Contents

Part I  EAM Strategies

Market Risk Management in the Context of Engineering Asset Management .................................................. 3
Eben Maré

Application of a Performance-driven Total Cost of Ownership (TCO) Evaluation Model for Physical Asset Management ................. 11
Irene Roda and Marco Garetti

Government Entity Contribution to an Effective Partnership Privatisation .............................................................. 25
David Mills

Implications of Cadastral Systems on Engineering Asset Management .............................................................. 39
Anthea Amadi-Echendu and Joe Amadi-Echendu

A Decision Support Framework for Prioritization of Engineering Asset Management Activities Under Uncertainty .............................. 49
Michael E. Cholette, Lin Ma, Lawrence Buckingham, Lutfiye Allahmanli, Andrew Bannister and Gang Xie

Planning Rehabilitation Strategy of Sewer Asset Using Fast Messy Genetic Algorithm ........................................... 61
Jaena Ryu and Kyoo-hong Park
Methods and Tools for Sustainable Manufacturing
Networks—Results of a Case Study ........................................ 73
Teuvo Uusitalo, Helena Kortelainen, Padmakshi Rana,
Susanna Kunttu and Steve Evans

Part II Condition, Risk and Vulnerability Assessments

A Modeling Approach for Infrastructure Evaluation
from Customers’ Viewpoints: Using Sewer Systems
as a Case Study ............................................................... 89
Byongjun Kang, Soonyu Yu, Hyungjoon Kim and Kyoo-hong Park

Lean Approaches in Asset Management Within the Mining
Industry ................................................................. 101
Jared Ross Flynn and P.J. Vlok

Integrating Tacit Knowledge for Condition Assessment
of Continuous Mining Machines ........................................ 119
Joe Amadi-Echendu and Marc de Smidt

Extraction of Principal Components from Multiple
Statistical Features for Slurry Pump Performance
Degradation Assessment .................................................. 131
Peter W. Tse and Dong Wang

Fault Detection of Wind Turbine Drivetrain Utilizing
Power-Speed Characteristics ............................................ 143
Md Rifat Shahriar, Longyan Wang, Man Shan Kan,
Andy C.C. Tan and Gerard Ledwich

Maintenance Method Based on Risk Estimation
for 170 kV Pneumatic Type Gas Insulated Switchgear ............... 157
Y.M. Kim, J.R. Jung, C.H. Kim and M.J. Jin

No Fault Found and Air Safety ........................................ 165
Christopher J. Hockley and Laura Lacey

Feature Extraction Based on Cyclic Adaptive Filter
for Gearbox Fault Diagnosis .............................................. 175
Guangming Dong, Jin Chen and Ying Ming

Bearing Replacement Interval Extension for Helicopters .......... 189
Reuben Lim, David Mba and Emmanuel O. Ezugwu
