of \mathbf{P}_0	71
3.6	The Structure of the Immediate Parabolic Basin of a Map in \mathbf{P}	76
3.6.1	Definition of \mathbf{P}_1 and Puzzle Partitions	81
3.6.2	The Immediate Basin of a Map in \mathbf{P}_1 Is a Jordan Domain	86
3.7	Convergence of Parabolic Renormalization.	92

- 4 Numerical Results** 95
 - 4.1 A Computational Scheme for \mathcal{P} 95
 - 4.1.1 Computing f_* 98
 - 4.2 Computing the Domain of Analyticity of f_* 99
 - 4.2.1 Computing the Tail of the Domain $\text{Dom}(f_*)$ 99

- 5 For Dessert: Several Amusing Examples** 105
 - 5.1 Example of a Map with a Simply-Connected Parabolic Basin Whose Boundary Is Not Locally Connected 105
 - 5.2 Example of a Map in $\mathbf{P} \setminus \mathbf{P}_0$ 107

- References** 109
