

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Rotation: The Rigid Rotor	1
1.2	Vibration: The Harmonic Oscillator	2
1.3	Electronic Structure: The Particle in a Box and the Hydrogen Atom	3
1.4	Transition Selection and Propensity Rules: $\Delta J$ , Franck–Condon, and $\Delta S$	4
1.5	Rotational Branches, Vibrational Bands, and Electronic Transitions	5
1.6	Some Sum Rules	8
1.7	Eigenstates are Stationary	10
	References	11
<b>2</b>	<b>Hierarchy of Terms in the Effective Hamiltonian</b>	13
2.1	Adiabatic and Diabatic Representations	13
2.1.1	Introduction	13
2.1.2	Adiabatic vs. Diabatic Representations	14
2.2	$\mathbf{H}^{\text{spin-orbit}}$	16
2.3	$\mathbf{H}^{\text{ROT}}$ , the Rotational Operator	17
2.4	Hund’s Cases	18
2.4.1	$\mathbf{H}^{(0)}$ vs. $\mathbf{H}^{(1)}$	22
2.5	Two Basis Sets for the $2 \times 2$ “Two-Level” Problem	22
2.6	Some Reasons for Patterns	23
2.7	Straight Line Plots	24
2.8	Stacked Plots	25
2.9	Angular Momenta: A Brief Summary	29
2.10	Where Have We Been and Where are We Going?	30
	References	30
<b>3</b>	<b>Spectroscopic Perturbations: Homogeneous and Heterogeneous</b>	33
3.1	What Is a Perturbation?	33
3.2	Level Shifts and Intensity Borrowing	41

3.3	Two Qualitatively Distinct Classes of Perturbation: Homogeneous and Heterogeneous .....	42
3.4	Franck–Condon Factors .....	42
3.5	Which Franck–Condon Factors Should I Use? .....	43
3.6	Intensity Borrowed from a <i>Nearby</i> Bright State .....	44
3.7	Intensity Borrowed from an <i>Energetically Remote</i> Bright State ....	44
3.8	Intensity Interference Effects .....	45
	References .....	46
<b>4</b>	<b>The Effective Hamiltonian for Diatomic Molecules</b> .....	47
4.1	Introduction .....	47
4.2	Main Topics of This Lecture .....	49
4.2.1	R-Dependence .....	49
4.2.2	How Do We Account for Interactions with Energetically Remote States? .....	49
4.2.3	Van Vleck Transformation .....	50
4.3	<i>R</i> -Dependence Is Encoded in <i>v, J</i> Dependence .....	51
4.3.1	Transition Moments: $\mu(R) \rightarrow M_{v',v''}$ .....	51
4.3.2	Centrifugal Distortion, $D_e$ .....	52
4.3.3	Vibration-Rotation Interaction, $\alpha_e$ : A Small Surprise .....	54
4.4	Van Vleck Transformation for Non- $^1\Sigma^+$ States .....	55
4.4.1	Centrifugal Distortion .....	56
4.4.2	The Van Vleck Transformation .....	57
4.4.3	Example of Centrifugal Distortion in a $^3\Pi$ State .....	60
4.4.4	$\Lambda$ -Doubling .....	61
4.5	Summary .....	67
	References .....	68
<b>5</b>	<b>Rotation of Polyatomic Molecules</b> .....	69
5.1	Introduction .....	69
5.2	Rotational Energy Levels of Rigid Polyatomic Rotors .....	74
5.2.1	Symmetric Top .....	74
5.2.2	Asymmetric Top .....	75
5.3	Correlation Diagrams: WHY? .....	79
5.3.1	Prolate–Oblate Top Correlation Diagram .....	79
5.3.2	Assignments of Rotational Transitions .....	81
5.4	Vibrational Dependence of Rotational Constants .....	83
	References .....	84
<b>6</b>	<b>Quantum Beats</b> .....	85
6.1	Introduction .....	85
6.2	Time-Dependent Schrödinger Equation (TDSE) .....	87
6.3	“Bright” and “Dark” States .....	87
6.4	Dynamics .....	90
6.5	Quantum Beats .....	98
6.5.1	Simple Two-Level Quantum Beats .....	98
6.5.2	Two-Level Treatment of QB with Complex Energies .....	100

6.5.3	What Does a Quantum Beat Signal Look Like? .....	103
6.5.4	Population Quantum Beats .....	104
6.5.5	Level-Crossing vs. Anticrossing .....	110
	References .....	110
<b>7</b>	<b>The Effective Hamiltonian for Polyatomic Molecule Vibration</b> .....	<b>113</b>
7.1	The Effective Vibrational Hamiltonian for Polyatomic Molecules .....	113
7.2	Harmonic Oscillator .....	114
7.2.1	Matrix Elements of $\mathbf{P}$ and $\mathbf{Q}$ .....	114
7.2.2	Dimensionless Forms: $\hat{\mathbf{H}}, \hat{\mathbf{Q}}, \hat{\mathbf{P}}$ .....	114
7.3	Polyatomic Molecules .....	118
7.3.1	Basis Set as Product of $3N - 6$ Harmonic Oscillator Eigenstates .....	118
7.3.2	Matrix Elements of $\mathbf{V}(\hat{\mathbf{Q}}_1, \hat{\mathbf{Q}}_2, \dots, \hat{\mathbf{Q}}_{3N-6})$ in the $\psi_{v_1, v_2, \dots, 3N-6}^{(0)}$ Basis Set .....	119
7.3.3	Breakdown of Non-Degenerate Perturbation Theory .....	120
7.3.4	Polyads .....	121
7.3.5	Patterns for Spectral Assignment and Mechanisms of Intramolecular Vibrational Redistribution (IVR) and Unimolecular Isomerization .....	123
7.4	Polyads in the Acetylene Electronic Ground State ( $S_0$ ) .....	124
	References .....	127
<b>8</b>	<b>Intramolecular Dynamics: Representations, Visualizations, and Mechanisms</b> .....	<b>129</b>
8.1	From the “Pluck” at $t = 0$ to the Time-Evolving State .....	130
8.2	Perturbation Theory .....	130
8.3	Toluene: A Hindered Rotor. A Fully Worked Out Example .....	132
8.4	The Pluck: $\Psi(\mathbf{Q}, t = 0)$ .....	139
8.5	$\Psi(\mathbf{Q}, t)$ Contains too Much Information .....	140
8.5.1	Motion in Real Space .....	141
8.5.2	Motion in State Space .....	143
8.6	Mechanism .....	145
	References .....	153
