<b>1</b>	<b>Bayesian Methods for Intelligent Task Assignment in Crowdsourcing Systems</b>	<b>1</b>
	Edwin Simpson and Stephen Roberts	
1.1	Introduction	1
1.2	Related Work	3
1.3	Case Study: TREC Crowdsourcing Challenge	5
1.4	DynIBCC for Combining Probabilities	6
1.4.1	Variational Inference Algorithm for DynIBCC	8
1.5	TREC Results Using DynIBCC + Text Features	10
1.6	A Utility Function for Intelligent Tasking	13
1.6.1	Exploitation and Exploration	16
1.7	Hiring and Firing for Crowdsourcing	18
1.7.1	Hiring and Firing Algorithm	19
1.7.2	Computational Complexity	20
1.8	Hiring and Firing Experiments	21
1.8.1	Simulated Agents	21
1.8.2	Alternative Methods	22
1.8.3	Results with TREC Documents	23
1.8.4	Synthetic Data Set	26
1.8.5	Results with Synthetic Data	26
1.8.6	Summary of Results	26
1.9	Discussion and Future Work	29
	References	30
<b>2</b>	<b>Designing Societies of Robots</b>	<b>33</b>
	Pablo G. Esteban and David Ríos Insua	
2.1	Introduction	33
2.2	Supporting a Competing Agent	34
2.3	Supporting Cooperative Agents	38
2.4	Competition or Cooperation?	39
2.5	Computational Experience	41

2.5.1	Basic Setting . . . . .	42
2.5.2	Forecasting Models . . . . .	42
2.5.3	Preference Model . . . . .	43
2.5.4	Competitive Scenario . . . . .	46
2.5.5	Cooperative Scenario. . . . .	48
2.6	Discussion . . . . .	51
	References. . . . .	52
<b>3</b>	<b>On the Origins of Imperfection and Apparent Non-rationality . . .</b>	<b>55</b>
	Miroslav Kárný and Tatiana V. Guy	
3.1	Introduction . . . . .	55
3.1.1	Fully Probabilistic Design of Decision Strategies . . . . .	56
3.1.2	Formal Description of Fully Probabilistic Design . . . . .	57
3.1.3	Discussed Decision-Making Aspects . . . . .	61
3.1.4	Layout. . . . .	61
3.2	Quantitative Description of Preferences . . . . .	62
3.2.1	Fully Probabilistic Design of DM Strategies. . . . .	62
3.2.2	Completion of Preference Ordering. . . . .	64
3.2.3	Ways to Preference Elicitation . . . . .	65
3.3	On Imperfect Use of Imperfect Normative Theory. . . . .	71
3.3.1	Rationality Behind Non-rational Decision Making. . . . .	72
3.3.2	Approximate Learning. . . . .	73
3.3.3	Approximate Design of Strategy. . . . .	79
3.4	Decision-Maker Induced Internals . . . . .	81
3.4.1	Deliberation Effort and Sequential Decision Making . . . . .	81
3.4.2	The Decision-Maker's Role . . . . .	84
3.5	Concluding Remarks . . . . .	86
	References. . . . .	86
<b>4</b>	<b>Lasso Granger Causal Models: Some Strategies and Their Efficiency for Gene Expression Regulatory Networks . . . . .</b>	<b>91</b>
	Kateřina Hlaváčková-Schindler and Sergiy Pereverzyev Jr.	
4.1	Introduction . . . . .	92
4.1.1	Multivariate Granger Causality . . . . .	93
4.1.2	Modifications of the Multivariate Granger Causality . . . . .	94
4.2	Gene Regulatory Networks and Gene Expressions . . . . .	95
4.2.1	Causality in Gene Regulatory Networks. . . . .	96
4.3	Graphical Lasso Granger Methods . . . . .	96
4.3.1	Graphical Lasso Granger Method . . . . .	97
4.4	Applied Quality Measures . . . . .	98
4.5	Optimal Graphical Lasso Granger Estimator. . . . .	100
4.5.1	Thresholding Strategy . . . . .	102

4.5.2	An Automatic Realization of the GLG-Method. . . . .	104
4.5.3	Copula Granger Method . . . . .	105
4.5.4	Dynamic Bayesian Networks and Ordinary Differential Equations . . . . .	107
4.6	Application of the Methods to Gene Regulatory Networks: Experimental Results . . . . .	110
4.7	Conclusion. . . . .	115
	References. . . . .	115
<b>5</b>	<b>Cooperative Feature Selection in Personalized Medicine</b> . . . . .	<b>119</b>
	Dietlind Zühlke, Gernoth Grunst and Kerstin Röser	
5.1	Relation to the Book’s Topic . . . . .	120
5.2	Motivation and Background . . . . .	120
5.3	Feature Group Selection in Biomedical Research . . . . .	122
5.3.1	Discussion of Feature Selection Methods for Biomedical Research . . . . .	123
5.3.2	Feature Group Selection Embedded in Classification—vb-GLVQ . . . . .	124
5.4	The Application Context—Breast Cancer Research Project Exprimage. . . . .	129
5.4.1	Aim and Scope of Project . . . . .	129
5.4.2	Data Available . . . . .	129
5.4.3	Cooperative Feature Pre-selection . . . . .	131
5.5	Tests in the Application Context. . . . .	134
5.5.1	Applied Feature Groups and Their Dissimilarity Measures . . . . .	134
5.5.2	Test Setting . . . . .	135
5.5.3	Results for Different Pre-selection Strategies . . . . .	137
5.5.4	Tentative Comparison of Recognition Rates with Other Modelling Methods. . . . .	139
5.6	Discussion . . . . .	141
5.7	Summary and Conclusion . . . . .	142
	References. . . . .	143
<b>6</b>	<b>Imperfect Decision Making and Risk Taking Are Affected by Personality</b> . . . . .	<b>145</b>
	Sarah K. Mesrobian, Michel Bader, Lorenz Götte, Alessandro E.P. Villa and Alessandra Lintas	
6.1	<i>Homo Economicus</i> and <i>Homo Sociologicus</i> . . . . .	146
6.2	Personality . . . . .	148
6.3	Neurobiological Background . . . . .	150
6.4	Brain Imaging Studies . . . . .	152
6.5	Methods: Electrophysiological Recordings . . . . .	155
6.6	STUDY 1: Ultimatum Game . . . . .	156

- 6.6.1 Participants Task 1 . . . . . 156
- 6.6.2 Behavioral Task 1. . . . . 156
- 6.6.3 Results Task 1 . . . . . 158
- 6.7 STUDY 2: Investment Game . . . . . 161
  - 6.7.1 Participants Task 2 . . . . . 163
  - 6.7.2 Behavioral Task 2. . . . . 164
  - 6.7.3 Results Task 2 . . . . . 165
- 6.8 Discussion . . . . . 174
- 6.9 General Conclusions . . . . . 178
- References. . . . . 178

Decision Making: Uncertainty, Imperfection,  
Deliberation and Scalability

Guy, T.V.; Karny, M.; Wolpert, D. (Eds.)

2015, XII, 184 p. 41 illus., 13 illus. in color., Hardcover

ISBN: 978-3-319-15143-4
