Contents

1 Sustainable Construction Waste Management in Australia:
   A Motivation Perspective .............................................. 1
   1.1 Introduction .......................................................... 2
   1.2 Solutions Initiated by the State Governments in Australia
      to Reduce Waste ..................................................... 3
   1.3 The Urgency of Zero Waste: We are All Running
      Out of Landfills .................................................... 4
   1.4 Zero Waste: A Legend, Myth, or Achievable Goal? .............. 5
      1.4.1 Zero Waste Policy in Adelaide .............................. 7
   1.5 Sustainable Construction Waste Management:
      Building Cycle Perspective ........................................... 7
   1.6 Motivations for Sustainable Zero Waste Construction
      Waste Management ..................................................... 14
      1.6.1 Incentive .......................................................... 14
      1.6.2 Goal Setting Theory ............................................. 14
      1.6.3 Hierarchy of Needs Theory ..................................... 15
   1.7 Research Method ..................................................... 15
   1.8 Results ................................................................. 16
      1.8.1 Sustainable Construction Waste Management ............... 16
      1.8.2 Construction Waste Reduction Should Be Building
          Life Cycle Concept and Action ................................... 26
      1.8.3 Motivations of Sustainable and Zero Waste
          Management ......................................................... 26
   1.9 Conclusion ............................................................. 27
   References ................................................................. 28
5 An Institutional Economic Analysis on Construction Safety Knowledge Sharing and E-Learning via Mobile Apps
5.1 Introduction .................................. 75
5.2 Knowledge ..................................... 77
5.3 E-Learning ...................................... 78
5.4 M-Learning: The Post E-Learning Era ............... 79
  5.4.1 The Potential of M-Learning: A Glance at Our Fast Growing Market .......... 80
  5.4.2 Mobile Learning Worldwide .................. 80
5.5 Transaction Costs, M-Learning and E-Learning .... 80
5.6 Mobile Apps for Construction Safety ............... 81
5.7 Conclusion ..................................... 88
References ...................................... 89

6 Supply and Demand of Construction Safety Regulations in Developing Countries ................................ 93
6.1 Introduction ..................................... 93
6.2 Demand of Construction Safety Measures in Developing World .................................. 96
6.3 Supply of Construction Safety Regulations in Developing Countries ......................... 97
  6.3.1 Nigeria ................................ 98
  6.3.2 China .................................. 99
  6.3.3 Ghana ................................. 102
  6.3.4 Kuwait ................................ 104
6.4 Conclusion ..................................... 107
References ...................................... 108

7 Construction Safety Motivations in Hong Kong:
A Psychological Perspective ................................ 111
7.1 Introduction ..................................... 111
7.2 Motivation: A Psychology Perspective ............... 112
  7.2.1 Hierarchy of Needs Theory .................. 113
  7.2.2 Two Factor Theory ......................... 113
  7.2.3 Expectancy Theory ......................... 114
  7.2.4 Theory X and Y .......................... 115
  7.2.5 Hawthorne Investigations ................. 116
  7.2.6 Acquired Needs Theory ................... 116
  7.2.7 Goal Setting Theory ....................... 117
7.3 Application of Psychological Theories on Construction Safety Motivation ........................................ 117
7.4 Conclusions ................................................................. 119
References ..................................................................... 120

8 A Conceptual Study of Construction Workers’ Safety Performance from Safety Climate and Social Exchange Perspectives .................. 123
  8.1 Introduction ............................................................... 123
  8.2 Safety Performance .................................................... 125
  8.3 Organisation Climate, Safety Climate and Safety Performance ..................................................... 127
  8.4 Social Exchange, Perceived Organisation Support, Leader Member Exchange and Safety Behaviour ................. 129
    8.4.1 Social Exchange Theory (SET) ................................. 129
    8.4.2 Perceived Organizational Support (POS) ..................... 130
    8.4.3 Leader Member Exchange (LMX) ............................ 131
  8.5 Discussion and Conclusion ............................................ 132
References ..................................................................... 133
Construction Safety and Waste Management
An Economic Analysis
Li, R.Y.M.
2015, X, 137 p. 19 illus., 18 illus. in color., Hardcover
ISBN: 978-3-319-12429-2
