

Contents

1	Addressing Three Wicked Problems	1
1.1	Introduction	1
1.2	Climate Change	2
1.3	Resource Depletion and Environmental Degradation	3
1.4	Population Growth	4
1.5	A Manageable Solution: How Cities Address the Challenges	6
1.6	Aim of the Book	7
1.7	Structure of Book	7
	References.	10
2	The Global Shift to a Low-Carbon Economy	13
2.1	Introduction	13
2.2	Tackling Emissions: The Front-End Versus End-User	14
2.3	End-User Carbon Abatement	14
2.4	Using Cities to Lead the Decarbonisation Effort	16
2.5	Recognising Carbon Reduction in Urban Development	16
2.6	Conclusion.	17
	References.	18
3	Why Cities?	19
3.1	Introduction	19
3.2	The Vulnerability of Cities to Climate Change	19
3.3	Cities' Contribution to Carbon Emissions.	20
3.4	Why Cities Are Fundamental in Tackling Climate Change.	22
3.5	Carbon and the Built Environment—An Australian Perspective	23
3.5.1	Urban Form	24
3.5.2	Transport	25

3.5.3	Materials and Construction	27
3.5.4	The Role of Energy Efficiency	29
3.5.5	Resource Management	29
3.5.6	Density and Urban Form	29
3.6	Conclusion	31
	References	31
4	Low-Carbon Resource Management in Cities	37
4.1	Introduction	37
4.2	Centralised Versus Decentralised Management Approaches	37
4.2.1	Electricity Generation	39
4.2.2	Water Management	43
4.2.3	Waste Management	48
4.3	Closing Resource Loops	50
4.4	Green Infrastructure	50
4.5	Conclusion	52
	References	52
5	The Precinct—The New Scale for Decarbonising	57
5.1	Introduction	57
5.2	Defining the Precinct	59
5.3	Why the Precinct Scale?	59
5.3.1	Inclusion of Additional Urban Factors	60
5.3.2	Scale of Communities	60
5.3.3	Scale of Developers	61
5.3.4	Access to Local Government	61
5.3.5	Scale of Emerging Low Carbon Technologies	62
5.4	Conclusion	63
	References	63
6	Eco-Precincts	65
6.1	Introduction	65
6.2	International Case Studies	66
6.2.1	BedZED—UK	66
6.2.2	Vauban, Freiburg—Germany	69
6.2.3	B001, Western Harbour, Malmo—Sweden	72
6.2.4	Hammarby Sjostad, Stockholm—Sweden	74
6.2.5	Masdar—United Arab Emirates	76
6.2.6	Dongtan—China	79
6.3	Australian Case Studies	81
6.3.1	City of Sydney—NSW	81
6.3.2	City of Fremantle—Western Australia	84
6.3.3	North Port Quay—Western Australia	86

6.4	Comparing Developments	89
6.4.1	Variations in Claims	89
6.4.2	Emissions Sources Included in Claims.	90
6.4.3	Inconsistent Reporting	91
6.4.4	Problems with Scaling up Low-Carbon Developments.	92
6.4.5	Direction Needed	92
6.5	Conclusion.	92
	References.	93
7	The Rise of Carbon Neutrality	95
7.1	Introduction	95
7.2	Defining Carbon Neutrality	96
7.3	Benefits of Carbon Neutrality	99
7.4	Carbon Neutrality: Carbonwash or the Real Deal?.	102
7.5	Increasing the Credibility of Carbon Claims	103
7.6	Carbon-neutral Cities and Urban Development	104
7.6.1	Precinct-Scale Carbon Claims.	105
7.7	The Need for a Sector-Specific Framework	106
7.7.1	Accounting for Carbon in Urban Development.	107
7.8	Defining the Carbon Footprint	108
7.9	The Offset Polemic	109
7.9.1	The Perceived Fundamental Flaw	110
7.9.2	The Voluntary Carbon Market—Integrity of Offsets.	111
7.10	Conclusion.	112
	References.	112
8	Counting Carbon in Cities	117
8.1	Introduction	117
8.2	Determining the GHG Contribution of Cities	117
8.3	Frameworks and Initiatives for Calculating City-based Emissions	119
8.3.1	ICLEI—Local Governments for Sustainability	119
8.3.2	Global Protocol for Community-scale GHG Emissions	123
8.4	Programmes Facilitating Emission Analysis and Reporting.	123
8.4.1	C40 Cities and the Clinton Climate Initiative	123
8.4.2	CDP Cities.	124
8.5	Discourse on City GHG Methodologies and Attribution.	125
8.6	Conclusion.	128
	References.	129

9 Rating Carbon in Urban Development 131

9.1 Precinct-Scale Accounting Schemes 131

9.2 International Tools 135

9.2.1 BREEAM Communities 135

9.2.2 LEED Neighbourhood Development 136

9.2.3 CASBEE Urban Development 136

9.2.4 One Planet Communities 137

9.3 Australian Tools 137

9.3.1 Green Star Communities 137

9.3.2 EnviroDevelopment 138

9.3.3 PRECINX 139

9.3.4 eTool 139

9.4 Issues Around Precinct-Scale Tools 140

9.4.1 Measurement Methods 140

9.4.2 Point-Based Systems and Use of Weightings 141

9.4.3 Complexity 142

9.4.4 Phase of Adoption of the Tool 142

9.4.5 Performance and Evaluation 143

9.4.6 Functionality of Tools: Decision-Making
Versus Assessment and Rating 144

9.5 The Need for a Sustainability Framework 145

9.6 Conclusion 146

References 147

10 Certifying for Carbon Neutrality 149

10.1 Introduction 149

10.2 Avoiding False and Misleading Claims 150

10.3 What Is Certification and Who Conducts It? 151

10.4 Certification Schemes 152

10.4.1 CarboNZero 152

10.4.2 Certified Carbon Neutral Global
Standard—The CarbonNeutral® Company 153

10.4.3 PAS 2060:2010—Specification for the Demonstration
of Carbon Neutrality 153

10.4.4 Carbon Neutral 154

10.4.5 Climate Friendly 154

10.4.6 NoCO₂—The Carbon Reduction Institute 155

10.4.7 Carbon Neutral—ICLEI 155

10.4.8 NCOS Carbon Neutral Program—Low
Carbon Australia 155

10.5 Analysis of Existing Schemes 156

10.5.1 Vested Interests 156

10.5.2 Government Endorsement 157

10.5.3 A Global Leader 157

10.6	Conclusion	158
