3 Scattering Variables-Based Control of Bilateral Teleoperators

3.1 Introduction

3.2 The Scattering-Wave Variable-Based Bilateral Teleoperation Architecture

3.2.1 Control Architecture

3.2.2 Stability and Tracking Performance of Scattering Variables-Based Bilateral Teleoperators

3.3 Improving Tracking Performance

3.4 Experimental Verification

3.5 Summary and Notes

4 Synchronization of Bilateral Teleoperators

4.1 Introduction

4.2 Passivity and Output Synchronization of Interconnection of Passive Systems

4.3 Application to Bilateral Teleoperation

4.3.1 Master-Slave Velocity Synchronization

4.3.2 Master-Slave State Synchronization

4.4 Experiments

4.5 Summary and Notes

Part II Passivity-Based Visual Feedback Control and Estimation

5 Foundation: Rigid Motions and Image Formation

5.1 Rigid Body Motions

5.2 Inherent Passivity in Rigid Body Motion

5.3 Geometry of Image Formation

5.3.1 Monocular Camera Model

5.3.2 Panoramic Camera Model

6 Passivity-Based Visual Feedback Estimation

6.1 Introduction

6.2 Visual Feedback Estimation

6.2.1 Problem Formulation

6.2.2 Passivity in Visual Feedback Estimation

6.2.3 Visual Motion Observer and Stability Analysis

6.3 Extension to a Panoramic Camera and Verification

6.3.1 Construction of Estimation Error Vector

6.3.2 Experimental Verification

6.4 Visual Motion Observer with Object Motion Model

6.4.1 Estimation Error System with Object Motion Model
6.4.2 Visual Motion Observer with Object Motion Model .......................... 124
6.4.3 Experimental Verification .............................................. 129
6.5 Summary ................................................................. 138

7 Passivity-Based Visual Feedback Control ................................... 139
7.1 Introduction .............................................................. 139
7.2 Visual Feedback Control ................................................ 140
  7.2.1 Estimation/Control Error System ................................. 140
  7.2.2 Passivity in Visual Feedback Control ............................ 143
7.3 Dynamic Visual Feedback Control ....................................... 146
  7.3.1 Visual Feedback Set-Point Control ............................... 147
  7.3.2 Visual Feedback Tracking Control ............................... 150
  7.3.3 Stability and Tracking Performance Analysis .................. 154
  7.3.4 Experimental Verification ......................................... 158
7.4 Summary and Notes ...................................................... 164

Part III Passivity-Based Cooperative Control and Estimation

8 Output Synchronization for Network of Passive Systems ............ 167
  8.1 Introduction .......................................................... 167
  8.2 Passivity-Based Output Synchronization for a Network of Passive Systems .............................................. 168
    8.2.1 Network of Passive Systems ................................... 168
    8.2.2 Output Synchronization with Linear Coupling .............. 169
    8.2.3 Output Synchronization with Nonlinear Coupling ......... 173
    8.2.4 Examples and Verification ...................................... 174
  8.3 Output Synchronization with Time Delay ........................... 178
    8.3.1 Delay Output Synchronization for a Network of Passive Systems .............................................. 179
    8.3.2 Delay Output Synchronization for Systems Feedback Equivalent to Passive Systems ............... 180
  8.4 Summary and Notes .................................................... 184

9 Attitude Synchronization for Rigid Body Networks ................. 185
  9.1 Introduction .......................................................... 185
  9.2 Passivity-Based Attitude Synchronization ........................ 186
    9.2.1 Rigid Body Networks and Attitude Synchronization .......... 186
    9.2.2 Passivity-Based Attitude Synchronization Law ............ 189
    9.2.3 Verification .................................................. 191
  9.3 Connectivity Analysis ............................................... 196
    9.3.1 Algebraic Connectivity ........................................ 196
Passivity-Based Control and Estimation in Networked Robotics
Hatanaka, T.; Chopra, N.; Fujita, M.; Spong, M.
