Contents

1 Cardiac Cytoarchitecture in Health and Disease ................................. 1
   Marlene Pluess and Elisabeth Ehler

2 In Vitro Tools for Quantifying Structure–Function Relationships in Cardiac Myocyte Cells and Tissues ............................... 15
   Meghan B. Knight, Anna Grosberg, and Megan L. McCain

3 The Intercalated Disc: A Focal Point for Sarcomere Growth and Disease ................................................................. 41
   Pauline M. Bennett

4 Dynamics of Actin in the Heart: Defining Thin Filament Length ........ 71
   Christine A. Henderson and Carol C. Gregorio

5 Ca²⁺ Regulation of the Cardiac Thin Filament ................................. 89
   Anthony D. Vetter, Brian R. Thompson, and Joseph M. Metzger

6 Posttranslational Modification of the Titin Springs: Dynamic Adaptation of Passive Sarcomere Stiffness ............................. 109
   Martina Krüger

7 The M-Band: Not Just Inert Glue but Playing an Active Role in the Middle of the Sarcomere .............................................. 125
   Irina Agarkova and Elisabeth Ehler

8 Sarcomeric Signaling ................................................................. 141
   Robert Frauen, Derk Frank, and Norbert Frey

9 The Nuclear Envelope in Cardiac Health and Disease .................... 161
   Daniel Brayson and Catherine M. Shanahan

10 AMP-Activated Protein Kinase: A Metabolic Stress Sensor in the Heart ................................................................. 187
    Martin Pelosse, Malgorzata Tokarska-Schlattner, and Uwe Schlattner
