Contents

Analysis

A Less Conservative Guaranteed Cost Stabilization of Time-Varying Delayed CNNs ................................................. 3
  Mei Jiang, Hanlin He, and Lu Yan

Existence and Uniqueness of Almost Automorphic Solutions to Cohen-Grossberg Neural Networks with Delays ................ 12
  Xianyun Xu, Tian Liang, Fei Wang, and Yongqing Yang

A Proof of a Key Formula in the Error-Backpropagation Learning Algorithm for Multiple Spiking Neural Networks .............. 19
  Wenyu Yang, Dakun Yang, and Yetian Fan

Anti-Synchronization Control for Memristor-Based Recurrent Neural Networks ......................................................... 27
  Ning Li, Jinde Cao, and Mengzhe Zhou

Adaptive Pinning Synchronization of Coupled Inertial Delayed Neural Networks .......................................................... 35
  Jianqiang Hu, Jinde Cao, and Quanxin Cheng

The Relationship between Neural Avalanches and Neural Oscillations ...... 43
  Yan Liu, Jiawei Chen, and Liujun Chen

Reinforcement-Learning-Based Controller Design for Nonaffine Nonlinear Systems .................................................. 51
  Xiong Yang, Derong Liu, and Qinglai Wei

Multistability and Multiperiodicity Analysis of Complex-Valued Neural Networks .......................................................... 59
  Jin Hu and Jun Wang

Exponential Synchronization of Coupled Stochastic and Switched Neural Networks with Impulsive Effects ....................... 69
  Yangling Wang and Jinde Cao

The Research of Building Indoor Temperature Prediction Based on Support Vector Machine ....................................... 80
  Wenbiao Wang, Qi Cai, and Siyuan Wang

Towards the Computation of a Nash Equilibrium ........................................ 90
  Yu Lu and Ying He
Contents

Sensorless PMSM Speed Control Based on NN Adaptive Observer ............ 100
  Longhu Quan, Zhanshan Wang, Xiuchong Liu, and Mingguo Zheng

Neural-Network-Based Adaptive Fault Estimation for a Class
of Interconnected Nonlinear System with Triangular Forms ............... 110
  Lei Liu, Zhanshan Wang, Jinhai Liu, and Zhenwei Liu

Big Data Matrix Singular Value Decomposition Based on Low-Rank
Tensor Train Decomposition ........................................ 121
  Namgil Lee and Andrzej Cichocki

CSP-Based EEG Analysis on Dissociated Brain Organization
for Single-Digit Addition and Multiplication .......................... 131
  Lihan Wang, John Qiang Gan, and Haixian Wang

Lazy Fully Probabilistic Design of Decision Strategies .................. 140
  Miroslav Kárný, Karel Macek, and Tatiana V. Guy

Memristive Radial Basis Function Neural Network for Parameters
Adjustment of PID Controller ........................................... 150
  Xiaojuan Li, Shukai Duan, Lidan Wang, Tingwen Huang, and Yiran Chen

Finite-Time Stability of Switched Static Neural Networks ................ 159
  Yuanyuan Wu and Jinde Cao

Fixed-Priority Scheduling Policies and Their Non-utilization Bounds ... 167
  Guangyi Chen and Wenfang Xie

Modeling Dynamic Hysteresis of Smart Actuators with Fuzzy Tree ...... 175
  Yongxin Guo, Zhen Zhang, Jianqin Mao, Haishan Ding, and Yanhua Ma

Neuromodulatory-Based Model Predictive Control for Trajectory
Tracking of Autonomous Underwater Vehicles .......................... 184
  Xinzhe Wang and Jun Wang

Feedback-Dependence of Correlated Firing in Globally Coupled Networks ... 192
  Jinli Xie, Zhijie Wang, and Jianyu Zhao

Wilcoxon-Norm-Based Robust Extreme Learning Machine ............... 200
  Xiao-Liang Xie, Gui-Bin Bian, Zeng-Guang Hou,
  Zhen-Qiu Feng, and Jian-Long Hao

Modeling

An Artificial Synaptic Plasticity Mechanism for Classical
Conditioning with Neural Networks .................................... 213
  Caroline Rizzi Raymundo and Colin Graeme Johnson

XII Contents
An Application of Dynamic Regression Model and Residual Auto-Regressive Model in Time Series .................................................. 222
   Yu-zhen Lu, Ming-hui Qu, and Min Zhang

Reweighted $l_2$-Regularized Dual Averaging Approach for Highly Sparse Stochastic Learning ...................................................... 232
   Vilen Jumutc and Johan A.K. Suykens

Perceptual Learning Model on Recognizing Chinese Characters ........... 243
   Jiawei Chen, Yan Liu, Xiaomeng Li, and Liujun Chen

Hierarchical Solving Method for Large Scale TSP Problems ................. 252
   Jingqing Jiang, Jingying Gao, Gaoyang Li, Chunguo Wu, and Zhili Pei

Gaussian Process Learning: A Divide-and-Conquer Approach ............... 262
   Wenye Li

A Kernel ELM Classifier for High-Resolution Remotely Sensed Imagery Based on Multiple Features ............................................. 270
   Wei Yao, Zhigang Zeng, Cheng Lian, and Huiming Tang

Early-Stopping Regularized Least-Squares Classification ...................... 278
   Wenye Li

Z-Type Model for Real-Time Solution of Complex ZLE ....................... 286
   Long Jin, Hongzhou Tan, Ziyi Luo, Zhan Li, and Yunong Zhang

A Dynamic Generation Approach for Ensemble of Extreme Learning Machines ............................................................. 294
   Hualong Yu, Yulong Yuan, Xibei Yang, and Yuanyuan Dan

Saliency Detection: A Divisive Normalization Approach ..................... 303
   Ying Yu, Jie Lin, and Jian Yang

A Novel Neural Network Based Adaptive Control for a Class of Uncertain Strict-Feedback Nonlinear Systems ............................... 312
   Baobin Miao and Tieshan Li

Rough Sets Theory Approach to Extensive Risk Assessment Model in Social Risk ................................................................. 321
   Guangyao Gu, Yaodong Le, Fajie Wei, and Chen Li

Kernel Parameter Optimization for KFDA Based on the Maximum Margin Criterion .............................................................. 330
   Yue Zhao and Jinwen Ma
A Polynomial Time Solvable Algorithm to Binary Quadratic Programming Problems with $Q$ Being a Seven-Diagonal Matrix and Its Neural Network Implementation ........................................... 338
  Shenshen Gu, Jiao Peng, and Rui Cui

A New Nonlinear Neural Network for Solving QP Problems ................. 347
  Yinhui Yan

Untrained Method for Ensemble Pruning and Weighted Combination ........ 358
  Bartosz Krawczyk and Michał Woźniak

An Improved Learning Algorithm with Tunable Kernels for Complex-Valued Radial Basis Function Neural Networks. ............................ 366
  Xia Mo, He Huang, and Tingwen Huang

Combined Methodology Based on Kernel Regression and Kernel Density Estimation for Sign Language Machine Translation ...................... 374
  Mehrez Boulares and Mohamed Jemni

Adaptive Intelligent Control for Continuous Stirred Tank Reactor with Output Constraint ......................................................... 385
  Dong-Juan Li and Yan-Jun Liu

Applications

Modeling and Application of Principal Component Analysis in Industrial Boiler ............................................................................. 395
  Wenbiao Wang, Lan Chen, Xinjie Han, Zhanyuan Ge, and Siyuan Wang

An Orientation Column-Inspired Contour Representation and Its Application in Shape-Based Recognition ................................. 405
  Hui Wei and Wentao Ge

Region Based Image Preprocessor for Feed-Forward Perceptron Based Systems .............................................................................. 414
  Keith A. Greenhow and Colin G. Johnson

Image Denoising with Signal Dependent Noise Using Block Matching and 3D Filtering ................................................................. 423
  Guangyi Chen, Wenfang Xie, and Shuling Dai

Different-Level Simultaneous Minimization with Aid of Ma Equivalence for Robotic Redundancy Resolution ................................. 431
  Binbin Qiu, Dongsheng Guo, Hongzhou Tan, Zhi Yang, and Yunong Zhang

Content-Adaptive Rain and Snow Removal Algorithms for Single Image ................................. 439
  Shujian Yu, Yixiao Zhao, Yi Mou, Jinghui Wu, Lu Han, Xiaopeng Yang, and Baojun Zhao
Data-Driven Bridge Detection in Compressed Domain from Panchromatic Satellite Imagery. ................................................................. 449
  Yixiao Zhao, Shujian Yu, Jinghui Wu, Lu Han, Zijing Chen,
  Xiaopeng Yang, and Baojun Zhao

Fast Nonnegative Tensor Factorization by Using Accelerated Proximal Gradient. ................................................................. 459
  Guoxu Zhou, Qibin Zhao, Yu Zhang, and Andrzej Cichocki

Multiclassifier System with Fuzzy Inference Method Applied to the Recognition of Biosignals in the Control of Bioprosthetic Hand. .......... 469
  Marek Kurzynski and Andrzej Wolczowski

Target Detection Using Radar in Heavy Sea Clutter by Polarimetric Analysis and Neural Network. .................................................. 479
  Ji Eun Kim, Sang Min Lee, Seung-Phil Lee, SooBum Kim,
  Young-Soo Kim, and Chan Hong Kim

Human Action Recognition Based on Difference Silhouette and Static Reservoir ................................................................. 489
  Danchen Zheng and Min Han

Metric-Based Multi-Task Grouping Neural Network for Traffic Flow Forecasting ................................................................. 499
  Haikun Hong, Wenhao Huang, Guojie Song, and Kunqing Xie

Object Tracking with a Novel Method Based on FS-CBWH within Mean-Shift Framework .................................................. 508
  Dejun Wang, Yongtao Shi, Weiping Sun, and Shengsheng Yu

Bayesian Covariance Tracking with Adaptive Feature Selection ................................................................. 516
  Dejun Wang, Lin Li, Wei Liu, Weiping Sun, and Shengsheng Yu

Single-Trial Detection of Error-Related Potential by One-Unit SOBI-R in SSVEP-Based BCI ................................................................. 524
  Janir Nuno da Cruz, Ze Wang, Chi Man Wong, and Feng Wan

Generalized Regression Neural Networks with K-Fold Cross-Validation for Displacement of Landslide Forecasting ................................................................. 533
  Ping Jiang, Zhigang Zeng, Jiejie Chen, and Tingwen Huang

One-Class Classification Ensemble with Dynamic Classifier Selection ................................................................. 542
  Bartosz Krawczyk and Michał Woźniak

A Massive Sensor Data Streams Multi-dimensional Analysis Strategy Using Progressive Logarithmic Tilted Time Frame for Cloud-Based Monitoring Application ................................................................. 550
  Xin Song, Cuirong Wang, Yanjun Chen, and Jing Gao
Evolutionary Clustering Detection of Similarity in Neuronal Spike Patterns ................................................................. 558
  
  Hu Lu, Zhe Liu, and Yuqing Song

Fast and Effective Image Segmentation via Superpixels and Adaptive Thresholding ......................................................... 568
  
  Yunsheng Jiang and Jinwen Ma

Diagonal Log-Normal Generalized RBF Neural Network for Stock Price Prediction ....................................................... 576
  
  Wenli Zheng and Jinwen Ma

Design of a Greedy V2G Coordinator Achieving Microgrid-Level Load Shift ......................................................................... 584
  
  Junghoon Lee and Gyung-Leen Park

PolSAR Image Segmentation Based on the Modified Non-negative Matrix Factorization and Support Vector Machine ................................................................. 594
  
  Jianchao Fan, Jun Wang, and Dongzhi Zhao

Solving Path Planning of UAV Based on Modified Multi-Population Differential Evolution Algorithm ........................................... 602
  
  Zhengxue Li, Jie Jia, Mingsong Cheng, and Zhiwei Cui

Consensus for Higher-Order Multi-agent Networks with External Disturbances ........................................................................ 611
  
  Deqiang Ouyang, Haijun Jiang, Cheng Hu, and Yingying Liu

The Research of Document Clustering Topical Concept Based on Neural Networks ............................................................ 621
  
  Xian Fu and Yi Ding

The Research of Reducing Misregistration Based on Image Mosaicing ............................................................................... 629
  
  Yi Ding and Xian Fu

A Parallel Image Segmentation Method Based on SOM and GPU with Application to MRI Image Processing ......................................................... 637
  
  Ailing De, Yuan Zhang, and Chengan Guo

Author Index ........................................................................................................................................................................ 647
