Preface

This volume consists of the selected revised papers based on the presentations at the Cyber Security and Privacy (CSP) Forum 2014, collocated with The Annual Privacy Forum conference, held in Athens, Greece, during May 21–22, 2014. This volume builds on the experience of the volume of the CSP FORUM 2013 (published by Springer, CCIS 182). It is edited with the intention and ambition to develop a “portfolio” of European research. It aims to disseminate research outcomes beyond research communities by proving a single access point for different stakeholders.

This volume captures ongoing research activities and results carried out within European projects mostly funded within the EU’s framework research programs. The conference program consisted of 15 different tracks involving a variety of presentations and panel discussions covering the key challenges and strategies available to effectively manage employee, citizen, and corporate trust. The conference provided an opportunity for those in business, public sector, research, and government who are involved in the policy, security, systems, and processes surrounding security and privacy technologies. The papers collected in this volume highlight research conducted by the following EU projects (in alphabetical order):

- **A4Cloud**
  Accountability for Cloud and other Future Internet Services
  FP7-317550

- **ABC4Trust**
  Attribute-based Credentials for Trust
  FP7-257782

- **Aniketos**
  Project Full Title: Secure and Trustworthy Composite Services
  FP7-257930

- **FINESCE**
  Future Internet Smart Utility Services
  FP7-604677

- **FI-WARE**
  Future Internet Core Platform
  FP7-285248

- **IPACSO**
  Innovation Framework for Privacy and Cyber Security Market Opportunities
  FP7-609892

- **PRIPARE**
  PReparing Industry to Privacy-by-design by supporting its Application in Research
  FP7-610613

- **SecCord**
  SECurity and trust COoRDination and enhanced collaboration
  FP7-316622
This two-day conference organized by the SecCord project invited presenters, panellists, and exhibitors to contribute to this collection of selected papers. Two types of papers were solicited to be published in the post-proceedings of the conference:

- Practical Experience Reports and Tools presenting in-depth description of practitioner experiences, case studies, and tools
- Research Papers presenting recent original research results providing new insights into the community.

Papers submitted were peer-reviewed by (at least two to three) Program Committee members and experts. The peer-review process provided authors with valuable feedback in order to improve their papers. The selected papers grouped into thematic parts of these proceedings capture just a snapshot of the two-day conference, which provided an opportunity to present and debate ongoing cyber security and privacy research and development in Europe. These proceedings intend to inform researchers, practitioners, and policy-makers about research developments and technological opportunities for innovation in cyber security and privacy.

We would like to thank all the people who made the publication of these proceedings possible, in particular the authors, the Program Committee members and reviewers, the conference organizers, and the supporting organizations.
