1 Numerical Simulations of Defective Structures: The Nature of Oxygen Vacancy in Non-reducible (MgO, SiO₂, ZrO₂) and Reducible (TiO₂, NiO, WO₃) Oxides

Gianfranco Pacchioni

1.1 Introduction: The Role of Defects in Oxide Materials ........... 1
1.2 Treating Defects in Solids: Periodic Models and Local Modes .................................................. 4
  1.2.1 Periodic Models ............................................. 4
  1.2.2 Local Cluster Models ................................. 5
  1.2.3 Embedding Schemes .................................. 6
1.3 Problems of DFT in Describing Defects in Insulators: Some Instructive Examples ......................... 8
1.4 The Oxygen Vacancy in Insulating and Semiconducting Oxides .................................................. 10
  1.4.1 Non-reducible Oxides: SiO₂, MgO, ZrO₂ .................. 11
  1.4.2 Reducible Oxides: TiO₂, NiO and WO₃ ............. 16
1.5 Conclusions .................................................. 22
References ....................................................... 24

2 Atomic Scale Characterization of Defects on Oxide Surfaces

Niklas Nilius, Martin Sterrer, Markus Heyde and Hans-Joachim Freund

2.1 Introduction .................................................. 29
2.2 Point Defects .................................................. 30
  2.2.1 Non-reducible Oxides: MgO .............................. 30
  2.2.2 Reducible Oxides ............................................ 48
2.3 Line Defects .................................................. 58
  2.3.1 Dislocation Network in Alumina Thin Films ............ 58
  2.3.2 Line Defects in MgO Thin Films ......................... 63
  2.3.3 Electron Trapping in MgO Line Defects ............... 66
3 Defects on TiO$_2$—Key Pathways to Important Surface Processes

Zhen Zhang and John T. Yates Jr.

3.1 Overview of Defects in Solids

3.1.1 0D Defects (Point Defects)

3.1.2 1D Defects (Line Defects)

3.1.3 2D Defects (Interfacial Defects)

3.1.4 3D Defects (Bulk Defects)

3.1.5 Defects on Surfaces

3.2 Crystal Forms of TiO$_2$

3.3 Oxygen Point Defects

3.3.1 Oxygen Vacancy

3.3.2 Chemisorbed O$_t$ Defect

3.4 Ti Point Defects

3.5 H Point Defects on TiO$_2$

3.5.1 OH/TiO$_2$

3.5.2 Atomic H/TiO$_2$

3.6 Doping of TiO$_2$

3.7 Summary

References

4 Excess Electrons at Oxide Surfaces

Sylvie Bourgeois, Bruno Domenichini and Jacques Jupille

4.1 Introduction

4.2 Rutile TiO$_2$(110) Surface

4.2.1 Point Defects Versus Excess Charges

4.2.2 Spectroscopic Fingerprint of Excess Charges

4.2.3 Location of Excess Electrons

4.2.4 Excess Charges Located Independently of Their Origin

4.3 Adsorbates on Rutile (110)

4.3.1 Molecular and Dissociative Adsorption of Oxygen

4.3.2 Hydroxylated Sites

4.4 Anatase

4.4.1 Reduced Anatase

4.4.2 Defective Anatase (101) Surface

4.4.3 Negatively Charged Oxygen on Reduced Anatase (101)

4.5 Conclusion

8 Noncontact AFM Imaging of Atomic Defects on the Rutile TiO₂(110) Surface

Jeppe V. Lauritsen

8.1 Introduction ........................................ 241
8.2 Noncontact Atomic Force Microscopy .................. 242
  8.2.1 Principle of Noncontact Atomic Force Microscopy .... 243
  8.2.2 Contrast Formation in Noncontact AFM Images .... 244
  8.2.3 Noncontact AFM Image Simulations ................ 247
8.3 Defects on Rutile TiO₂(110) Studied with Noncontact AFM ........................................ 249
  8.3.1 The Rutile TiO₂(110) Surface and Its Surface Defects ...... 250
  8.3.2 Noncontact AFM Contrast on the Rutile TiO₂(110) Surface .. 253
  8.3.3 Tip Influence on the nc-AFM Contrast on the Rutile TiO₂(110) Surface .................. 257
  8.3.4 Force Spectroscopy on the Rutile TiO₂(110) Surface .......... 259
  8.3.5 Water Splitting Products, H Diffusion and Subsurface H on the TiO₂(110) Surface .......... 262
  8.3.6 Summary and Perspectives ...................... 265

9 Defects in Metal Oxide Nanoparticle Powders ................. 273

Thomas Berger and Oliver Diwald

9.1 Introduction ........................................ 273
  9.1.1 Particle Systems and the Hierarchy of Defects ........ 273
  9.1.2 Stoichiometry, Levels of Oxygen Deficiency and n-Type Doping .... 278
9.2 Experimental Probes for Defects in Nanoparticle Ensembles ........................................ 280
  9.2.2 Point Defects and Experimental Fingerprints .......... 280
9.3 The Quest for Morphologically Defined Particle Systems
9.3.1 Science of Synthesis
9.3.2 MgO Powders as Model System for Highly Dispersed Solids
9.3.3 Particle Interfaces and the Microstructure of Powders
9.3.4 Powders of Facetted TiO₂ Particles
9.4 Summary and Outlook
