# Contents

1. **Introduction to Cell Therapy in Brain Injury** ........................................ 1  
   David C. Hess

2. **Cell-Based Therapeutics in Stroke: An Industry Perspective** ............... 11  
   Martin M. Bednar

3. **Autologous Mesenchymal Stem Cell Therapy in Patients with Stroke** ........................................................................ 21  
   Oh Young Bang

4. **Treatment of Autologous Bone Marrow Mononuclear Cells for Acute and Subacute Stroke** ................................................................. 37  
   Yukiko Kasahara, Tomohiro Matsuyama and Akihiko Taguchi

5. **Clinical Development of MultiStem® for Treatment of Injuries and Diseases of the Central Nervous System** ........................................ 47  
   Robert W. Mays

6. **Intra-arterial Approaches to Stem Cell Therapy for Ischemic Stroke** ........................................................................................................ 65  
   Vikram Jadhav, Pallab Bhattacharya and Dileep R. Yavagal

7. **Neural Stem Cells in Stroke: Intracerebral Approaches** .......................... 91  
   Nathan C. Manley, Ricardo L. Azevedo-Pereira, Tonya M. Bliss and Gary K. Steinberg

8. **The CTX Human Neural Stem Cell Line and the PISCES Stroke Trial** ........................................................................................................ 111  
   Keith W. Muir and John D. Sinden
9 Induced Pluripotent Stem Cells as a Cell-Based Therapeutic in Stroke............................................................ 129
David C. Hess, Nasir Fakhri and Franklin D. West

10 Induced Pluripotent Stem-Cell-Derived Neural Cell Types in Treatment of Stroke .......................................................... 147
Vivian W. Lau, Simon R. Platt, Steven L. Stice and Franklin D. West

11 Preconditioning and Cell-Based Therapeutics ................................................ 173
David C. Hess and Md Nasrul Hoda

12 Tracking of Administered Progenitor Cells in Brain Injury and Stroke by Magnetic Resonance Imaging .................................................. 187
Bhagelu R. Achyut and Ali S. Arbab

13 Biomaterials Application in Stem Cell Therapies for Stroke.......................... 213
Pouria Moshayedi and S. Thomas Carmichael

14 A Stem-Cell-Derived Cell-Free Therapy for Stroke: Moving Conditioned Medium into Clinical Trial.................................................. 247
Brian H. Johnstone and Keith L. March

15 Pathophysiology of Traumatic Brain Injury: Rationale and Role for Cellular Therapies.............................................................. 267
George Paul Liao and Charles S. Cox, Jr.

16 Stem Cell Therapy for Neonatal Hypoxic–Ischemic Brain Injury ........ 307
James Carroll

17 Cell-Based Therapies in Neonatal Stroke ................................................ 321
Masahiro Tsuji and Michael V. Johnston

18 Issues in Clinical Trial Design in Stem Cell Trials After Stroke ............... 351
Steven C. Cramer

Index.................................................................................................................. 365
Cell Therapy for Brain Injury
Hess, D.C. (Ed.)
2015, XI, 369 p. 41 illus., 35 illus. in color., Hardcover
ISBN: 978-3-319-15062-8
